HYDAC ELECTRONIC

HYDAC is best known for hydraulics, systems and fluid engineering. For over 50 years, HYDAC has been developing and manufacturing components and system solutions for specific applications in these fields.

Over 30 years ago, inspired by its industry and application experience, HYDAC expanded its portfolio to include sensors, measuring instruments and electronic controls.

The range of sensors includes products for the measurement of pressure, temperature, distance, position, level, flow volume, speed as well as contamination and oil condition. In addition to products for standard applications, the product portfolio also covers special applications such as potentially explosive atmospheres or applications with increased functional safety.

Almost all these products are developed, manufactured and marketed by HYDAC ELECTRONIC. Suitability for the application is tested on HYDAC test rigs. As a Tier 1 automotive supplier, HYDAC ELECTRONIC is certified in accordance with the rigorous quality standard ISO/TS 16949 and therefore fulfils the very high requirements regarding product quality, production processes and continuous improvement processes. Our international sales network provides customers with worldwide product availability, expert advice and support. An extensive service package completes our offer.

Computer simulation of a HYDAC pressure transmitter.

Production and automatic function testing.

Development and manufacturing plant in Saarbrücken-Gersweiler.

HYDAC Servicenter, a complete package of services.

Technical advice and training.

NOTE

The information in this brochure relates to the operating conditions and applications described. For applications or operating conditions not described, please contact the relevant technical department.

Subject to technical modifications.

- IWE 40		
- HLS 200 for applications with increased functional safety		
17. Accessories	382 - 403	17
● Electrical accessories	383 - 388	
for electrical connection type "4" (Binder, Series 714M18)		
for electrical connection type "5" (EN 175301-803 (DIN 43650) /ISO 4400)		
for electrical connection type "6" (M12×1, 4 pole)		
for electrical connection type "7" (DIN 43561)		
for electrical connection type "8" (M12×1, 5 pole)		
for electrical connection type "P" (M12×1, 8 pole)		
● Mechanical accessories	389 - 396	
- Connection adapters for pressure sensors		
- Mounting accessories for EDS 8000, HDA 8000, EDS 810		
- Mounting accessories for EDS 3000, ETS 3000, AS 3000, ENS 3000, HNS 3000		
- Mounting accessories for EDS 300, ETS 300		
- Mounting accessories for EDS 1700, ETS 1700		
- Mounting accessories for EDS 601		
- Tank mounting sleeve for ETS 3000		
- Connection blocks for ENS 3000		
- Connection blocks for HLB 1300		
- Connection blocks for AS 1000, AS 3000		
● Accessories for sensors for distance and position	397 - 400	
- Magnets for HLT 1000, HLT 2000, HNT 1000		
- Electrical accessories for HLT 2000		
● Accessories for service instruments	401 - 403	
- Accessories for HMG 30X0		
- Accessories for HMG 500/510		

Industries and applications

There is almost no hydraulic or pneumatic medium or system that could not be monitored and controlled by HYDAC measurement technology - quickly, precisely and safely.

It is not surprising, therefore, that the individually designed HYDAC Measuring Technology is employed by well-known manufacturers and operators in all industries.

These applications range from analysis and diagnostics of operating fluids in the laboratory and on site, to controlling complex industrial systems and to miniaturised systems in construction and road vehicles.

Excavators

Electronic controls and sensors to complete the system electronics.

- Load limit control
- Electro-hydraulic load sensing
- Integrated operating data logging
- Controls of special equipment
- Cut-off devices
- Safety cut-off devices

Wheel Loaders

Electronic controls and sensors to complete the system electronics.

- Load limit control
- Electro-hydraulic load sensing
- Integrated operating data logging
- Controls of special equipment
- Cut-off devices
- Safety cut-off devices

Road Construction Machinery

Sensor technology and system electronics to generate modern control concepts or ready-to-install total concepts.

- Load spectra
- Condition monitoring
- Safety systems
- Load limiting
- Function controls
- Energy management

Telescopic Cranes

Sensor technology and system electronics to generate modern control concepts or ready-to-install total concepts.

- Load torque limiting
- Load spectra
- Load sensing
- Load limit control
- Energy management
- Condition monitoring

Municipal Machines

Sensors, system electronics and condition monitoring.

- Working hydraulics
- Axle suspension systems
- Cab suspension systems
- Levelling systems

Tractors

Sensors, system electronics and condition monitoring.

- Cab suspension
- Central hydraulics
- Front axle suspension
- Transmission shift control
- Level control
- Anti-roll stabilisation

Agricultural Technology

Electronic controls and sensors to complete the system electronics.

- Load limit control
- Electro-hydraulic load sensing
- Integrated operating data logging
- Controls of special equipment
- Cut-off devices
- Safety cut-off devices

Mining

Electronic measurement technology for underground applications.

- Pump station / Media supply
- Mining of raw materials
- Heading
- Material-handling and passenger transportation
- Analysis and diagnostics
- Condition monitoring

Aviation and Aerospace Industry

Sensors, system electronics and condition monitoring.

- Rocket test rigs
- Test rigs for aircraft hydraulics
- Satellite test rigs
- Flight simulators

Iron - Steel - Metal

Measuring technology and electronics.

- Pump stations
- Valve stations
- Accumulator stations
- Heat exchangers
- Condition monitoring

Wind Turbines

Sensors, system electronics and condition monitoring.

- Condition monitoring of hydraulic and lubrication oils
- Measurement technology
- Safety and yaw brakes
- Pitch control
- Performance testing stations for transmission systems

Machine Tools

Sensors, system electronics and condition monitoring.

- Hydraulic weight counter-balance
- Hydrostatic slide bearing
- Pressure boost station
- Central processing of cooling lubricants
- Tool clamping device

Power Plant Technology

Sensors, system electronics and condition monitoring.

- Condition monitoring of hydraulic and lubrication oils
- Hydraulic drive and control systems including electronic controls

Pulp and Paper Industry

Sensors, system electronics and condition monitoring.

Transformers

Measuring technology, electronics and condition monitoring.

- Insulating oil conditioning
- Insulating oil monitoring
- Cooling

Automotive Production

Measurement technology and condition monitoring for machine tools and presses, Cooling lubricant supply and test rigs.

Oil and Gas Industry

Sensors, system electronics and condition monitoring for offshore, subsea or onshore applications.

Shipping

Measuring technology, electronics and condition monitoring for:

- Engines
- Control of motion sequences
- Steering gear/Propeller
- Ballast water treatment
- Deck superstructures

Condition Monitoring

Data logging and interpretation providing information on the condition of machines, systems and their components.

ELECTRONIC PRESSURE TRANSMITTERS

The right pressure transmitter for every application! The wide ranging product choice from HYDAC offers solutions for all industries, whether systems or machinery manufacture, mobile technology or for laboratory applications.

The pressure transmitters are available with a variety of output signals, connectors and fluid port connection options.

Pressure transmitters for general applications:

Electronic Pressure Transmitter HDA 4800

Description:

The pressure transmitter series HDA 4800 has a very accurate and robust sensor cell with a thin-film strain gauge on a stainless steel membrane.

Outstanding technical specifications and robust construction make the HDA 4800 particularly suited to the field of test rig and diagnostic technology. It is also suitable for a broad range of industrial applications.

Since the accuracy of a pressure transmitter varies greatly with the temperature of the fluid, the instrument has excellent characteristics in this respect. The output signals 4 .. 20 mA, 0 .. 10V and 0 .. 20 mA (source) are available as standard.

Special features:

- Accuracy $\leq \pm 0.125\%$ FS typ.
- Highly robust sensor cell
- Very small temperature error
- Excellent EMC characteristics
- Excellent long term stability

Technical data:

Input data	
Measuring ranges	6; 16; 60; 100; 250; 400; 600 bar
Overload pressures	15; 32; 120; 200; 500; 800; 1000 bar
Burst pressures	100; 200; 300; 500; 1000; 2000; 2000 bar
Mechanical connection	G1/4 A DIN 3852
Torque value	20 Nm
Parts in contact with medium	Mech. connection: Stainless steel Seal: FPM
Output data	
Output signal, permitted load resistance	4 .. 20 mA, 2 conductor $R_{L,max} = (U_B - 10 V) / 20 \text{ mA} [\text{k}\Omega]$ 0 .. 10 V, 3 conductor $R_{L,min} = 2 \text{ k}\Omega$ 0 .. 20 mA, 3 conductor source $R_{L,max} = (U_B - 4 V) / 20 \text{ mA} [\text{k}\Omega]$
Accuracy to DIN 16086, Max. setting	$\leq \pm 0.125\%$ FS typ. $\leq \pm 0.25\%$ FS max.
Accuracy at min. setting (B.F.S.L.)	$\leq \pm 0.06\%$ FS typ. $\leq \pm 0.125\%$ FS max.
Temperature compensation	$\leq \pm 0.005\%$ FS / °C typ.
Zero point	$\leq \pm 0.01\%$ FS / °C max.
Temperature compensation Over range	$\leq \pm 0.005\%$ FS / °C typ. $\leq \pm 0.01\%$ FS / °C max.
Non-linearity at max. setting to DIN 16086	$\leq \pm 0.15\%$ FS max.
Hysteresis	$\leq \pm 0.1\%$ FS max.
Repeatability	$\leq \pm 0.05\%$ FS
Rise time	$\leq 1 \text{ ms}$
Long-term drift	$\leq \pm 0.1\%$ FS typ. / year
Environmental conditions	
Compensated temperature range	-25 .. +85 °C
Operating temperature range ¹⁾	-40 .. +85 °C / -25 .. +85 °C
Storage temperature range	-40 .. +100 °C
Fluid temperature range ¹⁾	-40 .. +100 °C / -25 .. +100 °C
CE mark	EN 61000-6-1 / 2 / 3 / 4
cULus mark ²⁾	Certificate No. E318391
Vibration resistance to DIN EN 60068-2-6 at 10 .. 500 Hz	$\leq 20 \text{ g}$
Protection class to IEC 60529	IP 65 (for male EN175301-803 (DIN 43650) and Binder 714 M18) IP 67 (M12x1, when an IP 67 connector is used)
Other data	
Supply voltage	10 .. 30 V DC 2-conductor 12 .. 30 V DC 3 conductor
for use acc. to UL spec.	- limited energy - according to 9.3 UL 61010; Class 2; UL 1310/1585; LPS UL 60950
Residual ripple of supply voltage	$\leq 5\%$
Current consumption	$\leq 15 \text{ mA}$
Life expectancy	> 10 million cycles 0 .. 100 % FS
Weight	~ 180 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.

FS (Full Scale) = relative to complete measuring range

B.F.S.L. = Best Fit Straight Line

¹⁾ -25 °C with FPM seal, -40 °C on request

²⁾ Environmental conditions according to 1.4.2 UL 61010-1; C22.2 No 61010-1

Model code:

HDA 4 8 4 X - X - XXX - 000

Mechanical connection

4 = G1/4 A DIN 3852 (male)

Electrical connection

4 = Male, 4 pole Binder series 714 M18
(connector not supplied)

5 = Male, 3 pole+ PE, EN175301-803 (DIN 43650)
(connector supplied)

Electronic Pressure Transmitter HDA 4700

Description:

The pressure transmitter series HDA 4700 has a very accurate and robust sensor cell with a thin-film strain gauge on a stainless steel membrane.

The 4 .. 20 mA or 0 .. 10 V output signals enable connection to all measurement and control devices of HYDAC ELECTRONIC GMBH as well as standard evaluation systems (e.g. PLC controls).

The main areas of application are in the mobile or industrial sectors of hydraulics and pneumatics, particularly in applications with restricted installation space.

Special features:

- Accuracy $\leq \pm 0.25\%$ FS typ.
- Highly robust sensor cell
- Very small temperature error
- Excellent EMC characteristics
- Very compact design
- Persuasive price / performance ratio

Electronic Pressure Transmitter HDA 4700 with Approvals for Shipping

Description:

This pressure transmitter has been specially developed for shipbuilding applications and is based on the HDA 4000 series.

With its stainless steel measurement cell and thin-film strain gauge, the HDA 4700 is designed to measure relative pressures in the high pressure range.

The evaluation electronics converts the measured pressure into a proportional analogue signal of 4 .. 20 mA.

The electronic module is completely potted to protect it against humidity, vibrations and shock, and is enclosed in a solid stainless steel housing.

For use in the shipping industry, these pressure transmitters have been approved by the following organisations.

Approvals:

- American Bureau of Shipping

- Lloyds Register of Shipping

- Det Norske Veritas

- Germanischer Lloyd

- Bureau Veritas

Other approvals on request

Electronic Pressure Transmitter HDA 4700 CANopen

Description:

The HDA 4700 CAN is a digital pressure transmitter which is used to measure relative pressures in hydraulics and pneumatics. The measured pressure value is digitized and made available to the CAN field bus system via the CANopen protocol. The instrument parameters can be viewed and configured by the user via the CANopen object directory using standard CAN software.

This pressure transmitter, which is based on the HDA 4700, has a very accurate and robust sensor cell with a thin-film strain gauge on a stainless steel membrane.

Due to their outstanding temperature and EMC characteristics, together with their compact dimensions, these instruments can be used in a wide range of applications in the mobile and industrial sectors.

Special features:

- CANopen interface
- Accuracy $\leq \pm 0.25\%$ FS typ.
- Robust thin-film cell
- Excellent EMC characteristics
- Very compact design

Electronic Pressure Transmitter HDA 4400

Description:

The pressure transmitter series HDA 4400 has a pressure measurement cell with thin-film strain gauge on a stainless steel membrane.

The 4 .. 20 V or 0 .. 10 V output signals enable connection to all HYDAC ELECTRONIC GMBH measurement and control devices as well as connection to standard evaluation systems (e.g. PLC controls).

The main areas of application are in the mobile or industrial sectors of hydraulics and pneumatics, particularly in applications with restricted installation space.

Special features:

- Accuracy $\leq \pm 0.5\%$ FS typ.
- Highly robust sensor cell
- Very small temperature error
- Excellent EMC characteristics
- Very compact design
- Persuasive price / performance ratio

Electronic Pressure Transmitter HDA 4300

Description:

The pressure transmitter series HDA 4300 has a ceramic pressure measurement cell with a thick-film strain gauge which has been specially developed for measuring relative pressure in the low pressure range.

The output signals 4 .. 20 mA or 0 .. 10 V allow connection of all HYDAC ELECTRONIC GMBH measurement and control devices as well as industry standard control and monitoring instruments.

The main areas of application are low-pressure applications in hydraulics and pneumatics, particularly in refrigeration and air-conditioning technology, the food and pharmaceutical industries.

Special features:

- Accuracy $\leq \pm 0.5$ % FS typ.
- Very small temperature error
- Excellent EMC characteristics
- Very compact design
- Persuasive price / performance ratio

Technical data:

Electronic Pressure Transmitter HDA 4300 with Approvals for Shipping

Description:

This pressure transmitter has been specially developed for shipbuilding applications and is based on the HDA 4000 series.

The HDA 4300 has a ceramic measurement cell with thick-film strain gauge for measuring relative pressure in the low pressure range.

The evaluation electronics converts the measured pressure into a proportional analogue signal of 4 .. 20 mA.

The electronic module is completely potted to protect it against humidity, vibrations and shock, and is enclosed in a solid stainless steel housing.

For use in the shipping industry, these pressure transmitters have been approved by the following organisations.

Approvals:

- American Bureau of Shipping

- Lloyds Register of Shipping

- Det Norske Veritas

- Germanischer Lloyd

- Bureau Veritas

Electronic Pressure Transmitter HDA 4100

Description:

The pressure transmitter series HDA 4100 has a ceramic pressure measurement cell with thick-film strain gauge which has been specially developed for measuring absolute pressure in the low-pressure range.

The 4 .. 20 mA or 0 .. 10 V output signals enable connection to all HYDAC ELECTRONIC GMBH measurement and control devices as well as standard control and evaluation systems.

The main areas of application are low-pressure applications in hydraulics and pneumatics, particularly in refrigeration and air-conditioning technology, the food and pharmaceutical industries.

Special features:

- Accuracy $\leq \pm 0.5\%$ FS typ.
- Very small temperature error
- Excellent EMC characteristics
- Very compact design
- Persuasive price / performance ratio

Electronic Pressure Transmitter HDA 7446

Description:

The pressure transmitter series HDA 7400 combines excellent technical specifications with a highly compact design.

The HDA 7446 was specifically developed for OEM applications e.g. in mobile applications.

A strain gauge sensor cell is the basis for a robust, long-life pressure transmitter.

Various pressure ranges between 0 .. 40 bar and 0 .. 600 bar provide versatility when adapting to particular applications.

For integration into modern controls (e.g. with PLC), the analogue output signals 4 .. 20 mA or 0 .. 10V are also available on the standard version.

Other output signals are available on request.

Special features:

- Accuracy $\leq \pm 0.5$ % FS typ.
- Highly robust sensor cell
- Very compact design
- Very small temperature error
- Excellent EMC characteristics
- Excellent durability

Electronic Pressure Transmitter HDA 7400 CANopen

Description:

The HDA 7400 CAN is a digital pressure transmitter which is used to measure relative pressures in hydraulics and pneumatics. The measured pressure value is digitized and made available to the CAN field bus system via the CANopen protocol. The instrument parameters can be viewed and configured by the user via the CANopen object directory using standard CAN software.

This pressure transmitter, which is based on the HDA 7400, has a very accurate and robust sensor cell with a thin-film strain gauge on a stainless steel membrane.

Due to their outstanding temperature and EMC characteristics, together with their compact dimensions, these instruments can be used in a wide range of applications in the mobile and industrial sectors.

Special features:

- CANopen interface
- Accuracy $\leq \pm 0.5\%$ FS typ.
- Robust thin-film cell
- Excellent EMC characteristics
- Very compact design

Electronic Pressure Transmitter HDA 3800 for Iron & Steel Works Applications

Description:

This high-precision pressure transmitter was specially developed and adapted for the sophisticated measurement demands of steelworks technology.

The instrument has a very robust sensor cell with a thin-film strain gauge on a stainless steel membrane. Its outstanding specifications in respect of temperature effect (temperature drift for zero point and range are in each case max. $\leq \pm 0.01$ % FS / °C) and accuracy ($\leq \pm 0.15$ % FS typ.) make it ideally suited for use in the environmental conditions found in steelworks.

The excellent EMC characteristics guarantee signal stability during the harshest high-frequency, electro-magnetic interference.

Special features:

- Accuracy $\leq \pm 0.15$ % FS typ.
- Specially designed for use in steelworks and rolling mills
- Highly robust sensor cell
- Very small temperature error
- Excellent EMC characteristics
- Excellent long term stability

Further electronic pressure switches for special applications can be found in the Sections "Pressure Sensors with Flush Membrane", "Sensors for Potentially Explosive Atmospheres" and "OEM Products for Large Volume Production".

Electronic pressure switches offer a multitude of advantages in comparison to mechanical pressure switches and contact pressure gauges. Their superiority is shown through greater accuracy, freedom from wear, long-term stability, simpler operation and the high number of switching cycles, among other things.

Description:

The EDS 3400 is a compact electronic pressure switch with integrated digital display for relative pressure measurement in the high-pressure range. The instrument has a stainless steel measurement cell with thin-film strain gauge. The instrument can have one or two switching outputs and there is the option of an additional switchable analogue output signal (4 .. 20 mA or 0 .. 10 V).

A special design feature of the EDS 3400 is that the display can be moved in two planes. The device can be installed in almost any position and the display can be turned to the optimum position without the usual additional expense of a mechanical adapter. The 4-digit display can indicate the pressure in **bar**, **psi** or **MPa**.

The user can select the particular unit of measurement. When changing to a different measurement unit, the instrument automatically converts all the switching settings to the new unit of measurement. In addition, the EDS 3400 is also available in a DESINA®-compliant version. The main applications of the EDS 3400 are primarily in hydraulics and pneumatics, as well as in refrigeration and air conditioning technology.

Special features:

- 1 or 2 PNP transistor switching outputs, up to 1.2 A load per output
- Accuracy $\leq \pm 1\%$ FS
- Optional switchable analogue output (4 .. 20 mA / 0 .. 10 V)
- 4-digit digital display
- Optimum alignment - can be rotated in two planes (axes)
- Measured value can be displayed in bar, psi or MPa
- User-friendly due to key programming
- Switching points and switch-back hystereses can be adjusted independently
- Many useful additional functions
- Optional Desina®-compliant pin configuration with diagnostic function

Setting options:

All settings available on the EDS 3400 are grouped in 2 easy-to-navigate menus. In order to prevent unauthorised adjustment of the device, a programming lock can be set.

Setting ranges for the switch outputs:

Switching point function

Meas. range in bar	Switch point in bar	Hysteresis in bar	Increment* in bar
0 .. 40	0.6 .. 40	0.2 .. 39.6	0.1
0 .. 100	1.6 .. 100	0.6 .. 99.0	0.2
0 .. 250	4.0 .. 250	1.5 .. 247.5	0.5
0 .. 400	6.0 .. 400	2.0 .. 396	1
0 .. 600	9.0 .. 600	3.0 .. 594	1

Window function

Meas. range in bar	Lower switch value in bar	Upper switch value in bar	Increment* in bar
0 .. 40	0.6 .. 39.2	0.9 .. 39.6	0.1
0 .. 100	1.6 .. 98.2	2.4 .. 99	0.2
0 .. 250	4.0 .. 245.5	6.0 .. 247.5	0.5
0 .. 400	6.0 .. 392	9.0 .. 396	1
0 .. 600	9.0 .. 589	14 .. 594	1

* All ranges given in the table are adjustable by the increments shown.

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Choice of display (actual pressure, peak value, switch point 1, switch point 2, display off)
- Display filter for smoothing the display value during pressure pulsations
- Optional analogue output signal selectable 4 .. 20 mA or 0 .. 10 V
- Pressure can be displayed in the measurement units bar, psi, MPa. The scaling can also be adapted to indicate force, weight, etc.

EDS 3400 for self diagnostics:

The DESINA®-compliant pressure switch has been specially developed for customers in the machine tool and mechanical engineering sectors and complies with the DESINA® specification. A diagnostic signal enables errors to be detected and an "ERROR" message also appears in the display. The electrical connection is a round 5-pole M12x1 to IP 67 in accordance with DESINA® requirements.

Model code:

EDS 3 4 X X - X - XXXX - 000

¹⁾ Environmental conditions according to 1.4.2 UL 61010-1; C22.2 No 61010-1

Setting options:

All terms and symbols used for setting the EDS 3400 as well as the menu structure comply with the specifications in the VDMA Standard (VDMA 24574-1) for pressure switches.

The EDS 3400 can easily be adjusted via three buttons.

Setting ranges for the switch outputs:

Measuring range	Lower limit of RP / FL in bar	Upper limit of SP / FH in bar
0 .. 40	0.4	40.0
0 .. 100	1.0	100.0
0 .. 250	2.5	250.0
0 .. 400	4	400
0 .. 600	6	600

Measuring range	Min. difference betw. RP and SP & FL and FH in bar	Increment* in bar
0 .. 40	0.4	0.1
0 .. 100	1.0	0.2
0 .. 250	2.5	0.5
0 .. 400	4	1
0 .. 600	6	1

* All ranges given in the table are adjustable by the increments shown.

SP = switch point

RP = switch-back point

FL = pressure window lower value

FH = pressure window upper value

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Analogue output signal selectable 4 .. 20 mA or 0 .. 10 V
- Pressure can be displayed in measurement units bar, psi, MPa. The scaling can also be adapted to indicate force, weight, etc.

Electronic Pressure Switch EDS 3400 with IO-Link Interface

Description:

The EDS 3400 with IO-Link communication interface is a compact electronic pressure switch with integrated digital display for relative pressure measurement in the high-pressure range.

The device is equipped with a switching output and additional output that can be configured as switching or analogue (4 .. 20 mA or 0 .. 10 V).

Compared with the standard version, the IO-Link interface enables bidirectional communication between the device and the control.

Parameterisation and cyclical transmission of process and service data is therefore possible.

The pressure switch series EDS 3400 with communication interface IO-Link according to specification V1.1 has been specially designed for connecting sensors in automation systems.

Typical fields of application are machine tools, handling and assembly automation, intralogistics or the packaging industry.

Special features:

- 1 PNP transistor switching output
- 1 universal output, configurable as PNP transistor switching output or analogue output
- Accuracy $\leq \pm 1\%$ FS
- 4-digit digital display
- Optimum alignment: can be rotated in two axes

Technical data:

Input data	
Measuring ranges	40; 100; 250; 400; 600 bar
Overload range	80; 200; 500; 800; 1000 bar
Burst pressures	200; 500; 1000; 2000, 2000 bar
Mechanical connection	G1/4 A DIN 3852 Threaded port DIN 3852-G1/4
Torque value	20 Nm
Parts in contact with medium	Mech. connection: Stainless steel Sensor cell: Stainless steel Seal: FPM
Output data	
Output signals	Output 1: PNP Transistor switching output Output 2: can be configured as PNP transistor switching output or analogue output
Accuracy to DIN 16086	$\leq \pm 0.5\%$ FS typ.
Max. setting (display, analogue output)	$\leq \pm 1\%$ FS max.
Repeatability	$\leq \pm 0.25\%$ FS max.
Temperature drift	$\leq \pm 0.025\%$ FS / °C max. zero point $\leq \pm 0.025\%$ FS / °C max. range
Analogue output	
Signal	selectable: 4 .. 20 mA load resistance max. 500 Ω 0 .. 10 V load resistance min. 1 k Ω
Switch outputs	
Type	PNP transistor switching output
Switching current	max. 250 mA per output
Switching cycles	> 100 million
Reaction time	< 10 ms
Long term drift	$\leq \pm 0.3\%$ FS typ. / year
Parameterisation	
Via IO-Link interface, with HYDAC programming device HPG 3000 or push buttons on the EDS 3400	
Environmental conditions	
Compensated temperature range	-10 .. +70 °C
Operating temperature range	-25 .. +80 °C
Storage temperature range	-40 .. +80 °C
Fluid temperature range	-25 .. +80 °C
CE - mark	EN 61000-6-1 / 2 / 3 / 4
Vibration resistance according to DIN EN 60068-2-6 (0 .. 500 Hz)	≤ 10 g
Shock resistance according to DIN EN 60068-2-29 (11 ms)	≤ 50 g
Protection class to IEC 60529	IP 67
Other data	
Supply voltage	9 .. 35 V DC without analogue output 18 .. 35 V DC with analogue output
Current consumption	≤ 0.535 A with active switching outputs ≤ 35 mA with inactive switching outputs ≤ 55 mA with inactive switching output and analogue output
Display	4-digit, LED, 7-segment, red, height of digits 7 mm
Weight	~ 120 g

Note: Excess voltage, override protection and short circuit protection are provided.
FS (Full Scale) = relative to complete measuring range

Setting options:

All terms and symbols used for setting the EDS 3400 as well as the menu structure comply with the specifications in the VDMA Standard for pressure switches.

Setting ranges for the switch outputs:

Measuring range in bar	Lower limit of RP / FL in bar	Upper limit of SP / FH in bar
0 .. 40	0.4	40.0
0 .. 100	1.0	100.0
0 .. 250	2.5	250.0
0 .. 400	4	400
0 .. 600	6	600

Measuring range in bar	Min. difference betw. RP and SP & FL and FH in bar	Increment* in bar
0 .. 40	0.4	0.1
0 .. 100	1.0	0.2
0 .. 250	2.5	0.5
0 .. 400	4	1
0 .. 600	6	1

* All ranges given in the table are adjustable by the increments shown.

SP = switch point

RP = switch-back point

FL = pressure window lower value

FH = pressure window upper value

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Analogue output signal selectable: 4 .. 20 mA or 0 .. 10 V
- Pressure can be displayed in bar, psi, MPa.

Pin connections:

Pin	Signal	Description
1	L+	Supply voltage
2	I/Q	Switching output (SP2) / analogue output
3	L-	Gnd
4	C/Q	IO-Link communication / switching output (SP1)

IO-Link-specific data:

Baud rate	38.4 kBaud *
Cycle time	2.5 ms
Process data width	16 Bit
Frame type	2.2
Specification	V1.1

* Connection with unshielded standard sensor line possible up to a max. line length of 20 m.

Description:

The EDS 3300 is a compact electronic pressure switch with integrated digital display for relative pressure measurement in the low-pressure range. It has a ceramic measuring cell with thick-film strain gauge. The instrument can have one or two switching outputs, and there is the option of an additional switchable analogue output signal (4 .. 20 mA or 0 .. 10 V). A special design feature of the EDS 3300 is that the display can be moved in two planes (axes). The instrument can be installed in almost any mounting position and the display can be turned to the optimum position without the usual additional expense of a mechanical adapter. The 4-digit display can indicate the pressure in **bar**, **psi** or **MPa**. The user can select the particular unit of measurement. When changing to a different measurement unit, the instrument automatically converts all the switching settings to the new unit of measurement. In addition, the EDS 3300 is also available in a DESINA®-compliant version. The main applications of the EDS 3300 are primarily in hydraulics and pneumatics, as well as in refrigeration and air conditioning technology.

Special features:

- 1 or 2 PNP transistor switching outputs, up to 1.2 A load per output
- Accuracy $\leq \pm 1\%$ FS
- Optional switchable analogue output (4 .. 20 mA / 0 .. 10 V)
- 4-digit digital display
- Optimum alignment - can be rotated in two axes
- Measured value can be displayed in bar, psi or MPa
- User-friendly due to key programming
- Switching points and switch-back hystereses can be adjusted independently
- Many useful additional functions
- Optional Desina®-compliant pin configuration with diagnostic function

0 .. 16	0.25 .. 15.7	0.4 .. 15.8	0.05

* All ranges given in the table are adjustable by the increments shown.

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Choice of display (actual pressure, peak value, switch point 1, switch point 2, display off)
- Display filter for smoothing the display value during pressure pulsations
- Analogue output signal selectable 4 .. 20 mA or 0 .. 10 V
- Pressure can be displayed in the measurement units bar, psi, MPa. The scaling can also be adapted to indicate force, weight, etc.

EDS 3300 for self diagnostics:

The DESINA®-compliant pressure switch has been specially developed for customers in the machine tool and mechanical engineering sectors and complies with the DESINA® specification. A diagnostic signal enables errors to be detected and an "ERROR" message also appears in the display. The electrical connection is a round 5-pole M12x1 to IP 67 in accordance with DESINA® requirements.

Model code:

EDS 3 3 X X - X - XXXX - 000 - X 1

Mechanical connection

Electronic Pressure Switch EDS 3300 with IO-Link Interface

Description:

The EDS 3300 with IO-Link communication interface is a compact electronic pressure switch with integrated digital display for relative pressure measurement in the low-pressure range.

The device is equipped with a switching output and additional output that can be configured as switching or analogue (4 .. 20 mA or 0 .. 10 V).

Compared with the standard version, the IO-Link interface enables bidirectional communication between the device and the control.

Parameterisation and cyclical transmission of process and service data is therefore possible.

The pressure switch series EDS 3300 with communication interface IO-Link according to specification V1.1 has been specially designed for connecting sensors in automation systems.

Typical fields of application are machine tools, handling and assembly automation, intralogistics or the packaging industry.

Special features:

- IO Link Interface
- 1 PNP transistor switching output
- Additional signal output, can be configured as PNP transistor switching output or analogue output
- Accuracy $\leq \pm 1\%$ FS
- 4-digit digital display
- Display can be rotated in two axes for optimal alignment

Technical data:

Input data	
Measuring ranges	-1..1; 1; 2.5; 6; 10; 16 bar

CE - mark	EN 61000-6-1 / 2 / 3 / 4
Vibration resistance according to DIN EN 60068-2-6 (0 .. 500 Hz)	≤ 10 g
Shock resistance according to DIN EN 60068-2-29 (11 ms)	≤ 50 g
Protection class to IEC 60529	IP 67
Other data	
Supply voltage	9 .. 35 V DC without analogue output 18 .. 35 V DC with analogue output
Current consumption	≤ 0.535 A with active switching outputs ≤ 35 mA with inactive switching outputs ≤ 55 mA with inactive switching output and analogue output
Display	4-digit, LED, 7-segment, red, height of digits 7 mm
Weight	~ 120 g

Note: Excess voltage, override protection and short circuit protection are provided.
FS (Full Scale) = relative to complete measuring range

Setting options:

All terms and symbols used for setting the EDS 3300 as well as the menu structure comply with the specifications in the VDMA Standard for pressure switches.

Setting ranges for the switch outputs:

Measuring range in bar	Lower limit of RP / FL in bar	Upper limit of SP / FH in bar
-1 .. 1	-0.98	1.00
0 .. 1	0.010	1.000
0 .. 2.5	0.025	2.500
0 .. 6	0.06	6.00
0 .. 10	0.10	10.00
0 .. 16	0.20	16.00

Measuring range in bar	Min. difference betw. RP and SP & FL and FH in bar	Increment* in bar
-1 .. 1	0.02	0.01
0 .. 1	0.010	0.002
0 .. 2.5	0.025	0.005
0 .. 6	0.06	0.01
0 .. 10	0.10	0.02
0 .. 16	0.20	0.05

* All ranges given in the table are adjustable by the increments shown.
 SP = switch point
 RP = switch-back point
 FL = pressure window lower value
 FH = pressure window upper value

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Analogue output signal selectable to 4 .. 20 mA or 0 .. 10 V
- Pressure can be displayed in bar, psi, MPa.

Pin connections:

Pin	Signal	Description
1	L+	Supply voltage
2	I/Q	Switching output (SP2) / analogue output
3	L-	Gnd
4	C/Q	IO-Link communication / switching output (SP1)

IO-Link-specific data:

Baud rate	38.4 kBaud *
Cycle time	2.5 ms
Process data width	16 Bit
Frame type	2.2
Specification	V1.1

* Connection with unshielded standard sensor line possible up to a max. line length of 20 m.

Description:

The EDS 3100 is a compact electronic pressure switch with integrated digital display for absolute pressure measurement in the low-pressure range. It has a ceramic measuring cell with thick-film strain gauge. The instrument can have one or two switching outputs, and there is the option of an additional switchable analogue output signal (4 .. 20 mA or 0 .. 10 V).

A special design feature of the EDS 3100 is that the display can be rotated in two planes. The instrument can be installed in almost any mounting position and the display can be turned to the optimum position without the usual additional expense of a mechanical adapter. The 4-digit display can indicate the pressure in **bar**, **psi** or **MPa**. The user can select the particular unit of measurement. When changing to a different measurement unit, the instrument automatically converts all the switching settings to the new unit of measurement. In addition, the EDS 3100 is also available in a DESINA®-compliant version.

The main applications of the EDS 3100 are primarily in hydraulics and pneumatics, as well as in refrigeration and air conditioning technology.

Special features:

- 1 or 2 PNP transistor switching outputs, up to 1.2 A load per output
- Accuracy $\leq \pm 1\%$ FS
- Optional switchable analogue output (4 .. 20 mA / 0 .. 10 V)
- 4-digit digital display
- Optimum alignment - can be rotated in two axes
- Measured value can be displayed in bar, psi or MPa
- User-friendly due to key programming
- Switching points and switch-back hystereses can be adjusted independently
- Many useful additional functions
- Optional Desina®-compliant pin configuration with diagnostic function

Setting options:

All settings available on the EDS 3100 are grouped in 2 easy-to-navigate menus. In order to prevent unauthorised adjustment of the device, a programming lock can be set.

Setting ranges for the switch outputs:

Switching point function

Meas. range in bar	Switch point in bar	Hysteresis in bar	Increment* in bar
0 .. 1	0.016 .. 1	0.006 .. 0.99	0.002
0 .. 2.5	0.04 .. 2.5	0.015 .. 2.475	0.005

Window function

Meas. range in bar	Lower switch value in bar	Upper switch value in bar	Increment* in bar
0 .. 1	0.016 .. 0.982	0.024 .. 0.99	0.002
0 .. 2.5	0.04 .. 2.455	0.06 .. 2.475	0.005

* All ranges given in the table are adjustable by the increments shown.

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Choice of display (actual pressure, peak value, switch point 1, switch point 2, display off)
- Display filter for smoothing the display value during pressure pulsations
- Analogue output signal selectable 4 .. 20 mA or 0 .. 10 V
- Pressure can be displayed in measurement units bar, psi, MPa. The scaling can also be adapted to indicate force, weight, etc.

EDS 3100 for self diagnostics:

The DESINA®-compliant pressure switch has been specially developed for customers in the machine tool and mechanical engineering sectors and complies with the DESINA® specification.

A diagnostic signal enables errors to be detected and an "ERROR" message also appears in the display. The electrical connection is a round 5-pole M12x1 to IP 67 in accordance with DESINA® requirements.

Model code:

EDS 3 1 X X - X - XXXX - 000 - X 1

Electronic Pressure Switch EDS 3100 with IO-Link Interface

Description:

The EDS 3100 with IO-Link communication interface is a compact electronic pressure switch with integrated digital display for absolute pressure measurement in the low-pressure range.

The instrument is equipped with a switching output and additional output that can be configured as switching or analogue (4 .. 20 mA or 0 .. 10 V).

Compared with the standard version, the IO-Link interface enables bidirectional communication between the device and the control.

Parameterisation and cyclical transmission of process and service data is therefore possible.

The pressure switch series EDS 3100 with communication interface IO-Link according to specification V1.1 has been specially designed for connecting sensors in automation systems.

Typical fields of application are machine tools, handling and assembly automation, intralogistics or the packaging industry.

Special features:

- IO Link Interface
- 1 PNP transistor switching output
- Additional signal output, can be configured as PNP transistor switching output or analogue output
- Accuracy $\leq \pm 1\%$ FS
- 4-digit digital display
- Can be rotated in two axes for optimal alignment

Technical data:

Input data	
Measuring ranges	1; 2.5 bar

Note:

The information in this brochure relates to the operating conditions and applications described. For applications or operating conditions not described, please contact the relevant technical department. Subject to technical modifications.

Description:

The EDS 300 is a compact, electronic pressure switch with integral digital display.

Four different output models are available: with one switching point, with two switching points and both models can also have an additional analogue output signal 4 .. 20 mA.

The switching points and the associated hystereses can be adjusted using the keypad. For optimum adaptation to a particular application, the instrument has many additional adjustment parameters, e.g. switching delay times, N/O / N/C function of the outputs.

The main applications of the EDS 300 are to indicate pressures and limits in hydraulics and pneumatics and anywhere where high switching frequency or constant switching accuracy would overburden a mechanical pressure switch. The unit is ideal for building accumulator charging circuits or pump and compressor controls.

Special features:

- Integrated pressure sensor with thin-film strain gauge on stainless steel membrane
- Compact, robust construction
- Accuracy $\leq \pm 1\%$ FS
- 3-digit digital display
- Easy to operate thanks to key programming
- Switching points and switch-back hystereses can be adjusted independently
- Window function
- Many useful additional functions

Vibration resistance to DIN EN 60068-2-6 at 10 .. 500 Hz	≤ 10 g
Shock resistance to DIN EN 60068-2-29 (11 ms)	≤ 50 g
Protection class to IEC 60529	IP 65
Other data	
Supply voltage	20 .. 32 V DC
Current consumption	approx. 100 mA (inactive switch output)
Display	3-digit, LED, 7 segment, red, height of digits 9.2 mm
Weight	~ 300 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.
FS (Full Scale) = relative to complete measuring range

Setting options:

All settings available on the EDS 300 are grouped in 2 easy-to-navigate menus. In order to prevent unauthorised adjustment of the device, a programming lock can be set.

Setting ranges for the switch outputs:

Switching point function

Meas. range in bar	Switch point in bar	Hysteresis in bar	Increment* in bar
0 .. 16	0.3 .. 16	0.1 .. 15.8	0.1
0 .. 40	0.6 .. 40	0.2 .. 39.6	0.2
0 .. 100	1.5 .. 100	0.5 .. 99.0	0.5
0 .. 250	3.0 .. 250	1.0 .. 248	1.0
0 .. 400	6.0 .. 400	2.0 .. 396	2.0
0 .. 600	15.0 .. 600	5.0 .. 590	5.0

Window function

Meas. range in bar	Lower switch value in bar	Upper switch value in bar	Increment* in bar
0 .. 16	0.2 .. 15.9	0.3 .. 16	0.1
0 .. 40	0.4 .. 39.8	0.6 .. 40	0.2
0 .. 100	1.0 .. 99.5	1.5 .. 100	0.5
0 .. 250	2.0 .. 249.0	3.0 .. 250	1.0
0 .. 400	4.0 .. 398.0	6.0 .. 400	2.0
0 .. 600	10.0 .. 595.0	15.0 .. 600	5.0

* All ranges given in the table are adjustable by the increments shown.

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.0 .. 75.0 seconds
- Choice of display (actual pressure, peak value, switch point 1, switch point 2, display off)
- Display filter for smoothing the display value during pressure pulsations
- Analogue output signal selectable 4 .. 20 mA
- Subsequent correction of zero point in the range $\pm 3\%$ FS possible

Electronic Pressure Switch EDS 300 with Approvals for Shipping

Description:

The EDS 300 is a compact, electronic pressure switch with digital display. The pressure measurement is based on a strain gauge sensor cell in stainless steel. All parts in contact with the medium are in stainless steel, and are welded together. Since no seals are required in the sensor interior, leakage is eliminated.

Two relay switch outputs with N/O function and an additional analogue output signal (4 .. 20 mA) enable the pressure switch to be incorporated into modern controls.

The switch points and the corresponding hystereses can easily be adjusted via the keypad.

For optimum adaptation to a particular application, the instrument has many additional setting parameters, e.g. switching direction of the relays or switching delay times.

Areas of application are pressure or limit monitoring on marine transmissions, diesel engines, pumps and general hydraulic and pneumatic systems.

Approvals:

- American Bureau of Shipping

- Lloyds Register of Shipping

- Det Norske Veritas

- Germanischer Lloyd

- Bureau Veritas

Electronic Pressure Switch EDS 8000

Description:

EDS 8000 is an electronic pressure switch in compact design which is simple to adjust.

Models with one or two transistor switch outputs (PNP or NPN) are available.

The switch points are set using the two keys and a four-digit display. During operation the switch position is indicated by either a red or a green backlight in the display.

For optimum adaptation to a particular application, the instrument has many additional adjustment parameters, e.g. switching delay times, N/O / N/C function of the outputs.

EDS 8000 is available in various pressure ranges between 0 .. 25 bar and 0 .. 600 bar.

The main applications of the EDS 8000 are to indicate pressures and limits in hydraulics and pneumatics, or any application where high switching frequency or consistent switching accuracy would overburden a mechanical pressure switch.

Special features:

- Menu navigation according to VDMA
- 1 or 2 PNP transistor switching outputs
- Robust stainless steel measurement cell
- Accuracy class $\leq \pm 1\%$ FS
- 4-digit display
- Multi-colour switch display
- Protection class IP 67
- Simple operation with key programming
- Many useful additional functions

Technical data:

Input data

Measurement range	25; 40; 100; 250; 400; 600 bar	
Overload pressures	80; 80; 200; 500; 800; 1000 bar	
Burst pressures	200; 200; 500; 1000; 2000; 2000 bar	
Mechanical connection	G $\frac{1}{4}$ A DIN 3852; Form E	
Torque value	20 Nm	
Parts in contact with medium	Mech. conn.:	Stainless steel
	Sensor cell:	Thin-film strain gauge
	Seal:	FPM

Protection class to IEC 60529	IP 67 (when an IP 67 connector is used)

Other data

Supply voltage	9.6 .. 32 V DC
for use acc. to UL spec.	- limited energy - according to 9.3 UL 61010; Class 2; UL 1310/1585; LPS UL 60950
Current consumption	max. 0.535 A total max. 35 mA (with inactive switch output)
Display	4-digit, LED, 7 segment, height of digits 4.5 mm
Life expectancy	> 10 million cycles (0 .. 100 %)
Weight	~ 70 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.

FS (Full Scale) = relative to the complete measurement range

¹⁾ -25 °C with FPM seal, -40 °C on request

²⁾ Environmental conditions according to 1.4.2 UL 61010-1; C22.2 No 61010-1

Setting options:

All the terms and symbols used for setting the EDS 8000 as well as menu structure comply with the specifications of the German Engineering Federation Standard (VDMA 24574-1) for pressure switches. The EDS 8000 is easy and convenient to set up using the two buttons.

Setting ranges for the switch outputs:

Meas. range in bar	Lower limit of RP / FL in bar	Upper limit of SP / FH in bar
0 .. 25	0.25	25.00
0 .. 40	0.4	40.0
0 .. 100	1.0	100.0
0 .. 250	2.5	250.0
0 .. 400	4	400
0 .. 600	6	600

Meas. range in bar	Min. difference betw. RP & SP and FL & FH	Increment* in bar
0 .. 25	0.25	0.05
0 .. 40	0.4	0.1
0 .. 100	1.0	0.2
0 .. 250	2.5	0.5
0 .. 400	4	1
0 .. 600	6	1

* All ranges given in the table are adjustable by the increments shown.

SP = Switching point

RP = Switch-back point

FL = Pressure window lower value

FH = Pressure window upper value

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Display filter for smoothing the display value during pressure pulsations
- Pressure can be displayed in bar, psi, MPa

Pin connections:

Electronic Pressure Switch EDS 601

Description:

The EDS 601 is an electronic two-way pressure switch with display and analogue output. Its digitally adjustable switching points and switching hystereses, make it ideally suited to applications which require frequent change-overs or accurate switch point setting. The variety of setting parameters ensures versatility for use in all control and monitoring tasks in hydraulics, pneumatics, process control and general test and control technology.

Special features:

- Two-channel pressure switch with change-over contacts
- Accuracy $\leq \pm 1\%$ FS
- 4-digit LED display
- Signal output 4 .. 20 mA or 0 .. 10 V selectable
- Can be installed as a pressure gauge or as a front panel mounted unit
- Digitally adjustable parameters
- Optional permanent display of the switching point or of the pressure peak value
- Can be set to display values in any unit of measurement e.g.: kN, kg, psi, ...

Technical data:

Input data	
Measuring ranges	16; 40; 100; 250; 400; 600 bar

Housing material	aluminium, anodised
Weight	~ 300 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.
FS (Full Scale) = relative to the full measuring range

Setting options:

The EDS 601 combines a multitude of functions with easy operation so that frequently-used parameters can be changed quickly.

Switch point settings:

- Switching point relay 1 and 2 (1 % .. 100 % FS)
- Switching hysteresis 1 and 2 (0.5 % .. 99 % FS)

Basic settings:

- Switching direction relay 1 and 2 (pull-in/release)
- Switching delay relay 1 and 2 (0.00 .. 90 seconds)
- Switch-off delay relay 1 and 2 (0.00 .. 90 seconds)
- Primary display (pressure / switch point / peak value)
- Display filter (slow / medium / fast)
- Output signal (current / voltage)

Measuring range setting:

- Number of decimal places (0 .. 3; 4 digits in total)
- Lower measuring range limit (-995 .. 9995)
- Upper measuring range limit (-995 .. 9995)

Calibration options:

- Zero point of internal sensor
- Final value of internal sensor
- Zero point voltage output (approx. 0 .. 3 V)
- Final value voltage output (approx. 3.5 .. 10 V)
- Zero point current output (approx. 0 .. 7 mA)
- Final value current output (approx. 7.5 .. 24 mA)

Electronic Pressure Switch EDS 1700

Description:

With its integrated pressure measurement cell, 4-digit display and 4 switching outputs, the EDS 1700 offers the user all the advantages of a modern electronic pressure switch. 4 switching points and switch-back points can be adjusted very simply and independently of one another using the keypad.

For optimum integration in monitoring systems (e.g. with PLC), an analogue output (4 .. 20 mA or 0 .. 10V) is also available.

The main areas of application of the EDS 1700 are in hydraulics and pneumatics. The instrument is ideal for use where frequent switching cycles (several million), stable switching point accuracy or simple and precise adjustability are required.

Special features:

- Integrated pressure sensor with strain gauge on stainless steel membrane
- Accuracy 0.5 % or 1 % FS
- 4-digit digital display
- Simple operation via key programming
- 4 limit relays, switching points and switch back points can be adjusted independently
- Analogue output signal selectable
- Many useful additional functions
- Optional mounting position (pressure connection on the top/ bottom, keypad and display can be turned through 180°)
- Can be set to display values in any unit of measurement e.g.: kN, kg, psi, ...

Technical data:

Input data

Temperature drift EDS 1700-N	$\leq \pm 0.03$ % FS / °C max. zero point & range

Analogue output

Signal (selectable)	4 .. 20 mA ohmic resistance $\leq 400\Omega$ 0 .. 10 V ohmic resistance $\geq 2\text{ k}\Omega$
---------------------	--

Switch outputs

Type	4 relays with change-over contacts (2 groups, common supply of each group connected)
Switching voltage	0.1 .. 250 V AC / DC
Switching current	0.009 .. 2 A per switch output
Switching capacity	max. 50 W / 400 VA (for inductive load, use varistors)
Switching cycles	20 million at minimum load 1 million at maximum load
Reaction time	approx. 20 ms

Environmental conditions

Compensated temperature range	-10 .. +70 °C
Operating temperature range	-25 .. +60 °C
Storage temperature range	-40 .. +80 °C
Fluid temperature range	-25 .. +80 °C
CE mark	EN 61000-6-1 / 2 / 3 / 4
Vibration resistance to DIN EN 60068-2-6 (0 .. 500 Hz)	$\leq 5\text{ g}$
Shock resistance to DIN EN 60068-2-29 (1 ms)	$\leq 10\text{ g}$
Protection class to IEC 60529	IP 65

Other data

Supply voltage	22 .. 32 V DC
Current consumption	approx. 200 mA
Residual ripple of supply voltage	≤ 10 %
Display	4-digit, LED, 7 segment, red, height of digits 13 mm
Electrical connection	14-pole, terminal block
Housing material	aluminium, anodised
Weight	~ 800 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.
FS (Full Scale) = relative to complete measuring range

Setting options:

The core of the unit is a microprocessor which provides many useful extra functions in addition to normal pressure switch operation. It is possible, for example, to activate switching delay times to prevent fast pressure peaks from triggering an unwanted switching cycle. All settings are made using the keypad.

Setting ranges of the switching points:

- Switching point relay 1 to 4: 1.5 % .. 100 % FS
- Switch-back relay 1 to 4: 1 % .. 99 % FS or alternatively switch-back hysteresis 1 to 4: 1 % .. 99 % FS

Note: **FS (Full Scale)** = relative to the full measurement range

Additional setting options:

- Switching direction of the relays 1 to 4 (N/C or N/O)
- Switch-on delay relays 1 to 4 in the range 0.00 .. 90 seconds
- Switch-off delay relays 1 to 4 in the range 0.00 .. 90 seconds
- Switch-back mode (either switch-back point or switch-back hysteresis)
- Display of the actual pressure, a switching point or of the peak value
- Display filter (slow / medium / fast)
- Display range scale individually adaptable (bar, psi, user-selectable)
- Measurement unit (bar, psi) is displayed
- Analogue output (4 .. 20 mA or 0 .. 10 V)
- Programming disable

Terminal assignment:

Electronic Pressure Switch EDS 4400 Programmable

Description:

The programmable electronic pressure switch in the series EDS 4400 has been specially developed to combine the advantages of a compact, robust and cost-effective device with the benefits of a programmable pressure switch.

The EDS 4400 can be easily programmed using the HPG 3000 programming unit.

Once the programming unit is disconnected from the EDS 4400, the pressure switch retains all the settings. This prevents unauthorised or incorrect adjustment of the settings.

The following parameters can be changed:

- Switching point
- Hysteresis
- Switching direction (N/O / N/C)
- Switching delay times

The EDS 4400 is suitable for high-pressure applications (starting at 40 bar) and has a pressure measurement cell with thin-film strain gauge on a stainless steel membrane. In contrast to pressure switches which are factory-set according to customer requirements and are not field-adjustable, the programmable EDS 4400 is highly versatile and replaces a wide range of models. This is advantageous in respect of stock management.

Special features:

- Option of 1 or 2 switching outputs
- Option of PNP or NPN switching outputs
- High switching output capacity
- Accuracy $\leq \pm 1\%$ FS
- Flexible user-programming
- Compact and robust design
- Also available in ATEX version for potentially explosive locations

Technical data:

Electronic Pressure Switch EDS 820 with IO-Link Interface

Description:

EDS 820 with IO-Link communication interface is a compact electronic pressure switch for relative pressure measurement in the high-pressure range.

The device has two PNP transistor switch outputs, one of which can serve as the IO communication output.

Compared with the standard version, the IO-Link interface enables bidirectional communication between the device and the control.

Parameterisation and cyclical transmission of process and service data is therefore possible.

The pressure switch series EDS 820 with communication interface IO-Link according to specification V1.1 has been specially designed for connecting sensors in automation systems. Typical fields of application are machine tools, handling and assembly automation, intralogistics or the packaging industry.

Special features:

- IO-Link interface or PNP transistor switch output
- 1 additional PNP transistor switching output
- Accuracy $\leq \pm 1.0\%$ FS
- Highly robust sensor cell
- Status LED display for active switch outputs

Technical data:

Input data	
Measuring ranges	25; 40; 60; 100; 250; 400; 600 bar
Overload range	50; 80; 120; 200; 500; 800; 1000 bar
Burst pressures	100; 200; 300; 500; 1250; 2000; 2000 bar
Mechanical connection	G $\frac{1}{4}$ A DIN 3852 with 0.5 mm orifice
Torque value	20 Nm
Parts in contact with medium	Mech. connection: Stainless steel Seal: FPM

Electronic Pressure Transmitter HDA 4700 with Flush Membrane

Description:

Pressure transmitter HDA 4700 with a flush membrane was designed specifically for applications in which a standard pressure connection could become blocked, clogged or frozen by the particular medium used. Further applications include processes where the medium changes regularly and any residues could cause mixing or contamination of the media.

Like the standard model, the HDA 4700 with flush membrane has a stainless steel measurement cell with a thin film strain gauge for relative pressure measurement in the high pressure range.

The pressure connection is achieved with a fully-sealed stainless steel front membrane filled internally with a pressure transfer fluid. The process pressure is transmitted hydrostatically to the measurement cell via the pressure transfer fluid.

The 4 .. 20 mA or 0 .. 10 V enable connection to all HYDAC measurement and control devices as well as connection to standard evaluation systems (e.g PLC controls).

Special features:

- Pressure connection has a flush membrane
- Accuracy $\leq 0.25\%$ FS typ.
- Highly robust sensor cell
- Very small temperature error
- Excellent EMC characteristics
- Small, compact design

Electronic Pressure Transmitter HDA 4400 with Flush Membrane

Description:

Pressure transmitter HDA 4400 with a flush membrane was designed specifically for applications in which a standard pressure connection could become blocked, clogged or frozen by the particular medium used. Further applications include processes where the medium changes frequently and any residues could cause mixing or contamination of the media.

Like the standard model, the HDA 4400 with flush membrane has a stainless steel measurement cell with a thin film strain gauge for relative pressure measurement in the high pressure range.

The pressure connection is achieved with a fully-sealed stainless steel front membrane filled internally with a pressure transfer fluid. The process pressure is transmitted hydrostatically to the measurement cell via the pressure transfer fluid.

The output signals 4 .. 20 mA or 0 .. 10 V enable connection to all HYDAC measurement and control devices as well as connection to standard evaluation systems (e.g PLC controls).

Special features:

- Pressure connection has a flush membrane
- Accuracy $\leq 0.5\%$ FS typ.
- Highly robust sensor cell
- Very small temperature error
- Excellent EMC characteristics
- Small, compact design

Electronic Pressure Transmitter HDA 4300 with Flush Membrane

Description:

Pressure transmitter HDA 4300 with a flush membrane was designed specifically for applications in which a standard pressure connection could become blocked, clogged or frozen by the particular medium used. Further applications include processes where the medium changes regularly and any residues could cause mixing or contamination of the media.

Like the standard model, the HDA 4300 with a flush membrane has a ceramic measurement cell with a thick film strain gauge for relative pressure measurement in the low pressure range.

The pressure connection is achieved with a fully-sealed stainless steel front membrane filled internally with a pressure transfer fluid. The process pressure is transmitted hydrostatically to the measurement cell via the pressure transfer fluid.

The 4 .. 20 mA or 0 .. 10 V enable connection to all HYDAC measurement and control devices as well as connection to standard evaluation systems (e.g PLC controls).

Special features:

- Pressure connection has a flush membrane
- Accuracy ≤ 0.5 % FS typ.
- Highly robust sensor cell
- Very small temperature error
- Excellent EMC characteristics
- Very compact design

Electronic Pressure Switch EDS 3400 with Flush Membrane

Description:

The electronic pressure switch EDS 3400 with a flush membrane was designed specifically for applications in which a standard pressure connection could become blocked, clogged or frozen by the particular medium used. Further applications include processes where the medium changes frequently and any residues could cause mixing or contamination of the media.

Like the standard model, the EDS 3400 with flush membrane has a stainless steel measurement cell with a thin film strain gauge for relative pressure measurement in the high pressure range.

The pressure connection is achieved with a fully-sealed stainless steel front membrane filled internally with a pressure transfer fluid. The process pressure is transmitted hydrostatically to the measurement cell via the pressure transfer fluid.

Depending on the type, the instrument can have up to 2 switching outputs and a switchable analogue output (4 .. 20 mA or 0 .. 10 V).

Special features:

- Pressure connection has a flush membrane
- 1 or 2 PNP transistor switching outputs, up to 1.2 A load per output
- Accuracy $\leq 1\%$ FS
- Optional analogue output selectable (4 .. 20 mA / 0 .. 10 V)
- 4-digit digital display
- Rotation in two planes (axes) for optimum alignment
- Measured value can be displayed in bar, psi or MPa
- Simple operation with key programming
- Switching points and switch-back hystereses can be adjusted independently
- Many useful additional functions
- Option of Desina[®]-compliant pin configuration with diagnostic function

Setting options:

All settings offered by the EDS 3400 are grouped in 2 easy-to-navigate menus.

In order to prevent unauthorised adjustment of the device, a programming lock can be set.

Setting ranges for the switch outputs:

Switching point function

Meas. range in bar	Switch point in bar	Hysteresis in bar	Increment* in bar
0 .. 40	0.6 .. 40	0.2 .. 39.6	0.1
0 .. 100	1.6 .. 100	0.6 .. 99.0	0.2
0 .. 250	4.0 .. 250	1.5 .. 247.5	0.5
0 .. 400	6.0 .. 400	2.0 .. 396	1
0 .. 600	9.0 .. 600	3.0 .. 594	1

Window function

Meas. range in bar	Lower switch value in bar	Upper switch value in bar	Increment* in bar
0 .. 40	0.6 .. 39.2	0.9 .. 39.6	0.1
0 .. 100	1.6 .. 98.2	2.4 .. 99	0.2
0 .. 250	4.0 .. 245.5	6.0 .. 247.5	0.5
0 .. 400	6.0 .. 392	9.0 .. 396	1
0 .. 600	9.0 .. 589	14 .. 594	1

* All ranges given in the table are adjustable by the increments shown.

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Choice of display (current pressure, peak value, switch point 1, switch point 2, display off)
- Display filter for smoothing the display value during pressure pulsations
- Analogue output signal selectable 4 .. 20 mA or 0 .. 10 V
- Pressure can be displayed in the measurement units bar, psi, MPa. The scaling can also be adapted to indicate force, weight, etc.

EDS 3400 for self diagnostics:

The DESINA®-compliant pressure switch has been specially developed for customers in the machine tool and mechanical engineering sectors and complies with the DESINA® specification. A diagnostic signal enables errors to be detected and an "ERROR" message also appears in the display. The electrical connection is a round 5-pole M12x1 to IP 67 in accordance with DESINA® requirements.

Electronic Pressure Switch EDS 3300 with Flush Membrane

Description:

The electronic pressure switch EDS 3300 with a flush membrane was designed specifically for applications in which a standard pressure connection could become blocked, clogged or frozen by the particular medium used. Further applications include processes where the medium changes frequently and any residues could cause mixing or contamination of the media.

Like the standard model, the EDS 3300 with flush membrane has a ceramic measurement cell with a thick film strain gauge for relative pressure measurement in a low pressure range.

The pressure connection is achieved with a fully-sealed stainless steel front membrane filled internally with a pressure transfer fluid. The process pressure is transmitted hydrostatically to the measurement cell via the pressure transfer fluid.

Depending on the type, the instrument can have up to 2 switching outputs and a switchable analogue output (4 .. 20 mA or 0 .. 10 V).

Special features:

- Pressure connection has a flush membrane
- 1 or 2 PNP transistor switching outputs, up to 1.2 A load per output
- Accuracy $\leq 1\%$ FS
- Optional analogue output selectable (4 .. 20 mA / 0 .. 10 V)
- 4-digit digital display
- Rotation in two planes (axes) for optimum alignment
- Measured value can be displayed in bar, psi or MPa
- Simple operation with key programming
- Switching points and switch-back hystereses can be adjusted independently
- Many useful additional functions
- Optional Desina[®]-compliant pin configuration with diagnostic function

0 .. 6	0.09 .. 6	0.3 .. 5.94	0.01
0 .. 10	0.16 .. 10	0.06 .. 9.9	0.02
0 .. 16	0.25 .. 16	0.1 .. 15.8	0.05

Window function

Meas. range in bar	Lower switch value in bar	Upper switch value in bar	Increment* in bar
-1 .. 1	-0.97 .. 0.96	-0.95 .. 0.98	0.01
0 .. 1	0.016 .. 0.982	0.024 .. 0.99	0.002
0 .. 2.5	0.04 .. 2.455	0.06 .. 2.475	0.005
0 .. 6	0.09 .. 5.89	0.14 .. 5.94	0.01
0 .. 10	0.16 .. 9.82	0.24 .. 9.9	0.02
0 .. 16	0.25 .. 15.7	0.4 .. 15.8	0.05

* All ranges given in the table are adjustable by the increments shown.

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Choice of display (actual pressure, peak value, switch point 1, switch point 2, display off)
- Display filter for smoothing the display value during pressure pulsations
- Analogue output signal selectable 4 .. 20 mA or 0 .. 10 V
- Pressure can be displayed in measurement units bar, psi or MPa. The scaling can also be adapted to indicate force, weight, etc.

EDS 3300 for self diagnostics:

The DESINA®-compliant pressure switch has been specially developed for customers in the machine tool and mechanical engineering sectors and complies with the DESINA® specification. A diagnostic signal enables errors to be detected and an "ERROR" message also appears in the display. The electrical connection is a round 5-pole M12x1 to IP 67 in accordance with DESINA® requirements.

Electronic Temperature Transmitter ETS 7200

Description:

The ETS 7200 is an electronic temperature transmitter which, because of its compact design, is particularly suited to measuring temperature in hydraulic applications in the industrial and mobile sectors. Based on a silicon semiconductor device and corresponding evaluation electronics, the temperature sensor is designed to measure temperatures in the range -25°C to +100°C.

The sensor has various analogue output signals as standard, e.g. 4 .. 20 mA or 0 ... 10V to enable integration into modern control systems through an M12x1 connector.

The pressure resistance up to 600 bar and excellent EMC characteristics make the ETS 7200 ideal for use in harsh conditions.

Special features:

- Accuracy $\leq \pm 2\%$ FS
- Ideal for OEM applications
- Very compact design
- Excellent EMC characteristics
- Long-term stability
- Standard protection class IP 67

Electronic Temperature Switch ETS 3200 Pressure Resistant for Inline Mounting

Description:

The ETS 3200 is a compact electronic temperature switch with a 4-digit display.

Pressure resistant to 600 bar, this model has an integrated 18 mm temperature probe and can be screwed directly inline or into a hydraulic block.

Different output models with one or two switching outputs, optionally with an additional analogue output signal, offer a variety of application possibilities. The switching points and the associated hystereses can be adjusted very quickly and easily using the keypad.

For optimum adaptation to the particular application, the unit has many additional adjustment parameters (e.g. switching delay times, N/C / N/O function, etc.).

Special features:

- 2 switching outputs, up to 1.2 A load per output
- Optional analogue output signal selectable (4 .. 20 mA / 0 .. 10 V)
- 4-digit display
- Optimum alignment - display can be rotated in two planes (axes)
- Switching / switch-back points and many useful additional functions can be set using the keypad
- Display of temperature and unit of measurement in °C or °F

Technical data:

Input data	
Measuring range	-25 .. 100 °C (-13 ... 212 °F)
Probe length	18 mm
Pressure resistance	600 bar
Mechanical connection	G1/2 A DIN 3852
Torque value	45 Nm
Parts in contact with medium	Mech. conn.: Stainless steel Seal: FPM
Output data	
Accuracy (display, analogue output)	≤ ± 1.0 °C (≤ ± 2.0 °F)
Temperature drift (environment)	≤ ± 0.015 % FS / °C max. zero point ≤ ± 0.015 % FS / °C max. range
Analogue output (optional)	
Signal	selectable: 4 .. 20 mA ohmic resist. max. 500 Ω 0 .. 10 V ohmic resistance min. 1 kΩ corresponds in each case to -25 .. +100 °C
Switch outputs	
Type	PNP transistor switching outputs
Switching current	max. 1.2 A per output
Switching cycles	> 100 million
Rise time to DIN EN 60751	t ₅₀ : 3 s t ₉₀ : 9 s
Environmental conditions	
Ambient temperature range	-25 .. +80 °C (-25 ... +60°C acc. to UL spec.)
Storage temperature range	-40 .. +80 °C
Fluid temperature range ¹⁾	-40 .. +100 °C / -25 .. +100 °C
CE mark	EN 61000-6-1 / 2 / 3 / 4
eURus-mark ²⁾	Certificate No. E318391
Vibration resistance to DIN EN 60068-2-6 (0 .. 500 Hz)	≤ 10 g
Shock resistance to DIN EN 60068-2-29 (11 ms)	≤ 50 g
Protection class to IEC 60529	IP 67
Other data	
Supply voltage	9 .. 35 V DC without analogue output 18 .. 35 V DC with analogue output for use acc. to UL spec. - limited energy - according to 9.3 UL 61010; Class 2; UL 1310/1585; LPS UL 60950
Current consumption	max. 2.455 A total max. 35 mA with inactive switching outputs max. 55 mA with inactive switching outputs and analogue output
Residual ripple of supply voltage	≤ 5 %
Display	4-digit, LED, 7 segment, red, height of digits 7 mm
Weight	~ 135 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.

FS (Full Scale) = relative to complete measuring range

¹⁾ -25 °C with FPM seal, -40 °C on request

²⁾ Environmental conditions according to 1.4.2 UL 61010-1; C22.2 No 61010-1

Setting options:

All the settings available on the ETS 3200 are combined in 2 easy-to-navigate menus. To prevent unauthorised adjustment of the instrument, a programming lock can be set.

Setting ranges of the switching points and switch-back hystereses:

Switching point function

Unit	Switching point	Hysteresis	Increment*
°C	-23.0 .. 100.0	1.0 .. 123.5	0.5
°F	-9 .. 212	2 .. 222	1

Window function

Unit	Lower switch value	Upper switch value	Increment*
°C	-23.0 .. 97.5	-22.0 .. 98.5	0.5
°F	-9 .. 208	-7 .. 209	1

* All ranges given in the table are adjustable by the increments shown.

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Choice of display (actual temperature, peak temperature, switching point 1, switching point 2, display off)

Pin connections:

M12x1, 4 pole

Pin	ETS 3226-2	ETS 3226-3

Electronic Temperature Switch ETS 3200 – Pressure-Resistant for Inline Installation with IO-Link Interface

Description:

The ETS 3200 with IO-Link communication interface is a compact, electronic temperature switch with 4-digit display. Pressure-resistant up to 600 bar with an integrated 18 mm temperature probe, this model can be mounted directly inline or on the hydraulic block.

The device has a switching output and additional output that can be configured as switching or analogue (4 .. 20 mA or 0 .. 10 V).

Compared with the standard version, the IO-Link interface enables bidirectional communication between the device and the control. Parameterisation and cyclical transmission of process and service data is therefore possible.

The temperature switch series ETS 3200 with communication interface IO-Link according to specification V1.1 was specially designed to connect sensors in automation systems.

Typical fields of application are machine tools, handling and assembly automation, intralogistics or the packaging industry.

Special features:

- IO-Link interface
- 1 PNP transistor switching output
- Additional signal output can be configured as PNP transistor switching output or analogue output
- 4-digit display
- Display can be rotated in two axes for optimal alignment

Technical data:

Input data	
Measuring range	-25 .. 100 °C (-13 .. 212 °F)
Sensor length	18 mm
Pressure resistance	600 bar
Hydraulic connection	G1/2 A DIN 3852
Torque value	45 Nm
Parts in contact with medium	Mech. connection: Stainless steel Seal: FPM
Output data	
Output signals	Output 1: PNP transistor switching output Output 2: can be configured as PNP transistor switching output or analogue output
Accuracy (display, analogue output)	≤ ± 1.0 °C (≤ ± 2.0 °F)
Temperature drift (environment)	≤ ± 0.015 % FS / °C max. zero point ≤ ± 0.015 % FS / °C max. range
Analogue output	
Signal	selectable: 4 .. 20 mA load resist. ≤ 500 Ω 0 .. 10 V load resist. min. 1 kΩ corresp. in each case to -25 .. +100 °C
Switch outputs	
Type	PNP transistor switching output
Switching current	max. 250 mA per output
Switching cycles	> 100 million
Rise time to DIN EN 60751	t _{50%} : 3 s t _{90%} : 9 s
Parameterisation	
	Via IO-Link interface, with HYDAC programming device HPG 3000 or push-buttons on the ETS 3200
Environmental conditions	
Ambient temperature range	-25 .. +80 °C
Storage temperature range	-40 .. +80 °C
Fluid temperature range ¹⁾	-40 .. +100°C / -25 .. +100°C
CE mark	EN 61000-6-1 / -2 / -3 / -4
Vibration resistance according to DIN EN 60068-2-6 (0 .. 500 Hz)	≤ 10 g
Shock resistance according to DIN EN 60068-2-29 (11 ms)	≤ 50 g
Protection class to IEC 60529	IP 67
Other data	
Supply voltage	9 .. 35 V DC (without analogue output) 18 .. 35 V DC (with analogue output)
Current consumption	≤ 0.535 A with active switching outputs ≤ 35 mA with inactive switching outputs ≤ 55 mA with inactive switching output and analogue output
Residual ripple of supply voltage	≤ 5 %
Display	4-digit, LED, 7-segment, red, height of digits 7 mm
Weight (complete unit including probe)	~ 135 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.

FS (Full Scale) = relative to complete measuring range

¹⁾ -25 °C with FPM seal, -40 °C on request

Display	4-digit, LED, 7-segment, red, height of digits 7 mm
Weight (complete unit including probe)	~ 150 g (probe length 100 mm) ~ 185 g (probe length 250 mm) ~ 210 g (probe length 350 mm)

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.

FS (Full Scale) = relative to the complete measurement range

¹⁾ -25 °C with FPM seal, -40 °C on request

²⁾ Environmental conditions according to 1.4.2 UL 61010-1; C22.2 No 61010-1

Setting options:

All terms and symbols used for setting the ETS 3200 as well as the menu structure comply with the specifications in the VDMA Standard (VDMA 24574-2) for temperature switches.
The ETS 3200 can easily be adjusted via three push-buttons.

Setting ranges for the switching outputs:

Measuring range	Lower limit of RP / FL	Upper limit of SP / FH
-25 .. +100 °C	-23.8 °C	100.0 °C
-13 .. +212 °F	-11 °F	212 °F

Measuring range	Min. difference betw. RP and SP & FL and FH	Increment*
-25 .. +100 °C	1.2 °C	0.2 °C
-13 .. +212 °F	2 °F	1 °F

* All ranges given in the table are adjustable by the increments shown.

SP = switch point

RP = switch-back point

FL = temperature window lower value

FH = temperature window upper value

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Choice of display (current temperature, peak temperature, switching point 1, switching point 2, display off)

Electronic Temperature Switch ETS 3200 for Tank Installation with IO-Link Interface

Description:

The ETS 3200 with IO-Link communication interface is a compact, electronic temperature switch with 4-digit display.

With its integrated temperature probe, the ETS 3200 is particularly suitable for direct tank installation and is available in various lengths.

The instrument has a switching output and additional output that can be configured as switching or analogue (4 .. 20 mA or 0 .. 10 V).

Compared with the standard version, the IO-Link interface enables bidirectional communication between the device and the control. Parameterisation and cyclical transmission of process and service data is therefore possible.

The temperature switch series ETS 3200 with communication interface IO-Link according to specification V1.1 was specially designed to connect sensors in automation systems. Typical fields of application are machine tools, handling and assembly automation, intralogistics or the packaging industry.

Special features:

- IO-Link interface
- 1 PNP transistor switching output
- Additional signal output, can be configured as PNP transistor switching output or analogue output
- 4-digit display
- Display can be rotated in two axes for optimum alignment

Technical data:

Input data	
Measuring range	-25 .. 100 °C (-13 .. 212 °F)
Probe length	100; 250; 350 mm
Pressure resistance	50 bar
Hydraulic connection	G1/2 A DIN 3852
Torque value	45 Nm
Parts in contact with medium	Mech. connection: Stainless steel Seal: FPM
Output data	
Output signals	Output 1: PNP transistor switching output Output 2: can be configured as PNP transistor switching output or analogue output
Accuracy (display, analogue output)	≤ ± 1.0 °C (≤ ± 2.0 °F)
Temperature drift (environment)	≤ ± 0.015 % FS / °C max. zero point ≤ ± 0.015 % FS / °C max. range
Analogue output	
Signal	selectable: 4 .. 20 mA load ≤ 500 Ω 0 .. 10 V ohmic resist. min. 1 kΩ corresp. in each case to -25 .. +100 °C
Switch outputs	
Type	PNP transistor switching output
Switching current	max. 250 mA per output
Switching cycles	> 100 million
Rise time to DIN EN 60751	t ₅₀ : 8 s t ₉₀ : 15 s
Parameterisation	
	Via IO-Link interface, with HYDAC programming device HPG 3000 or push buttons on the ETS 3200
Environmental conditions	
Ambient temperature range	-25 .. +80 °C
Storage temperature range	-40 .. +80 °C
Fluid temperature range ¹⁾	-40 .. +100°C / -25°C .. 100 °C

Electronic Temperature Switch ETS 3800 for Separate Temperature Probe

Description:

The ETS 3800 is a compact electronic temperature switch with a 4-digit display.

The version for a separate temperature probe has a measuring range of -30 ... +150°C and is used primarily with the TFP 100 temperature probe which was specially developed for tank installation.

It is also possible, however, to evaluate commonly-available PT 100 temperature probes.

Different output versions with one or two switching outputs, and with the possible option of an additional analogue output signal, offer a variety of application possibilities.

The switching points and the associated hystereses can be adjusted very quickly and easily using the keypad.

For optimum adaptation to the particular application, the instrument has many additional adjustment parameters (e.g. switching delay times, N/C / N/O function, etc.).

Special features:

- 2 switching outputs, up to 1.2 A load per output
- Optional analogue output signal selectable (4 .. 20 mA / 0 .. 10 V)
- 4-digit digital display
- Optimum alignment - display can be rotated in two planes (axes)
- Switching / switch-back points and many useful additional functions can be set using keypad
- Display of temperature and unit of measurement in °C or °F

Technical data:

Input data	
Measuring range ¹⁾	-30 .. +150 °C (-22 .. 302 °F)
Connection, separate temperature probe	Female cable connection M12x1, 4 pole
Output data	
Accuracy (display, analogue output)	± 1.0 °C (+ PT100 error)
Temperature drift (environment)	≤ ± 0.015 % FS / °C max. zero point ≤ ± 0.015 % FS / °C max. range
Analogue output (optional)	
Signal	selectable: 4 .. 20 mA load resist. max. 500 Ω 0 .. 10 V load resistance min. 1 kΩ corresponds in each case to -30 .. +150 °C
Switch outputs	
Type	PNP transistor switching outputs
Switching current	max. 1.2 A per output
Switching cycles	> 100 million
Environmental conditions	
Ambient temperature range	-25 .. +80 °C (-25 .. +60 °C acc. to UL spec.)
Storage temperature range	-40 .. +80 °C
CE mark	EN 61000-6-1 / 2 / 3 / 4
UL mark ²⁾	Certificate No. E318391
Vibration resistance to DIN EN 60068-2-6 (0 .. 500 Hz)	≤ 10 g
Shock resistance to DIN EN 60068-2-29 (11 ms)	≤ 50 g
Protection class to IEC 60529	IP 67
Other data	
Supply voltage	9 .. 35 V DC without analogue output 18 .. 35 V DC with analogue output for use acc. to UL spec. - limited energy - according to 9.3 UL 61010; Class 2; UL 1310/1585; LPS UL 60950
Current consumption	max. 2.455 A total max. 35 mA with inactive switch outputs max. 55 mA with inactive switch outputs and analogue output
Residual ripple of supply voltage	≤ 5 %
Display	4-digit, LED, 7 segment, red, height of digits 7 mm
Weight	~ 87 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.

FS (Full Scale) = relative to complete measuring range

¹⁾ Depending on the temperature range of the connected temperature sensor, the indication range of the ETS 3800 may be reduced.

²⁾ Environmental conditions according to 1.4.2 UL 61010-1; C22.2 No 61010-1

Setting options:

All the settings available on the ETS 3800 are combined in 2 easy-to-navigate menus. To prevent unauthorised adjustment of the instrument, a programming lock can be set.

Setting ranges of the switching points and switch-back hystereses:

Switching point function

Unit	Switching point	Hysteresis	Increment*
°C	-27.0 .. 150.0	1.0 .. 178.0	0.5
°F	-17 .. 302	2 .. 320	1

Window function

Unit	Lower switch value	Upper switch value	Increment*
°C	-27.0 .. 146.5	-25.5 .. 148.0	0.5
°F	-17 .. 296	-14 .. 298	1

* All ranges given in the table are adjustable by the increments shown.

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Choice of display (actual temperature, peak temperature, switching point 1, switching point 2, display off)

Pin connections:

Electronic Temperature Switch ETS 320 Pressure-Resistant for Inline Installation

Description:

The ETS 320 is a compact electronic temperature switch with a 3-digit display.

Pressure-resistant to 600 bar with an integrated 18 mm temperature probe, this model can be installed directly inline or on the hydraulic block and has a measuring range of -25 .. +100 °C.

Different output models with one or two switching outputs, and with the possible option of an additional analogue output signal of 4 .. 20 mA offer a variety of application opportunities.

The switching points and the associated hystereses can be adjusted very quickly and easily using the keypad.

For optimum adaptation to the particular application, the unit has many additional adjustment parameters (e.g. switching delay times, N/C / N/O function, etc.).

Special features:

- Compact temperature switch with integral temperature probe
- 2 transistor switching outputs, up to 1.2 A load per output
- Optional analogue output signal 4 .. 20 mA
- 3-digit display
- Switching point or window function
- Switching / switch-back points and many useful additional functions can be set using the keypad

Technical data:

Input data	
Measuring range	-25 .. 100 °C (-13 .. 212 °F)
Probe length	18 mm
Pressure resistance	600 bar
Mechanical connection	G1/2 A DIN 3852
Torque value	45 Nm
Parts in contact with medium	Mech. conn.: Stainless steel Seal: FPM
Output data	
Accuracy (display, analogue output)	≤ ± 1.0 °C (≤ ± 2.0 °F)
Temperature drift (environment)	≤ ± 0.015 % FS / °C max. zero point ≤ ± 0.015 % FS / °C max. range
Analogue output (optional)	
Signal	4 .. 20 mA load resistance max. 400 Ω corresponds to -25 .. +100 °C
Switch outputs	
Type	PNP transistor switching outputs
Switching current	max. 1.2 A per output
Switching cycles	> 100 million
Rise time to DIN EN 60751	t ₅₀ : 3 s t ₉₀ : 9 s
Environmental conditions	
Ambient temperature range	-25 .. +80 °C
Storage temperature range	-40 .. +80 °C
Fluid temperature range ¹⁾ (for the probe)	-40 .. +100 °C / -25 .. +100 °C
CE mark	EN 61000-6-1 / 2 / 3 / 4
Vibration resistance to DIN EN 60068-2-6 (0 .. 500 Hz)	≤ 10 g
Shock resistance to DIN EN 60068-2-29 (1 ms)	≤ 50 g
Protection class to IEC 60529	IP 65
Other data	
Supply voltage	20 .. 32 V DC
Current consumption	approx. 100 mA without switch output
Residual ripple of supply voltage	≤ 5 %
Display	3-digit, LED, 7 segment, red, height of digits 9.2 mm
Weight	~ 300 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.

FS (Full Scale) = relative to complete measuring range

¹⁾ -25 °C with FPM seal, -40 °C on request

Setting options:

All the settings available on the ETS 320 are combined in 2 easy-to-navigate menus. To prevent unauthorised adjustment of the instrument, a programming lock can be set.

Setting ranges of the switching points and switch-back hystereses:

Switching point function

Unit	Switching point	Hysteresis	Increment*
°C	-22.0 .. 100.0	1.0 .. 178.0	1.0
°F	-10.0 .. 212.0	2.0 .. 320.0	2.0

Window function

Unit	Lower switch value	Upper switch value	Increment*
°C	-23.0 .. 99.0	-22.0 .. 100.0	1.0
°F	-12.0 .. 210.0	-10.0 .. 212.0	2.0

* All ranges given in the table are adjustable by the increments shown.

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O)
- Switch-on and switch-off delay adjustable from 0 .. 750 seconds
- Choice of display (actual temperature, peak temperature, switching point 1, switching point 2, display off)

Electronic Temperature Switch ETS 380 for Separate Temperature Probe

Description:

The ETS 380 is a compact electronic temperature switch with a 3-digit display.

The version for a separate temperature probe has a measuring range of -30 .. +150 °C and is used primarily with the TFP 100 temperature probe which was specially developed for tank installation.

It is also possible, however, to evaluate commonly available PT 100 temperature probes. Different output models with one or two switching outputs, and with the possible option of an additional analogue output signal of 4 .. 20 mA open up a multitude of application opportunities.

The switching points and the associated hystereses can be adjusted very quickly and easily using the keypad.

For optimum adaptation to the particular application, the instrument has many additional adjustment parameters (e.g. switching delay times, N/C / N/O function, etc.).

Special features:

- 2 transistor switching outputs, up to 1.2 A load per output
- Optional analogue output signal 4 .. 20 mA
- 3-digit display
- Switching point or window function
- Switching / switch-back points and many useful additional functions can be set using the keypad

Technical data:

Electronic Temperature Switch ETS 1700

Description:

The electronic temperature switch ETS 1700 is used mainly together with the temperature probe TFP 100, which was specially developed for tank mounting.

The 4-digit display can indicate the actual temperature, one of the switching points or the maximum temperature value.

The maximum temperature indicates the highest temperature which has occurred since the unit was switched on or was last reset.

The 4 switching outputs can be used to control heating and cooling processes in hydraulic systems, for example. Four switching and switch-back points which are independent of each other can be adjusted very simply via the keypad.

An analogue output (4 .. 20 mA or 0 .. 10 V) is also available for integration into monitoring systems (e.g. with PLC).

Special features:

- 4-digit display
- Simple operation due to key programming
- 4 limit relays, switching points and switch back points can be adjusted independently
- Optional analogue output signal (4 .. 20 mA or 0 .. 10 V)
- Many useful additional functions
- Optional mounting position (sensor connection on the top/ bottom, keypad and display can be turned through 180°)

Technical data:

Input data	
Measuring range ¹⁾	0 .. +100 °C, (+32 .. 212 °F)
Output data	
Accuracy (display, analogue output)	≤ ± 1.0 °C (≤ ± 2.0 °F)
Repeatability	≤ ± 0.25 % FS
Temperature drift (environment)	≤ ± 0.03 % FS / °C max. zero point ≤ ± 0.03 % FS / °C max. range
Analogue output (optional)	
Signal	selectable: 4 .. 20 mA load resistance max. 400 Ω 0 .. 10 V load resistance min. 2 kΩ corresponds in each case to 0 .. +100 °C
Switch outputs	
Type	4 relays with change-over contacts in 2 groups (common supply of each group connected)
Switching voltage	0.1 .. 250 V AC / DC
Switching current	0.009 .. 2 A per output
Switching capacity	400 VA, 50 W (for inductive load, use varistors)
Switching cycles	> 20 million at minimum load > 1 million at maximum load
Environmental conditions	
Ambient temperature range	-25 .. +60 °C
Storage temperature range	-40 .. +80 °C
CE mark	EN 61000-6-1 / 2 / 3 / 4
Vibration resistance to DIN EN 60068-2-6 (0 .. 500 Hz)	≤ 5 g
Shock resistance to DIN EN 60068-2-29 (1 ms)	≤ 10 g
Protection class to IEC 60529	IP 65
Other data	
Supply voltage	22 .. 32 V DC
Current consumption	approx. 200 mA
Residual ripple of supply voltage	≤ 10 %
Display	4-digit, LED, 7 segment, red, height of digits 13 mm
Weight	~ 800 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.

¹⁾ Depending on the temperature range of the connected temperature sensor, the indication range of the ETS 1700 may be reduced.

FS (Full Scale) = relative to complete measuring range

Setting options:

The microprocessor integrated into the ETS 1700 enables many useful extra functions in addition to the switching functions, when compared with a normal mechanical temperature switch.

It is possible, for example, to activate switching delay times or to change the relay switching direction.

All settings are made via the keypad.

Setting ranges of the switching points and switch-back hystereses:

- Switching point relays 1 to 4: 1.5 .. 100 % of the measuring range
- Switching point relays 1 to 4: 1 .. 99 % of the measuring range or alternatively
- Switch-back hystereses 1 to 4: 1.. 99 % of the measuring range

Additional functions:

- Switching direction of the relays 1 to 4 (N/C or N/O function)
- Switch-on delay relays 1 to 4 in the range from 0.0 .. 900.0 seconds
- Switch-off delay relays 1 to 4 in the range from 0.0 .. 900.0 seconds
- Switch-back mode (alternatively switch-back point or switch-back hysteresis)
- Display of the actual temperature, a switching point or of the peak value
- Display range individually selectable in °C or °F
- Measurement unit (°C, °F) is displayed
- Analogue output (4 .. 20 mA or 0 .. 10 V)
- Programming lock

For applications or operating conditions not described, please contact the relevant technical department.

Subject to technical modifications.

Temperature Probe TFP 100

Description:

The TFP 100 temperature probe was developed primarily for tank installation. The PT 100 precision resistor in 4-conductor design can be connected directly to HYDAC temperature switches ETS 3800, ETS 380 and ETS 1700.

The standardised electrical connection also means that other evaluation or control systems (e.g. PLC) can easily be connected.

For adaptation to different applications and fluids, a nickel-plated brass installation sleeve which is pressure resistant up to 10 bar is available as an accessory.

Special features:

- Measurement circuit configured as four-conductor circuit
- Simple to install
- For universal application

Pin connections:

SENSORS FOR DISTANCE AND POSITION

Using various measuring techniques, HYDAC offers different distance and position sensors for a wide array of mobile and stationary applications. Linear position sensors operate on the physical principle of magnetostriction.

This measuring principle determines with high accuracy the position, distance and/or speed signal, if required, and is based on elapsed time measurement.

Utilizing this non-contact and wear-free measuring technique, HYDAC offers different versions in a pressure-resistant stainless steel housing for part or full integration in hydraulic cylinders.

Linear position transducers for mobile applications:

HLT 1000-R2	131

Linear position transducers for stationary applications:

	Page
HLT 2100-R1	133
HLT 2500-F1	137
HLT 2500-L2	141

The ultrasonic distance sensor is a non-contact, highly compact sensor for measuring the distance to fluids and objects.

By definition, its functional principle (measurement of sound transmission time) means that it operates with an extremely high resolution and measurement rate.

Electronic ultrasonic distance sensor:

	Page
HLS 528	145

Further distance and position sensors for special applications can be found in the Chapter "OEM Products for High Volume Production".

Linear Position Transducer HLT 1000-R2

Description:

The sensor works on the principle of magnetostriction.

This measuring principle determines with high accuracy the position, distance and/or speed and is based on elapsed time measurement.

On the basis of this non-contact and wear-free measurement system, HYDAC offers a version in pressure-resistant stainless steel housing for complete integration in hydraulic cylinders.

The different output signals (analogue/CANopen) facilitate the connection of all HYDAC ELECTRONIC GMBH measurement and control devices as well as connection to standard evaluation systems (e.g. also to PLC controls). The main areas of application are in mobile hydraulics.

Special features:

- High accuracy, e.g. $\leq \pm 0.05\%$ FS for CANopen
- Very robust housing
- High resistance to shock and vibration
- Excellent EMC characteristics
- Non-contact and wear-free
- Persuasive price / performance ratio

Linear Position Transducer Rod Version HLT 2100-R1

Description:

The sensor works on the principle of magnetostriction.

The measuring principle determines with high accuracy the position, distance and/or speed, and is based on elapsed time measurement.

Utilizing this non-contact and wear-free measuring system, HYDAC offers a version in a pressure-resistant, tubular casing in stainless steel, for direct installation into hydraulic cylinders.

The different output signals (analogue/digital) facilitate the connection of all HYDAC ELECTRONIC GMBH measurement and control devices as well as connection to standard evaluation systems (e.g. also to PLC controls). The HLT 2100-R1 is primarily used in stationary applications as a semi-integrated solution in hydraulic cylinders.

Special features:

- Accuracy $\leq \pm 0.05\%$ FS typ.
- Very robust housing
- High resistance to shock and vibration
- Excellent EMC characteristics
- Non-contact and wear-free
- Persuasive price / performance ratio

Technical data:

Input data	
Measuring ranges	50 .. 4000 mm
Measured variable	Distance, position, speed
Mechanical connection	Threaded flange M18x1.5
Housing	Aluminium
Hydraulic tube	Stainless steel Pressure resist. 450 bar, 750 bar peak

Linear Position Transducer Flat Housing Design

HLT 2500-F1

Description:

The sensor works on the principle of magnetostriction.

The measuring principle determines with a high degree of accuracy the position, distance and/or a velocity signal based on elapsed time.

Utilizing this non-contact and wear-free measuring system, HYDAC offers a flat housing version in aluminium.

The different output signals (analogue/digital) facilitate the connection of all HYDAC ELECTRONIC GMBH measurement and control devices as well as connection to standard evaluation systems (e.g. also to PLC controls).

The HLT 2500-F1 is primarily used in stationary applications, especially when a semi-integrated solution in hydraulic cylinders is not possible.

Special features:

- Accuracy $\leq \pm 0.05\%$ FS typ.
- Very robust housing
- High resistance to shock and vibration
- Excellent EMC characteristics
- Non-contact and wear-free
- Persuasive price / performance ratio

Electronic Distance Sensor HLS 528

Description:

The distance sensor HLS 528 is a non-contact, highly compact sensor for measuring distances to fluids and objects.

By definition, its functional principle (measurement of sound transmission time) means that it operates with an extremely high resolution and measurement rate.

The HLS 528 is available for measuring ranges up to 6000 mm and is available in three signal output versions (2 switching outputs; 1 analogue output, either 4 .. 20 mA or 0 .. 10 V, plus 1 or 2 switching outputs).

The sensor can be adjusted simply and conveniently using two push-buttons and a self-explanatory menu structure. A 3-digit display indicates the latest distance and 2 three-colour LEDs also show the operating condition.

Special features:

- Contact-free distance measurement
- Measurement range up to 6000 mm
- Various signal output versions available
- Very high resolution and measurement rate
- Integrated temperature compensation
- 3-digit display to show the latest distance
- 2 three-colour LEDs to display the operating status
- Switching and switch-back points can be adjusted independently
- Selectable analogue output (optional)
- Only for use in depressurised applications

Technical data:

Input data					
Operating range	250;	350;	1300;	3400;	6000 mm
Blind zone	0 .. 30;	0 .. 85;	0 .. 200;	0 .. 350;	0 .. 600 mm
Maximum range	350;	600;	2000;	5000;	8000 mm
Resolution	≤ 0.18 mm				
Output data					
Accuracy	≤ ± 1 % of the latest measured value				
Repeatability	± 0.15 % of the latest measured value				
Versions	2 switch outputs		1 switch outp. +1 analog. outp. / 2 switch outputs + 1 analogue output		
Analogue output (optional)					
Signal; selectable (short-circuit resistant, invertible)			4 .. 20 mA, R _{Lmax} = 100 Ω (U _B ≤ 20 V) R _{Lmax} = 500 Ω (U _B > 20 V) 0 .. 10 V, R _{Lmin} = 100 kΩ (U _B ≥ 18 V)		
Switch outputs					
Switching output (short-circuit resistant)	2 x PNP I _{max} = 2 x 200 mA		1 x PNP I _{max} = 200 mA 2 x PNP I _{max} = 2 x 200 mA		
Switching direction	N/O or N/C, adjustable				
Reaction time	50;	70;	110;	180;	240 ms
Environmental conditions					
Operating temperature	-25 °C .. +70 °C				
Storage temperature range	-40 °C .. +85 °C				
CE mark	DIN EN 60947-5-2 DIN EN 60947-5-7				
Protection class to EN 60529	IP 67				
Other data					
Supply voltage	9 .. 30 V DC without analogue output 18 .. 30 V DC with analogue output				
Time delay before availability	< 300 ms				
Residual ripple	± 10%				
No-load current consumption	≤ 80 mA				
Electrical connection	Male M12x1, 5 pole				
Housing	Brass, nickel-plated; Ultrasonic transducer with PEEK film				
Controls	2 push-buttons				
Display	3-digit, LED-display, 2 three-colour-LEDs				
Weight	150;	150;	150;	210;	270 g

Note: Reverse polarity protection of the supply voltage and short circuit protection are provided.

Setting options:

All the settings available on the HLS 528 are grouped in two easy-to-navigate menus. In order to prevent unauthorised adjustment of the instrument, a key-lock can be set.

Setting ranges of the switching points and switch-back hystereses:

Switching point function distance

Oper. scanning range	Switching point*	Hysteresis*
250 mm	30 .. 350 mm	1 .. 320 mm
350 mm	85 .. 600 mm	1 .. 515 mm
1300 mm	200 .. 999 mm 100 .. 200 cm	1 .. 999 mm 100 .. 180 cm
3400 mm	350 .. 999 mm 100 .. 500 cm	1 .. 999 mm 100 .. 465 cm
6000 mm	600 .. 999 mm 100 .. 800 cm	1 .. 999 mm 100 .. 740 cm

Window function distance

Oper. scanning range	Lower switch value*	Upper switch value*
250 mm	30 .. 348 mm	32 .. 350 mm
350 mm	85 .. 598 mm	87 .. 600 mm
1300 mm	200 .. 999 mm 100 .. 198 cm	202 .. 999 mm 100 .. 200 cm
3400 mm	350 .. 999 mm 100 .. 498 cm	352 .. 999 mm 100 .. 500 cm
6000 mm	600 .. 999 mm 100 .. 798 cm	602 .. 999 mm 100 .. 800 cm

* The increment for all units is 1 mm or cm.

Recording ranges (for different objects):

The dark-grey areas specify the range in which the normal reflector (round bar) is detected safely. This is the typical working range of the sensors. The light grey areas illustrate the range in which a very large reflector, e.g. a very large plate, is still detected, provided it is aligned optimally to the sensor. Ultrasonic reflections cannot be evaluated outside the light grey area.

Operational scanning range 250 mm:

Operational scanning range 350 mm:

Operational scanning range 1300 mm:

Operational scanning range 3400 mm:

Electronic Level Switch ENS 3000

Description:

The ENS 3000 is an electronic level switch with integrated display. The instrument has 1, 2 or 4 switching outputs and an analogue output signal is available as an option.

In addition to the standard minimum and maximum switching signals, with the 4 switching output version it is possible to set additional warning signals to prevent problems such as tank overflow or aeration of the pump. The ENS 3000 can be used for oil as well as water. The fluid type can be selected for specific applications via the menu.

The main applications of the ENS 3000 are primarily in hydraulics, e.g. for fluid level monitoring of a tank.

The ENS 3000 is available in standard probe lengths of 250 mm, 410 mm, 520 mm and 730 mm.

The instrument is also available with or without an integrated temperature sensor.

Special features:

- 1, 2 or 4 independent PNP transistor switching outputs
- Selectable for use with oil or water
- User-selectable switch outputs based on the measured value
- Switching and switch-back points can be adjusted independently
- Selectable analogue output (optional)
- 4-digit display
- Simple to operate due to menu-based key operation

Technical data:

Input data	
Sensor type	Capacitive fluid level sensor
Probe lengths	250; 410; 520; 730 mm
Active zone	170; 290; 390; 590 mm
Max. speed of change in fluid level	40; 60; 80; 100 mm/s
Repeatability ¹⁾	≤ ± 2 % FS
Switching point accuracy	≤ ± 2 % FS
Temperature (optional)	
Sensor type	Semiconductor sensor
Measuring range	-25 .. +100 °C
Accuracy	± 1.5 °C
Reaction time (t ₉₀)	180 s
Output data	
Analogue output (optional)	
With 1 or 2 SP selectable	4 .. 20 mA ohmic resistance ≤ 500 Ω 0 .. 10 V ohmic resistance ≥ 1 kΩ corresponds to measuring range selected
With 4 SP (only with temperature sensor)	0 .. 10 V ohmic resistance ≥ 1 kΩ corresponds to measuring range selected
Switch outputs	
Type	PNP transistor output programmable as N/O / N/C
Assignment	On version with temperature measurement, user can select temperature or fluid level
Switching current	1 or 2 SP: max. 1.2 A per output 4 SP: max. 0.25 A per output
Switching cycles	> 100 million
Environmental conditions	
Compensated temperature range	0 .. +60 °C
Operating temperature range	0 .. +60 °C
Storage temperature range	-40 .. +80 °C
Fluid temperature range	0 .. +60 °C
CE mark	EN 61000-6-1 / 2 / 3 / 4
UL mark ²⁾	Certificate No. E318391
Vibration resistance to DIN EN 60068-2-6 (0 .. 500 Hz)	≤ 5 g
Shock resistance to DIN EN 60068-2-29 (1 ms)	≤ 25 g
Protection class to IEC 60529	IP 67
Other data	
Max. tank pressure	0.5 bar (short-term 3 bar, t < 1 min)
Supply voltage	9 .. 35 V DC without analogue output 18 .. 35 V DC with analogue output - limited energy - according to 9.3 UL 61010; Class 2; UL 1310/1585; LPS UL 60950
for use acc. to UL spec.	
Current consumption	max. 2.47 A total max. 90 mA with inactive switching outputs and 2 analogue outputs
Residual ripple of supply voltage	≤ 5 %
Fluids ³⁾	Hydraulic oils (mineral based), synth. oils, fluids containing water
Parts in contact with medium	Ceramic
Display	4-digit, LED, 7 segment, red, height of digits 7 mm
Weight	~ 180; 220; 250; 300 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.

FS (Full Scale) = relative to complete measuring range

¹⁾ Specified for calm, non-turbulent fluid,

²⁾ Environmental conditions according to 1.4.2 UL 61010-1; C22.2 No. 61010-1

³⁾ Other fluids on request

Setting options:

All settings available on the ENS 3000 are combined in 2 easy-to-navigate menus. To prevent unauthorised adjustment of the instrument, a programming lock can be set.

Setting ranges of the switching points and switch-back hystereses:

Fluid level switching point function

Probe length in cm	Meas. range in cm	Switching point in cm *	Hysteresis in cm *
25.0	17.0	0.3 .. 17.0	0.1 .. 16.8
41.0	29.0	0.5 .. 29.0	0.2 .. 28.7
52.0	39.0	0.6 .. 39.0	0.2 .. 38.6
73.0	59.0	0.9 .. 59.0	0.3 .. 58.4

The increment for all units is 0.1 cm.

Fluid level window function

Probe length in cm	Lower switch value in cm *	Upper switch value in cm *
25.0	0.3 .. 16.7	0.4 .. 16.8
41.0	0.5 .. 28.4	0.7 .. 28.7
52.0	0.6 .. 38.3	0.9 .. 38.6
73.0	0.9 .. 57.9	1.4 .. 58.4

The increment for all units is 0.1 cm.

Fluid level offset function

Probe length in cm	Meas. range in cm *	Offset in cm *
25.0	17.0	0 .. 68.0
41.0	29.0	0 .. 116.0
52.0	39.0	0 .. 156.0
73.0	59.0	0 .. 177.0

The increment for all units is 0.1 cm.

Temperature switching point function

Unit	Meas. range	Switching point	Hysteresis
°C	-25 .. +100	-23.0 .. +100.0	1.0 .. 123.5

The increment for all units is 0.5 °C.

Temperature window function

Unit	Lower switch value	Upper switch value
°C	-23.5 .. +97.5	-22.0 .. +98.5

The increment for all units is 0.5 °C.

* All ranges given in the table are adjustable by the increments shown.

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switching outputs can be assigned to fluid level or temperature, as required
- Switch-on and switch-off delay adjustable from 0.00 .. 9999 seconds
- Display can be adjusted (actual fluid level, actual temperature, peak values, switching point 1, 2, 3, 4 or display off)
- Analogue output can be assigned to fluid level or temperature as required (depending on model)

Electronic Level Switch ENS 3000 with IO-Link Interface

Description:

The ENS 3000 with IO-Link communication interface is an electronic level switch with integrated display. The instrument has a switching output and additional output that can be configured as switching or analogue (4 .. 20 mA or 0 .. 10 V). The ENS 3000 can be used not only for oil but also for water and is available with or without temperature sensor.

Compared with the standard version, the IO-Link interface enables bidirectional communication between the device and the control. Parameterisation and cyclical transmission of process and service data is therefore possible.

The level switch series ENS 3000 with communication interface IO-Link according to specification V1.1 has been specially designed to connect sensors in automation systems. Typical fields of application are machine tools, handling and assembly automation, intralogistics or the packaging industry.

Special features:

- IO-Link interface
- 1 PNP transistor output
- Additional signal output, can be configured as PNP transistor switching output or analogue output
- Selectable for use with oil or water
- 4-digit display
- Display rotates in two axes for optimal alignment

Technical data:

Input data	
Sensor type	Capacitive level sensor
Probe length	250; 410; 520; 730 mm
Measuring range	170; 290; 390; 590 mm
Max. speed of change in the fluid level	40; 60; 80; 100 mm/s
Repeatability ¹⁾	≤ ± 2 % FS
Switching point accuracy	≤ ± 2 % FS
Temperature (optional)	
Sensor type	Semi-conductor sensor
Measuring range	-25 .. +100 °C
Accuracy	± 1.5 °C
Reaction time (t ₉₀)	180 s
Output data	
Output signals	Output 1: PNP transistor switching output Output 2: can be configured as PNP transistor switching output or analogue output
Analogue output	
Signal	selectable: 4 .. 20 mA load resistance max. 500 Ω 0 .. 10 V load resist. min. 1 kΩ corresponds to measuring range selected
Switch outputs	
Type	PNP transistor switching output
Assignment	On version with temperature measurement user-selectable temperature or fluid level
Switching current	max. 250 mA per output
Switching cycles	> 100 million
Parameterisation	
	Via IO-Link interface, with HYDAC programming device HPG 3000 or push buttons on the ENS 3000
Environmental conditions	
Compensated temperature range	0 .. +60 °C
Operating temperature range	0 .. +60 °C
Storage temperature range	-40 .. +80 °C
Fluid temperature range	0 .. +60 °C
CE - mark	EN 61000-6-1 / 2 / 3 / 4
Vibration resistance according to DIN EN 60068-2-6 (0 .. 500 Hz)	≤ 5 g
Shock resistance according to DIN EN 60068-2-29 (11 ms)	≤ 25 g
Protection class to IEC 60529	IP 67
Other data	
Max. tank pressure	0.5 bar (short-term 3 bar, t < 1 min)
Supply voltage	9 .. 35 V DC without analogue output 18 .. 35 V DC with analogue output
Current consumption	≤ 0.590 A with active switching outputs ≤ 90 mA with inactive switching outputs ≤ 110 mA with inactive switching output and analogue output
Residual ripple of supply voltage	≤ 5 %
Fluids ²⁾	Hydraulic oils (mineral based), synth. oils, fluids containing water
Parts in contact with medium	Ceramic
Display	4-digit, LED, 7-segment, red, height of digits 7 mm
Weight	180 .. 300 g, dependent on the probe length

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.

FS (Full Scale) = relative to complete measuring range

¹⁾ Specified for calm, non-turbulent fluid

²⁾ Other fluids on request

Setting options:

All terms and symbols used for setting the ENS 3000 as well as the menu structure comply with the specifications in the VDMA Standard for level switches.

Setting ranges for the switch outputs:

Measuring range/ probe length in cm	Lower limit of RP / FL in cm	Upper limit of SP / FH in cm
17.0 / 25.0	0.2 / 0.3	17.0 / 16.8
29.0 / 41.0	0.3 / 0.5	29.0 / 28.7
39.0 / 52.0	0.4 / 0.6	39.0 / 38.6
59.0 / 73.0	0.6 / 0.9	59.0 / 58.4

Measuring range in cm	Min. difference betw. RP & SP and FL & FH in cm	Increment* in cm
17.0 / 25.0	0.1 / 0.1	0.1
29.0 / 41.0	0.2 / 0.2	0.1
39.0 / 52.0	0.2 / 0.3	0.1
59.0 / 73.0	0.3 / 0.5	0.1

* All ranges given in the table are adjustable by the increments shown.

SP = switch point
RP = switch-back point
FL = level window lower value
FH = level window upper value

Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switching outputs can be assigned to the fluid level or temperature
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Optional analogue output signal to 4 .. 20 mA or 0 .. 10 V
- Analogue output can be assigned to fluid level or temperature as required (depending on version)

Pin connections:

Pin	Signal	Description
1	L+	Supply voltage
2	I/Q	Switching output (SP2) / analogue output
3	L-	Gnd
4	C/Q	IO-Link communication / switching output (SP1)

IO-Link-specific data:

Baud rate	38.4 kBaud *
Cycle time	2.5 ms
Process data width	16 Bit
Frame type	2.2
Specification	V1.1

* Connection with unshielded standard sensor line possible up to a max. line length of 20 m.

For applications or operating conditions not described, please contact the relevant technical department.

Subject to technical modifications.

Description:

The HNS 3000 is an electronic level switch with integrated display. The float-based sensor for high-precision analogue monitoring of the fluid level has 1, 2 or 4 switching outputs and an analogue output signal is available as an option.

In addition to the conventional minimum and maximum switching signal, with the 4 output version it is possible to set additional warning signals to prevent problems such as tank overflow or aeration of the pump.

The main applications of this HNS 3000 are primarily in hydraulics, e.g. for fluid level monitoring of a tank.

The sensor is available in probe lengths from 250 to 2500 mm. The instrument is also available with or without temperature sensor.

Depending on the application, several different floats are available, e.g. stainless steel for aggressive media or plastic.

Special features:

- 1, 2 or 4 independent PNP transistor switching outputs
- User-selectable switch outputs based on the measured value
- Switching and switch-back points can be adjusted independently
- Selectable analogue output available as an option
- 4-digit display
- Various types of float available

Electronic Level Switch HNS 526

Description:

The level switch HNS 526 is a non-contact, highly compact sensor for fluid level measurement in stationary applications.

By definition, its functional principle (measurement of sound transmission time) means that it operates with an extremely high resolution and measurement rate.

The HNS 526 is available for measurement ranges up to 6400 mm and is obtainable in different signal output variants (2 switching outputs; 1 switching output and 1 analogue output, either 4 .. 20 mA or 0 .. 10 V).

The sensor can be adjusted simply and conveniently via two push-buttons and a self-explanatory menu structure according to VDMA.

The actual fluid level can be displayed in a 3-digit digital display either in absolute value or in percent (selectable); 2 three-colour LEDs also indicate the operating status.

Special features:

- Non-contact distance measurement
- Measurement range up to 6400 mm
- Various signal output versions available
- Very high resolution and measurement rate
- Integrated temperature compensation
- 3-digit digital display to show the actual distance
- 2 three-colour LEDs to display the operating status
- Switching and switch-back points can be adjusted independently
- Selectable analogue output (optional)
- Only for use in depressurised applications
- Must be installed vertically to the fluid surface

Technical data:

Input data					
Operating range	280;	480;	1600;	4000;	6400 mm
Blind zone	0 .. 30;	0 .. 85;	0 .. 200;	0 .. 350;	0 .. 600 mm
Maximum range	350;	600;	2000;	5000;	8000 mm
Resolution	≤ 0.18 mm				
Output data					
Accuracy	≤ ± 1 % of the actual measured value				
Repeatability	± 0.15 % of the actual measured value				
Analogue output (optional)					
Signal (short-circuit resistant)	selectable: 4 .. 20 mA, $R_{Lmax} = 100 \Omega (U_B \leq 20 V)$ $R_{Lmax} = 500 \Omega (U_B > 20 V)$ 0 .. 10 V, $R_{Lmin} = 100 k\Omega (U_B \geq 20 V)$				
Switch outputs					
Type	PNP transistor output (short-circuit resistant)				
Switching current	max. 200 mA per switching output				
Switching direction	N/O or N/C, adjustable				
Switching cycles	> 100 million				
Reaction time	32; 64; 92; 172; 240 ms				
Environmental conditions					
Operating temperature	-25 °C .. +70 °C				
Storage temperature range	-40 °C .. +85 °C				
CE mark	DIN EN 60947-5-2 DIN EN 60947-5-7				
Vibration resistance to DIN EN 60068-2-6 (10 .. 55 Hz)	≤ 2 g				
Shock resistance to DIN EN 60068-2-27 (11 ms)	≤ 30 g				
Protection class to EN 60529	IP 67				
Other data					
Supply voltage	9 .. 30 V DC without analogue output 20 .. 30 V DC with analogue output				
Time delay before availability	< 300 ms				
Residual ripple	± 10%				
No-load current consumption	≤ 80 mA				
Electrical connection	Male M12x1, 4 pole				
Housing	Brass, nickel-plated; Ultrasonic transducer with PEEK film				
Controls	2 push-buttons				
Display	3-digit, LED-display, 2 three-colour-LEDs				
Weight	150;	150;	150;	210;	270 g

Note: Reverse polarity protection of the supply voltage and short circuit protection are provided.

Setting options:

All the terms and symbols used for setting the HNS 526 as well as the menu structure comply with the specifications of the German Engineering Federation Standard (VDMA 24574-4) for level switches.

In order to prevent unauthorised adjustment of the device, a key-lock can be set.

Setting ranges of the switching points or switch-back points:

Switching point function distance and window function distance

Oper. scanning range	SP1, SP2, FH1, FH2 *	RP1, RP2, FL1, FL2*
280 mm	2 .. 32 cm 2 .. 13 inch	1 .. 31 cm 1 .. 12 inch
480 mm	2 .. 59 cm 2 .. 23 inch	1 .. 58 cm 1 .. 22 inch
1600 mm	2 .. 180 cm 2 .. 71 inch	1 .. 179 cm 1 .. 70 inch
4000 mm	2 .. 465 cm 2 .. 183 inch	1 .. 464 cm 1 .. 182 inch
6400 mm	2 .. 740 cm 2 .. 291 inch	1 .. 739 cm 1 .. 290 inch

Switching point function:

SP1, SP2 = switching points 1 or 2
RP1, RP2 = switch-back points 1 or 2

Window function.

FH1, FH2 = upper switch values 1 or 2
FL1, FL2 = lower switch values 1 or 2

* The increment for all devices is 1 cm or 1 inch.

Recording ranges (for different objects):

The grey areas show the detection range for a very large reflector, e.g. a fluid surface, providing the sensor is ideally positioned. Outside the grey area, it is not possible to evaluate the ultrasonic reflections.

Electronic Level Transmitter HNT 1000

Description:

The level transmitter HNT 1000 is a float-based sensor for highly accurate analogue recording of fluid levels.

The sensor is available in probe lengths from 250 to 2500 mm. HYDAC offers the HNT 1000 in a pressure-resistant stainless steel housing for in-tank installation.

Depending on the application, a variety of different floats are available, e.g. stainless steel for aggressive media or plastic.

The output signals enable connection to all HYDAC ELECTRONIC GMBH measurement and control devices as well as connection to standard evaluation systems (e.g. PLC controls).

Special features:

- Probe lengths from 200 to 2500 mm
- Process connection:
G3/4 A threaded connection
- High degree of accuracy
- Very robust housing
- Highly resistant to shock and vibration
- Excellent EMC characteristics
- Various float variants available

FLOW RATE TRANSMITTERS FLOW SWITCHES

To measure the flow rate in machines and systems HYDAC ELECTRONIC offers various flow rate transmitters and flow switches.

The flow rate transmitter of the EVS 3000 series operates according to the turbine principle (measuring the rpm of an impeller rotating in the fluid flow). Depending on the model, additional connection ports are available for pressure and/or temperature transmitters.

The HYDAC flow switches and transmitters in the HFS 2000 and HFT 2000 series are based on the variable area float principle. The test medium deflects a spring-loaded float in the direction of the flow, depending on the flow rate. A reed contact is attached to the outside of the instrument. When the magnet inside the float reaches the preset position, the reed contact will switch.

Electronic Flow Rate Transmitter EVS 3110 for Water-Based Fluids

Description:

The flow rate transmitters in the EVS 3110 series (stainless steel series) are specially designed for use in hydraulic and other fluid technology systems.

They operate according to the turbine principle, i.e. the speed of an impeller turning in the fluid flow is measured and converted into a 4 ... 20 mA analogue signal.

On the EVS 3110 stainless steel range, the impeller has a carbide bearing and the resulting increased robustness also makes it suitable for use in pulsating, dynamic applications.

Two further G1/4 threaded holes in the turbine housing allow additional devices to be connected, e.g. temperature and pressure transmitters.

Special features:

- Suitable for pressures up to 400 bar
- Viscosities of 1 .. 100 cSt
- Output signal 4 .. 20 mA
- Additional connection of temperature and / or pressure transmitters possible

Electro-mechanical Flow Switch HFS 2100 for Oils / Viscous Fluids

Description:

The HYDAC flow switches of the HFS 2100 series are based on a variable area float principle and are position-independent. The test medium deflects a spring-loaded float in the direction of flow, depending on the flow rate. A reed contact is fitted to the outside of the device and is therefore separate from the flow circuit. When the magnet inside the float reaches the preset position, the reed contact will switch.

To protect it from external influences, the switch is encapsulated in a casing designed to allow steplessly variable adjustment.

The instruments are designed to be capable of monitoring threshold values reliably, even when the viscosity fluctuates. The kinematic viscosity may vary between 30 and 600 cSt.

The main areas of application are:

- Central lubrication systems
- Oil circuit lubrication systems
- Transformers
- Cooling systems and circuits
- Lubrication circuits
- Hydraulic systems
- Pumps
- Welding machines and laser systems
- Chemical industry
- Research & development

Medium:

- Oils / viscous fluids

Special features:

- Accuracy $\leq \pm 10\%$ FS
- Viscosity compensation from 30 .. 600 cSt
- Any mounting position
- High level of functional reliability
- High level of switching accuracy
- Stepless switch point setting by user
- High pressure resistance
- Threaded connection
- ATEX version also available for potentially explosive areas.

Electro-Mechanical Flow Switch HFS 2500 for Water or Water-Based Media

Description:

The HYDAC Flow Switch in the series HFS 2500 is based on the variable area float principle. The test medium deflects a spring-loaded float in the direction of flow, depending on the flow rate. A reed contact is fitted to the outside of the instrument and is therefore separate from the flow circuit. When the magnet inside the float reaches the pre-set position, the reed contact will switch. To protect it from external influences, the switch is encapsulated in a casing designed to allow steplessly variable adjustment.

The instruments in the HFS 2500 series are available in two versions, with 5% accuracy and with 10% accuracy. Areas of application are to monitor flow rate in fluids (water / water-based) in the following areas, amongst others:

- Cooling systems and circuits
- Hydraulic systems
- Pumps
- Welding machines and laser systems
- Medical technology
- Pharmaceutical industry
- Chemical industry
- Research & development

Fluid:

- Water / water-based media

Special features:

- Accuracy $\leq \pm 5\%$ or $\leq \pm 10\%$ FS
- Any mounting position
- High level of function reliability
- High level of switching accuracy
- Stepless switch point setting by user
- High pressure resistance
- Threaded connection
- ATEX version also available for potentially explosive atmospheres

Note: FS (Full Scale) = relative to complete measuring range

1) Other seal materials available on request

2) The contact opens / switches when the flow falls below the pre-set switching point.

3) Minimum load 3 VA

Electronic Flow Transmitter HFT 2100 for Oils / Viscous Fluids

Description:

The HFT 2100 series of HYDAC flow transmitters is based on the variable area float principle.

Irrespective of the installation position, the test medium deflects a spring-loaded float in the direction of flow, depending on the flow rate.

A Hall sensor which detects the position of the float, is fitted to the outside of the instrument and is therefore separate to the flow circuit.

In proportion to the deflection of the float, the sensor produces an analogue signal which corresponds to the particular measuring range.

The device is calibrated for vertical installation and for an upwards flow direction. The transmitter is designed to give reliable measurements within its accuracy range, even with changes in viscosity. The kinematic viscosity may vary between 30 and 600 cSt.

The areas of application include:

- Central lubrication systems
- Oil circuit lubrication systems
- Transformers
- Cooling systems and circuits
- Lubrication circuits
- Hydraulic systems
- Pumps
- Welding machines and laser systems
- Chemical industry
- Research & development

Medium:

- Oils / viscous fluids

Special features:

- Accuracy $\leq \pm 10\%$ FS
- Viscosity compensation from 30 .. 600 cSt
- Any mounting position
- High level of functional reliability
- High pressure resistance
- Threaded connection

Electronic Flow Transmitter HFT 2500 for water / water-based media

Description:

The HFT 2500 series of HYDAC flow transmitters is based on the variable area float principle and is position-independent.

The test medium deflects a spring-loaded float in the direction of flow, depending on the flow rate but irrespective of the installation position. A Hall sensor is fitted to the outside of the device and is therefore also outside the flow circuit. It determines the position of the float.

The sensor emits an analogue signal proportional to the deflection of the float which corresponds to the relevant measurement range.

The device is calibrated for vertical installation and for a flow direction from bottom to top.

Areas of application are to monitor flow rate in fluids (water / water-based) in the following areas, amongst others:

- Cooling systems and circuits
- Hydraulic systems
- Pumps
- Welding machines and laser systems
- Medical technology
- Pharmaceutical industry
- Chemical industry
- Research & development

Medium:

- Water or water-based media

Special features:

- Accuracy $\leq \pm 3\%$ FS
- Any mounting position
- High level of functional reliability
- High pressure resistance
- Threaded connection

Electronic Speed Sensor HSS 110

Description:

The contact-free speed sensors of the HSS 110 series detect the movement of ferromagnetic structures, such as gear wheels, gear rims or perforated discs, using the changes in magnetic flux.

So each sensor has two Hall elements and the differential between the two signals is detected, evaluated and then converted into an output signal suitable for processing.

For integration into standard controls, standard output signals are available.

Due to their extremely compact design, the robust housing and protection class IP 6K9K, the devices can be used in almost any application and any mounting position.

The main fields of application are detection of speed and rotation direction on gear wheels with small module and high resolution, especially in vehicles and mobile machines with electrical and hydraulic drives.

Special features:

- 1-channel Hall differential sensor
- Different signal outputs available
- Extremely compact design
- Wide frequency range
- Alignment required on installation
- Large air gap

Technical data:

Input data	
Frequency range	NPN: 0.1 .. 20,000 Hz PWM: 1.0 .. 5,000 Hz
Probe length	18.4 mm
Probe diameter	10.2 / 9.4 mm
Max. pressure on sensing surface	25 bar, static
Air gap / installation distance	Module 1: 0.2 .. 0.8 mm Module 1.25: 0.2 .. 1.4 mm Module 1.5: 0.2 .. 1.8 mm Module 2: 0.2 .. 2.4 mm Module 3: 0.2 .. 2.9 mm
Mechanical connection	Flange, single, asymmetrical, cable outlet 90°
Type of installation	Dependent on direction (with asymmetrical flange)
Torque value	max. 8 Nm
Housing material	Brass
Seal	FPM
Output data	
Variants	1-channel frequency or 1-channel frequency / direction of rotation (PWM)
Types	1 NPN frequency output or 1 PWM output, 4 .. 20 mA
Switching capacity / current rating	NPN: ≤ 40 mA PWM: ≤ 200 mA
Direction of rotation	Flange on left, gear turns to right, for duration of PWM signal pulse
Signal level	LOW: ≤ 0.6 V / 4 .. 9 mA PWM HIGH: +U _B / 12 .. 17 mA PWM
Environmental conditions	
Operating temperature range	-40 .. +140 °C
Media resistance of housing	Salt water; various hydraulic oils; diesel oils; cleaning agent; salt spray
CE mark	DIN EN 60947-5-2
Vibration resistance to EN 60068-2-64	0.05 g ² / Hz, 20 .. 2,000 Hz
Shock resistance to EN 60068-2-27	100 g, 6 ms, 3x in each direction
Protection class to IEC 60529 to ISO 20653	IP 67 IP 6K9K
Other data	
Electrical connection	Flying leads, 3-core, cable length 1 m
Supply voltage	NPN: 12.5 .. 32 V DC PWM: 4.5 .. 20 V DC
Residual ripple of supply voltage	≤ 5 %
Current consumption	< 30 mA at 30 V DC
Average life expectancy	200,000 h (MTTF)
Weight	~ 50 g

Note: Reverse polarity protection of the supply voltage and short circuit protection (max. 50 mA) are provided.

Electronic Speed Sensor HSS 120

Description:

The contact-free speed sensors of the HSS 120 series detect the movement of ferromagnetic structures, such as gear wheels, gear rims or perforated discs, using the changes in magnetic flux.

So each sensor has two Hall elements and the differential between the two signals is detected, evaluated and then converted into an output signal suitable for processing.

The instruments are available for different insertion depths. For integration into standard controls, standard output signals are available.

Due to their extremely compact design, the robust housing and protection class IP 69K, the instruments can be used in almost any application and any mounting position.

The main fields of application are detection of speed and rotation direction on gear wheels with a small module and high resolution, especially in vehicles and mobile machines with hydraulic drives.

Special features:

- 2-channel Hall differential sensor
- Wide frequency range
- Alignment required when installing
- Large air gap

Technical data:

Input data	
Frequency range	0.1 .. 20,000 Hz
Probe length	30; 35; 45 mm
probe diameter	15 / 12 mm
Max. pressure on sensing surface	15 bar, dynamic
Air gap / installation distance	Probe length: 30 mm 35 / 45 mm Module 1: 0.2 .. 1.0 mm 0.2 .. 1.3 mm Module 1.25: 0.2 .. 1.5 mm 0.2 .. 1.8 mm Module 1.5: 0.2 .. 1.7 mm 0.2 .. 2.0 mm Module 2: 0.2 .. 2.2 mm 0.2 .. 2.5 mm Module 2.5: 0.2 .. 3.2 mm 0.2 .. 3.5 mm
Mechanical connection	Flange, single, asymmetrical, cable outlet 90° (30 mm) / axial (35, 45 mm)
Type of installation	Dependent on direction (with asymmetrical flange)
Torque value	10 Nm
Housing material	Brass
Seal	FPM
Output data	
Variant	2-channel speed (90° / 270° phase shift for module 2)
Type	2 NPN frequency outputs
Switching capacity	≤ 50 mA ≥ 10 kΩ ohmic load ≤ 2.2 nF capacitive load
Direction of rotation	Flange on left, gear turns to right: channel A lagging; channel B leading
Signal level	LOW: ≤ 0.5 V HIGH: +U _B
Environmental conditions	
Operating temperature range	-40 .. +140 °C (-40 .. +160 °C for max. 500 operating hours)
Media resistance of housing	Salt water; various hydraulic oils; diesel oils; cleaning agent; salt spray
CE mark	DIN EN 60947-5-2
Vibration resistance to EN 60068-2-64	30 g, 10 .. 500 Hz, 100 min in each direction
Shock resistance to EN 60068-2-27 / -29	50 g, 11 ms, 3x in each direction 100 g, 6 ms, 3x in each direction
Protection class to IEC 60529 to ISO 20653	IP 67 IP 69K
Other data	
Electrical connection	Flying leads, 4-core, cable length 1 m
Supply voltage	7 .. 30 V DC
Residual ripple of supply voltage	≤ 5 %
Current consumption	< 30 mA at 30 V DC
Average life expectancy	200,000 h (MTTF)
Weight	~ 80 g

Note: Reverse polarity protection of the supply voltage and short circuit protection (max. 50 mA) are provided

Pin connections:

Core	HSS 120-2
brown	+U _B
blue	Frequency 1 (A)
black	0 V
white	Frequency 2 (B)

Adjustment angle for other modules:

It is possible to achieve a 90° phase shift of the two frequency signals by turning the sensor through the angle indicated in the table below.

-20°	Module 1	
-15°	Module 1.25	
-10°	Module 1.5	
± 0°	Module 2	± 0°
	Module 2.5	+15°

Specification for installation cavity:

* For sealing function RA 1.6, otherwise 3.2

Model code:

HSS 1 2 0 - 2 - XXX - 000

Signal technology

2 = Outputs 1 and 2: Frequency (90° phase shift)

Probe length

030 = 30 mm

035 = 35 mm

045 = 45 mm

Modification number

000 = Standard

Notes:

On instruments with a different modification number, please read the label or the technical amendment details supplied with the instrument.

Dimensions:

Probe length (A): 35 mm, 45 mm

Probe length: 30 mm

The information in this brochure relates to the operating conditions and applications described. For applications and operating conditions not described, please contact the relevant technical department. Subject to technical modifications.

Electronic Speed Sensor HSS 130

Description:

The contact-free speed sensors of the HSS 130 series detect the movement of ferromagnetic structures, such as gear wheels, gear rims or perforated discs, using the changes in magnetic flux.

So each sensor has two Hall elements and the differential between the two signals is detected, evaluated and then converted into an output signal suitable for processing.

The instruments are available in different insertion depths. For integration into standard controls, standard output signals are available.

Due to their extremely compact design, the robust housing and protection class IP 69K, the devices can be used in almost any application and any mounting position.

These devices are mainly used for detection of speed and rotation direction on rotary sensors, also under extreme environmental conditions.

Special features:

- 2-channel Hall differential sensor
- Single-core seal
- Very high EMC resistance
- Large air gap

Technical data:

Input data	
Frequency range	0.1 .. 20,000 Hz
Probe length	16; 32 mm
probe diameter	18 mm
Max. pressure on sensing surface	10 bar, dynamic
Air gap / installation distance	Module 1: 0.2 .. 1.3 mm Module 1.25: 0.2 .. 1.8 mm Module 1.5: 0.2 .. 2.0 mm Module 2: 0.2 .. 2.5 mm Module 2.5: 0.2 .. 3.5 mm
Mechanical connection	Double flange, asymmetrical, cable outlet at 90°
Type of installation	Dependent on direction (with asymmetrical flange)
Torque value	10 Nm
Housing material	Brass / plastic (PA6 GF30)
Seal	FPM
Output data	
Variants	2-channel speed (90° phase shift) or 2-channel speed / direction of rotation
Types	2 NPN frequency outputs or 1 NPN frequency output + 1 NPN direction of rotation output
Switching capacity	≤ 500 mA
Direction of rotation	Cable outlet at 90°, gear rotation to right: channel A leading; channel B lagging or rotational direction signal (right: HIGH / left: LOW)
Signal level	LOW: ≤ 2 V HIGH: ≥ U _B - 2 V
Environmental conditions	
Operating temperature range	-40 .. +125 °C
Media resistance of housing	Saltwater, various hydraulic oils
CE mark	DIN EN 60947-5-2
Vibration resistance to EN 60068-2-36	5 .. 57 Hz (1.5 mm p-p) 57 .. 2000 Hz (10 g)
Shock resistance to EN 60068-2-27	15 g, 11 ms, in each direction 25 g, 6 ms, in each direction
Protection class to IEC 60529 to ISO 20653	IP 67 IP 6K9K
Other data	
Electrical connection	Flying leads, 4-core, 43 cm cable length
Supply voltage	8 .. 32 V DC
Residual ripple of supply voltage	≤ 5 %
Current consumption	< 33 mA at 24 V, both outputs LOW < 23 mA at 24 V, both outputs HIGH
Average life expectancy	120,000 h (MTTF)
Weight	~ 110 g

Note: Reverse polarity protection of the supply voltage and short circuit protection are provided.

Pin connections:

Core	HSS 130-2	HSS 130-3
brown	+U _B	+U _B
blue	0 V	0 V
black	Frequency 1	Frequency
white	Frequency 2	Direction of rotation

Adjustment angle for other modules:

It is possible to achieve a 90° phase shift of the two frequency signals by turning the sensor through the angle indicated in the table below.

-12°	Module 1	
- 9°	Module 1.25	
- 7°	Module 1.5	
- 3°	Module 1.75	
± 0°	Module 2	± 0°
	Module 2.25	+ 4°
	Module 2.5	+ 8°
	Module 2.75	+13°
	Module 3	+17°

Specification for installation cavity:

- General tolerances for chipping processes: ISO 2768-mH
- Tolerance: ISO 8015
- Surface quality: ISO 1302

Model code:

HSS 1 3 0 - X - XXX - 000

Signal technology

- 2 = Outputs 1 and 2: Frequency (90° phase shift)
- 3 = Output 1: Frequency
Output 2: Direction of rotation

Probe length

- 016 = 16 mm
- 032 = 32 mm

Modification number

- 000 = Standard

Electronic Speed Sensor HSS 210

Description:

The contact-free speed sensors of the HSS 210 series detect the movement of ferromagnetic structures, such as gear wheels, gear rims or perforated discs, using the changes in magnetic flux.

So each sensor has two Hall elements and the differential between the two signals is detected, evaluated and then converted into an output signal suitable for processing.

For integration into standard controls, standard output signals are available.

Due to their extremely compact design, the robust housing and protection class IP 67, the instruments can be used in almost any application and any mounting position.

The main fields of application are detection of speed and rotation direction on gear wheels with a small module and high resolution, especially in vehicles and mobile machines with hydraulic drives.

Special features:

- 2-channel Hall differential sensor
- Wide frequency range
- Alignment required when installing
- Large air gap
- Simple installation

Technical data:

Input data	
Frequency range	0.1 .. 20,000 Hz
Installation depth	0 .. 50 mm adjustable
Max. pressure on sensing surface	5 bar, static / dynamic
Air gap / installation distance	Module 1: 0.2 .. 1.0 mm Module 1.25: 0.2 .. 1.5 mm Module 1.5: 0.2 .. 1.7 mm Module 2: 0.2 .. 2.2 mm Module 2.5: 0.2 .. 3.2 mm
Mechanical connection	
Mechanical connection	Screw-in thread M12x1
Type of installation	Dependent on direction
Torque value	13 Nm
Housing material	Brass
Output data	
Variants	2-channel speed (90° phase shift) or 2-channel speed / direction of rotation
Types	2 push-pull frequency outputs or 1 push-pull frequency output + 1 push-pull direction of rotation output
Switching capacity	≤ 50 mA
Direction of rotation	Marking on housing in direction of rotation, gear rotation to right: channel A leading; channel B lagging or direction of rotation signal (right: HIGH / left: LOW)
Signal level	LOW: ≤ 2 V HIGH: ≥ U _B - 2 V
Environmental conditions	
Operating temperature range	-40 .. +125 °C
Media resistance of housing	Oils: HETG; HEES, HFD; HVL; HLP
CE mark	DIN EN 60947-5-2
Vibration resistance to EN 60068-2-64	0.05 g ² /Hz, 20 .. 2,000 Hz
Shock resistance to EN 60068-2-27	30 g, 11 ms
Protection class to IEC 60529	IP 67 (when an IP 67 female connector is used)
Other data	
Electrical connection	Male M12x1, 4 pole
Supply voltage	8 .. 30 V DC
Residual ripple of supply voltage	≤ 5 %
Current consumption	< 30 mA at 30 V DC
Average life expectancy	200,000 h (MTTF)
Weight	~ 40 g

Note: Reverse polarity protection of the supply voltage and short circuit protection are provided.

Pin connections:

M12x1, 4 pole

Electronic Pressure Transmitter HDA 4700 for Applications with Increased Functional Safety

Functional Safety
PL d

Description:

This version of the pressure transmitter series HDA 4700 has been specially developed for use in safety circuits / safety functions as part of the functional safety of machinery and equipment up to PL d - Cat 3 (in accordance with ISO 13849).

The pressure transmitters are designed with two channels. Each channel consists of a sensor element and evaluation electronics. As a result, the pressure transmitter develops two separate and independent output signals in proportion to the pressure.

The safety function is tested by evaluating and comparing the two analogue output signals in a higher-level system.

The main areas of application are as sensor elements in mobile, safety-oriented systems such as load torque displays or load torque limitation in truck-mounted cranes or working platforms.

Special features:

- Two-channel, redundant pressure measurement
- Two separate, independent output signals
- Accuracy $\leq \pm 0.25\%$ FS typ.
- Highly robust sensor cell
- Outstanding performance in terms of temperature effect and EMC
- Small, compact design
- PL d, Cat. 3 certification

Linear Position Transducer HLT 1100-R2 for Applications with Increased Functional Safety

Functional Safety
PL d
SIL 2

Description:

This version of the linear position sensor series HLT 1100 has been specially developed for use in safety circuits / safety functions as part of the functional safety of machinery and equipment up to SIL 2 (IEC 61508) or PL d (ISO 13849).

The sensor works on the principle of magnetostriction.

This measuring principle determines with high-precision the position, the distance and/or the velocity and is based on elapsed time measurement.

Based on this non-contact and wear-free measuring system, HYDAC offers this version in a pressure-resistant stainless steel housing for full integration in hydraulic cylinders.

Special features:

- Very robust housing
- High resistance to shock and vibration
- Excellent EMC characteristics
- Non-contact and wear-free
- SIL 2 / PL d certification

Technical data:

Input data	
Measuring ranges	200 .. 2500 mm
Measured variable	Distance
Pressure resistance	450 bar
Peak pressure	630 bar
Parts in contact with medium	Stainless steel (1.4301 / 1.4571)
Output data	
Output signal	4 .. 20 mA, CANopen
Resolution	12 bit
Load resistance to GND	200 .. 500 Ohm
Accuracy to DIN 16086	≤ ± 0.5 % FS
Repeatability	≤ ± 0.1 % FS
Hysteresis	≤ ± 0.1 % FS
Non-linearity	≤ ± 0.1 % FS
Dynamics	≤ 30 ms (10 .. 90 %)
Environmental conditions	
Operating temperature range	-40 .. +85 °C
Storage temperature range	-40 .. +100 °C
Media temperature range	-40 .. +120 °C

L06 = 60 mm cable length
L18 = 180 mm cable length
L24 = 240 mm cable length

Signal output

C01 = Analogue 4 .. 20 mA, 3 conductor
CAN = CANopen

Measuring range in mm (200 to 2500 mm)

Example
0250 = 250 mm

Functional safety

S2PD = SIL 2 acc. to IEC 61508
and PLd – Cat 2 acc. to DIN EN 13849-1

Modification

000 = Standard

Notes:

Special models on request. On instruments with a different modification number, please read the label or the technical amendment details supplied with the instrument.

Accessories:

Appropriate accessories, such as position magnets, etc. can be found in the Accessories section of the Electronics brochure.
The recommended position magnet ZBL MR33, part no. 6084207, must be ordered separately.

For several years HYDAC ELECTRONIC has been systematically stepping up the expansion of its range of sensors for potentially explosive locations. The sensors for potentially explosive locations can be supplied with a variety of output signals, connectors and fluid port connection options. This versatility, combined with certification to ATEX, CSA and IECEx, ensures worldwide acceptance of our products.

Further sensors for potentially explosive locations can be found in the section "OEM Products for Large Volume Production".

Electronic Pressure Transmitter HDA 4700 ATEX, CSA, IECEx Flameproof Enclosure

Description:

The HDA 4700 electronic pressure transmitter series with flameproof enclosure has triple approval according to ATEX, CSA and IECEx which ensures the instrument is universally suitable for use in potentially explosive environments around the world.

Each instrument is certified by the three approvals organizations and is labelled accordingly. Therefore there is no longer any need to stock multiple devices with separate individual approvals.

As with the industrial version of the HDA 4700, those with triple approval have a proven, fully-welded stainless steel measurement cell with thin film strain gauge without internal seals.

The main areas of application are in mining and the oil & gas industry, e.g. in underground vehicles, hydraulic power units, blow-out preventers (BOPs), drill drives or valve actuation stations as well as in areas with high levels of dust contamination.

Protection types and applications:

Electronic Pressure Switch EDS 4400 Programmable ATEX, CSA, IECEx Flameproof Enclosure

Description:

The programmable electronic pressure switch EDS 4400 with flameproof enclosure has triple approval according to ATEX, CSA and IECEx which ensures the instrument is universally suitable for use in potentially explosive environments around the world.

Each instrument is certified by the three approval organizations and is labelled accordingly. Therefore there is no longer any need to stock multiple devices with separate individual approvals.

As with the industrial version of the EDS 4400, those with triple approval have a proven, fully-welded stainless steel measurement cell with thin film strain gauge without internal seals.

The instrument is programmed conveniently and simply using the HPG 3000 HYDAC programming unit.

The main areas of application are in mining and the oil & gas industry, e.g. in underground vehicles, hydraulic power units, blow-out preventers (BOPs), drill drives or valve actuation stations as well as in areas with high dust loads.

Electronic Temperature Transmitter ETS 4500 ATEX, CSA, IECEx Flameproof Enclosure

Description:

The electronic temperature transmitter series ETS 4500 with flameproof enclosure has triple approval according to ATEX, CSA and IECEx which ensures that the device is universally suitable for use in potentially explosive environments around the world.

Each device is certified by the three approval organizations and is labelled accordingly. Therefore it is no longer necessary to stock multiple devices with separate individual approvals.

Based on a silicon semiconductor device and corresponding evaluation electronics, the temperature sensor is designed to measure temperatures in the range -25 to +100 °C.

Its main applications are in mining and the oil and gas industry, e.g. in underground vehicles, hydraulic power units, blow-out preventers (BOPs), drill drives or valve actuation stations as well as in areas with high dust loads.

Electronic Pressure Transmitter HDA 4700 ATEX Intrinsically Safe ATEX Dustproof Enclosure ATEX Non-sparking

Description:

The pressure transmitter HDA 4700 in ATEX version has been specially developed for use in potentially explosive atmospheres and is based on the HDA 4000 series.

As with the industry model, the HDA 4700 in ATEX version has a stainless steel measurement cell with thin-film strain gauge.

Intended areas of application are, for example, in the oil and gas industry, in mining, on gas turbines or in locations with high levels of dust contamination, e.g. in mills.

Protection types and applications:

Accessories:

Appropriate accessories, such as electrical connectors, can be found in the Accessories brochure.

Dimensions:

Protection types and applications (code): 1, C

Protection ratings and areas of application (code): 9, A

The impact protected metal safety sleeve is included. A straight female connector is required for electrical connection; e.g. female connector M12x1, 4 pole, straight, with 3m shielded cable: ZBE 06S-03, Part No. 6098243

Note:

The information in this brochure relates to the operating conditions and applications described.

For applications or operating conditions not described, please contact the relevant technical department.

Subject to technical modifications.

Electronic Pressure Transmitter HDA 4400 ATEX Intrinsically Safe ATEX Dustproof Enclosure ATEX Non-sparking

Description:

The pressure transmitter HDA 4400 in ATEX version has been specially developed for use in potentially explosive atmospheres and is based on the HDA 4000 series.

As with the industry model, the HDA 4400 in ATEX version has a stainless steel measurement cell with thin-film strain gauge.

Intended areas of application are, for example, in the oil and gas industry, in mining, on gas turbines or in locations with high levels of dust contamination, e.g. in mills.

Protection types and applications:

The impact protected metal safety sleeve is included. A straight female connector is required for electrical connection; e.g. female connector M12x1, 4 pole, straight, with 3m shielded cable: ZBE 06S-03, Part No. 6098243

Note:

The information in this brochure relates to the operating conditions and applications described.

For applications or operating conditions not described, please contact the relevant technical department.

Subject to technical modifications.

Electronic Pressure Transmitter HDA 4100 ATEX Intrinsically Safe ATEX Dustproof housing ATEX Non-sparking

Description:

The pressure transmitter HDA 4100 in ATEX version has been specially developed for use in potentially explosive atmospheres for absolute measurement in the low pressure range and is based on the HDA 4000 series.

As with the industry model, the ATEX version HDA 4100 has a ceramic measurement cell with thick-film strain gauge.

Intended areas of application are, for example, in the oil and gas industry, in mining, on gas turbines or in locations with high levels of dust contamination, e.g. in mills.

Protection types and applications:

Electronic Pressure Switch EDS 4400 Programmable ATEX Intrinsically Safe

Description:

The programmable pressure switch EDS 4400 in ATEX version has been specially developed for use in potentially explosive atmospheres, and is based on the EDS 4000 series.

The switching point and switch-back point, the function of the switching outputs as N/C or N/O and the switching delay are user-programmable in conjunction with the HYDAC Programming Unit HPG 3000.

As with the industry model, the programmable EDS 4400 in ATEX version has a stainless steel measurement cell with thin-film strain gauge for measuring relative pressure in the high pressure range.

With approval for the following

Protection types and applications:

I M1	Ex ia I
II 1G	Ex ia IIC T4, T5, T6
II 1/2G	Ex ia IIC T4, T5, T6
II 2G	Ex ia IIC T4, T5, T6

Accessories:

Appropriate accessories, such as electrical connectors, can be found in the Accessories brochure.

Safety instructions:

- These units must only be programmed outside the potentially explosive location.
- When operating in potentially explosive locations, the programming cables may only be connected to the 0 V outside of the potentially explosive area.
- The switching output draws the switching energy from the power supply to the pressure switch. No additional energy is introduced into the electrical circuit through the switching output.
- The dual Zener barriers specified and approved in the technical data must be used to connect the pressure switch. These have a reverse polarity diode to decouple the signal. The signal path may only be passively loaded.
- Ensure that measured fluids in contact with the pressure switch are compatible with the materials used.

Note:

The information in this brochure relates to the operating conditions and applications described. For applications or operating conditions not described, please contact the relevant technical department. Subject to technical modifications.

Accessories:

Appropriate accessories, such as electrical connectors, can be found in the Accessories brochure.

Safety instructions:

- These units must only be programmed outside the potentially explosive location.
- When operating in potentially explosive locations, the programming cables may only be connected to the 0 V outside of the potentially explosive area.
- The switching output draws the switching energy from the power supply to the pressure switch. No additional energy is introduced into the electrical circuit through the switching output.
- Dual Zener barriers specified and approved in the technical data must be used to connect the pressure switch. These have a reverse polarity diode to decouple the signal. The signal path may only be passively loaded.
- Ensure that measured fluids in contact with the pressure switch are compatible with the materials used.

Note:

The information in this brochure relates to the operating conditions and applications described. For applications or operating conditions not described, please contact the relevant technical department. Subject to technical modifications.

Electronic Pressure Switch EDS 4100 Programmable ATEX Intrinsicly Safe

Description:

The programmable pressure switch EDS 4100 in ATEX version has been specially developed for use in potentially explosive atmospheres and is based on the EDS 4000 series.

The switching point and switch-back point, the function of the switching outputs as N/C or N/O and the switching delay are user-programmable in conjunction with the HYDAC Programming Unit HPG 3000.

As with the industry model, the programmable EDS 4100 in ATEX version has a ceramic measurement cell with thick-film strain gauge for measuring absolute pressure in the low pressure range.

With approval for the following Protection types and applications:

I M1	Ex ia I
II 1G	Ex ia IIC T4, T5, T6
II 1/2G	Ex ia IIC T4, T5, T6
II 2G	Ex ia IIC T4, T5, T6
II 1 D	Ex iaD 20 T100 °C

almost all requirements are covered regarding ignition group, error class and temperature class.

Versions for other Protection types and applications are available on request.

Special features:

- Switching point and switch-back point user-programmable
- Accuracy $\leq \pm 1\%$ FS
- Certificates:
DEKRA EXAM BVS 07 ATEX E 041 X
- Very small temperature error
- Excellent EMC characteristics
- Excellent durability

Technical data:

Input data	
Measuring ranges	1; 2.5 bar
Overload pressures	3; 8 bar
Burst pressures	5; 12 bar
Mechanical connection	G1/4 A DIN 3852
Torque value	20 Nm
Parts in contact with medium	Sensor: Ceramic Mech. connection: 1.4301 Seal: FPM / EPDM

Output data	
Switch output	1 x PNP N/C or N/O
Output load	during operation: $I_{max} \leq 34$ mA
Switching points	user-programmable with HYDAC Programming Unit HPG 3000
Accuracy to DIN 16086, Max. setting	$\leq \pm 0.5\%$ FS typ. $\leq \pm 1\%$ FS max.
Repeatability (at 25 °C)	$\leq \pm 0.1\%$ FS max.
Temperature drift	$\leq \pm 0.03\%$ FS / °C max. zero point $\leq \pm 0.03\%$ FS / °C max. range
Rising switch point and falling switch point delay	8 ms to 2000 ms; user-programmable with HYDAC Programming Unit HPG 3000
Long-term drift	$\leq \pm 0.3\%$ FS typ. / year

Electronic Pressure Transmitter HDA 4100 CSA Intrinsically safe CSA Non Incendive

Description:

The pressure transmitter HDA 4100 in CSA version has been specially developed for the North American market for use in potentially explosive atmospheres and is based on the HDA 4000 series.

As with the industry model, the HDA 4100 in CSA version has a ceramic measurement cell with thick-film strain gauge for measuring absolute pressure in the low pressure range.

Intended areas of application are, for example, the oil and gas industry, on gas turbines or in locations with high levels of dust, e.g. in mills.

Protection types and applications:

Intrinsically safe:

- Class I Div. 1 Group A, B, C, D T6 [C, US]
- Class I Zone 0 AEx ia IIC T6 [US]
- Ex ia IIC T6 [C]

- Class I, II, III
Div. 1

- Group A, B, C, D, E, F, G T6 [C, US]

Non incendive:

- Class I Div. 2 Group A, B, C, D T4A [C, US]
- Class I Zone 2 AEx nL IIC T4 [US]
- Class I Zone 2 Ex nL IIC T4 [C]

- Class I, II, III
Div. 2

- Group A, B, C, D, F, G T4A [C, US]
- Class I Zone 2 AEx nA II T4 [US]
- Class I Zone 2 Ex nA II T4 [C]

Special features:

- Accuracy $\leq \pm 0.5\%$ FS typ.
- Certificate: CSA 1760344
- Output signal 4 .. 20 mA
- Very small temperature error
- Excellent EMC characteristics
- Excellent durability

Electronic Pressure Transmitter HDA 4300 IECEX Intrinsically Safe IECEX Dustproof Enclosure IECEX Non-sparking

Description:

The pressure transmitter HDA 4300 in IECEx Intrinsically Safe version has been specially developed for use in potentially explosive atmospheres and is based on the HDA 4000 series.

As with the industrial version, the HDA 4300 with IECEx Intrinsically Safe approval has the field-proven ceramic measuring cell with thick-film strain gauge.

Intended areas of application are, for example, in the oil and gas industry, in mining, on gas turbines or in locations with high levels of dust contamination, e.g. in mills.

Electronic Pressure Transmitter HDA 4700 with Flush Membrane ATEX Intrinsically Safe ATEX Dustproof Enclosure ATEX Non-sparking

Description:

The pressure transmitter HDA 4700 in ATEX version with flush membrane has been specially developed for use in potentially explosive atmospheres.

Like the standard model, the HDA 4700 with flush membrane has a stainless steel measurement cell with a thin film strain gauge.

The pressure connection is achieved with an all-welded stainless steel front membrane filled internally with a pressure transfer fluid. The process pressure is transmitted hydrostatically to the measurement cell via the pressure transfer fluid.

This device is used for applications in which a standard pressure connection could become blocked, clogged or frozen by the particular medium used. Further applications include processes where the medium changes regularly and any residues could cause mixing or contamination of the media, or in highly viscous media. Intended areas of application are, for example, the oil and gas industry, in mines or in locations with high levels of dust, e.g. in mills.

Protection types and applications (code): 9, A

The impact protected metal safety sleeve is included. A straight female connector is required for electrical connection, e.g. female connector M12x1, 4 pole, straight, with 3m shielded cable: ZBE 06S-03, Part. No. 6098243

Note:

The information in this brochure relates to the operating conditions and applications described. For applications and operating conditions not described, please contact the relevant technical department. Subject to technical modifications.

Electronic Pressure Transmitter HDA 4400 with Flush Membrane ATEX Intrinsically Safe ATEX Dustproof Enclosure ATEX Non-sparking

Description:

The pressure transmitter HDA 4400 in ATEX version has been specially developed for use in potentially explosive atmospheres and is based on the HDA 4000 series.

As with the industrial version, the HDA 4400 in ATEX version has a stainless steel measurement cell with thin-film strain gauge.

The pressure connection is achieved with an all-welded stainless steel front membrane filled internally with a pressure transfer fluid. The process pressure is transmitted hydrostatically to the measurement cell via the pressure transfer fluid.

This device is used for applications in which a standard pressure connection could become blocked, clogged or frozen by the particular medium used. Further applications include processes where the medium changes regularly and any residues could cause mixing or contamination of the media. Intended areas of application are, for example, the oil and gas industry, in mines, or in locations with high levels of dust, e.g. in mills.

Protection types and applications:

Electronic Pressure Transmitter HDA 4700 with Flush Membrane IECEX Intrinsically Safe IECEX Dustproof Enclosure IECEX Non-sparking

Description:

The pressure transmitter HDA 4700 in IECEx Intrinsically Safe version has been especially developed for use in potentially explosive atmospheres and is based on the HDA 4000 series.

As with the industrial version of the HDA 4700, devices with IECEx Intrinsically Safe approval have a field-proven, all-welded stainless steel measurement cell with thin-film strain gauge without internal seal.

The pressure connection is achieved with an all-welded stainless steel front membrane filled internally with a pressure transfer fluid. The process pressure is transmitted hydrostatically to the measurement cell via the pressure transfer fluid.

This device is used for applications in which a standard pressure connection could become blocked, clogged or frozen by the particular medium used. Further applications include processes where the medium changes regularly and any residues could cause mixing or contamination of the media, or in highly viscous media. Intended areas of application are, for example, the oil and gas industry, in mines or in locations with high levels of dust, e.g. in mills.

Protection types and applications:

Notes:

* For design and electrical connection see device dimensions

Accessories:

Appropriate accessories, such as electrical female connectors, can be found in the Accessories brochure.

Dimensions:

Protection types and applications (code): D, C

male electr. conn.
3p +PE EN 175301-803 (DIN 43650)

male electr.
conn. 4p

Protection types and applications (code): 9, A

The Impact protected metal safety sleeve is included. A straight female connector is required for electrical connection. e.g. female connector M12x1, 4 pole, straight, with 3m shielded cable: ZBE 06S-03, Part No. 6098243

Note:

The information in this brochure relates to the operating conditions and applications described. For applications and operating conditions not described, please contact the relevant technical department. Subject to technical modifications.

Electronic Pressure Transmitter HDA 4700 with Flush Membrane ATEX, IECEx, CSA Flameproof Enclosure

Description:

The electronic pressure transmitter HDA 4700 with flush membrane is certified in the ignition protection class Flameproof Enclosure to ATEX, IECEx and CSA. The devices have triple approval, ensuring that they are universally suitable for use in potentially explosive environments around the world. Therefore it is no longer necessary to stock multiple devices with separate individual approvals.

The pressure connection is achieved with an all-welded stainless steel front membrane filled internally with a pressure transfer fluid. The process pressure is transmitted hydrostatically to the measurement cell via the pressure transfer fluid.

This device is used for applications in which a standard pressure connection could become blocked, clogged or frozen by the particular medium used. Further applications include processes where the medium changes regularly and any residues could cause mixing or contamination of the media, or in highly viscous media.

Its main applications are in mining and the oil and gas industry, e.g. in underground vehicles, hydraulic power units (HPU), blow-out preventers (BOPs), drill drives or in lubrication systems.

Protection types and applications:

CSA_{US} Explosion Proof – Seal Not Required

Electro-Mechanical Flow Switch HFS 2100 ATEX Encapsulation for Oils / Viscous Fluids

Description:

The HYDAC HFS 2100 flow switch in ATEX version has been specially developed for use in potentially explosive atmospheres. Like the standard version it is based on the variable area float principle, and can be mounted in any position.

The test medium moves a spring-loaded float in the direction of flow, depending on the flow rate. A fully encapsulated reed contact is fitted to the outside of the instrument and is therefore separate from the flow circuit. When the magnet inside the float reaches the preset position, the reed contact switches.

Intended areas of application are, for example, the oil and gas industry, on gas turbines or in locations with high levels of dust contamination, e.g. in mills.

Protection types and applications:

II 2G Ex mb II T6 / T5
II 2D Ex tD A21 IP67 T80 °C / T100 °C

Medium:

- Oils / viscous fluids

Special features:

- Accuracy $\leq \pm 10\%$ FS
- Viscosity compensation from 30 .. 600 cSt
- Any mounting position
- High level of functional reliability
- High level of switching accuracy
- Stepless switch point setting by user
- High pressure resistance
- Threaded connection

3		N/O contact

Notes on installation:

- The medium must not contain solid particles! We recommend using contamination strainers.
- External magnetic fields can affect the switching contact. Ensure sufficient distance from magnetic fields (e.g. from electric motors)!

Safety instructions:

- The circuits must not incorporate any effective inductance or capacitance.
- The maximum ratings stipulated in the technical data must never be exceeded, not even for a short time.
- To protect the switching contact, a fuse for the circuit must be provided outside the hazardous area, unless the switching unit is connected to an intrinsically safe circuit.
- Unless the device is connected to an intrinsic safe circuit, special safety precautions have to be implemented.
- The device may be used in hazardous areas designated as category 2.
- The device must not be used in areas where there is a possibility that an electrostatic charge can be caused in the plastic housing.
- The device must not be used in machinery, systems or medical apparatus where, in the event of a malfunction, persons, animals or equipment could be harmed or damaged.

Digital Display Unit HDA 5500

Description:

The digital display units in the HDA 5500 series are microprocessor-controlled display and monitoring instruments designed for control panel installation.

Different versions are available with a maximum of 3 analogue inputs, an analogue output (4 .. 20 mA or 0 .. 10V) and up to 4 relay outputs.

The analogue input signals are displayed according to the settings selected by the user.

Each of the relay outputs can be allocated to each of the sensor inputs or to the differential between input 1 and 2.

A PT 100 temperature probe can be connected directly to the instrument. There is also an option for frequency measurement using the HDS 1000 (HYDAC rpm probe), for example to measure the speed of rotating components.

Depending on the model, it is also possible to connect SMART sensors (condition monitoring sensors). SMART sensors are a generation of sensors from HYDAC which can transmit several different measured values.

Special features:

- Digital display of analogue signals
- Clear 4-digit 7-segment LED display
- Up to 3 analogue inputs (4 .. 20 mA, 0 .. 10 V or 0 .. 5 V)
- Accuracy $\leq \pm 0.5 \%$
- Differential measurement possible
- Analogue output (4 .. 20 mA or 0 .. 10 V)
- Up to 4 relay switching outputs
- RS 232 interface
- Voltage supply 12 .. 32 V DC or 85 .. 265 V AC 50 / 60 Hz
- Option for PT100 sensor input or frequency input

Input models:

Output models:

Connection terminals:

Supply voltage:
plug-in terminal block 2 pole, RM 5.08
(cross section max. 2.5 mm²)

Inputs / outputs:
plug-in terminal block 11 pole, RM 3.5
(cross section max. 1.5 mm²)

Relay:
plug-in terminal block 5 pole, RM 5.08
(cross section max. 2.5 mm²)

Technical data:

Display range

Display 4-digit 7-segment LED display, red,
height of digits 14.2 mm
3 LEDs for active sensor, 4 LEDs for switch points

Display range - 999 .. 9999 (user-adjustable)

Display units with background lighting bar, kg/cm², MPa, psi, °C, °F, mA, V, Hz, kN, m, mm, inch, l, l/min, gal, gal/min, 1/min, %, t

Input data

Analogue signal input(s)

Measuring range(s) (up to 3 analogue inputs) select: 4 .. 20 mA, 0 .. 5 V, 0 .. 10 V or 4 .. 20 mA sequential (Modification 006)

Accuracy ≤ ± 0.5 % at 25 °C

PT 100 input

Measuring range - 25 .. 100 °C

Accuracy ≤ ± 0.5 % at 25 °C

Frequency/counter input

Signal threshold 0 .. 0.6 V = LOW, 3 .. 24 V = HIGH

Frequency range 15 Hz to 24 kHz

Output data

Analogue output 4 .. 20 mA, load resistance ≤ 400 Ω or 0 .. 10 V load resistance ≥ 2 kΩ

Accuracy ≤ ± 0.5 % at 25 °C

Rise time 70 ms

Switching outputs

Type 2 or 4 relays each with separate common supply

Switching voltage 0.1 .. 250 V AC

Switching current 9 mA .. 2 A

Switching capacity 400 VA, 50 W
(for inductive load, use varistors)

Life expectancy of switch contacts ≥ 20 million cycles at minimum load
≥ 1 million cycles at maximum load

Reaction time approx. 20 ms

(with switching delay = 0 ms)

Setting range of switch points 1.5 .. 100 % of the pre-set display range

Setting range of the switching hystereses (switch-back points) 0.5 .. 99 % of the pre-set display range

Interface

Serial interface Baud rate 19200 Bauds; 8 data bits;
RS 232 2 stop bits; no parity;
no handshake

Environmental conditions

Nominal temperature range 0 .. +50 °C

Operating temperature range 0 .. +50 °C

Storage temperature range - 40 .. +80 °C

CE mark EN 61000-6-1 / 2 / 3 / 4

Other data

Housing control panel housing 96 x 48 x 109 mm;
control panel cut-out 92 (+0.8) x 45 (+0.6) mm;
front panel thickness 1.25 .. 15 mm;
maximum installation depth 121 mm

Supply voltage 12 .. 32 V DC or 85 .. 265 V AC, 50 / 60 Hz

Power consumption 15 VA at 85 .. 230 V AC – fuse protection 1 AT

Supply of the meas. transmitter 12 V DC ± 1 %; max. 20 mA / analogue input

Residual ripple of supply voltage ≤ 5 %

Weight approx. 320 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.

Model code:

HDA 5 5 0 0 - X - X - XX - 00X

Inputs

- 0 = One analogue input
- 1 = Three analogue inputs
- 2 = One analogue input + frequency input / counter function
- 3 = One analogue input + PT 100 input

Outputs

- 0 = 1 analogue output
- 1 = 1 analogue output + 2 relay outputs
- 2 = 1 analogue output + 4 relay outputs

Supply voltage

- AC = 85 .. 265 V AC
- DC = 12 .. 32 V DC

Modification

- 000 = Standard
- 006 = Model with sequential analogue input for HLB 1300 and CS 1000 (only possible on input model "0" and output model "2")

Portable Data Recorder HMG 500

Description:

The HMG 500 is a portable measuring instrument for simple measuring tasks in fluid technology such as hydraulics, pneumatics, lubrication, process, refrigeration and air conditioning.

Up to two sensors with the **HYDAC Sensor Interface (HSI)** can be connected to the HMG 500 to measure pressure, temperature or flow rate (except for SMART sensors). The HMG 500 automatically recognises these sensors and takes all of the necessary basic settings from each sensor. The measurement values and the corresponding physical unit are displayed on an easy-to-read LCD display.

In addition, the HMG 500 offers a wealth of other advantages over mechanical pressure gauges, for example, for measuring pressure on machines and systems.

The user benefits from a technologically high level of measuring accuracy and dynamics.

The HMG 500 measures values at a very high sampling rate. It can therefore record and display pressure peaks in the maximum value memory or rapid pressure discharges in the minimum value memory, for example.

Furthermore, differential measurements can be carried out using two sensors of a similar type, to calculate pressure drops or temperature differentials.

To further extend the application range, HMG 500 has a function for setting mechanical pressure and temperature switches precisely and reliably.

Compact, simple and versatile - the HMG 500 is an invaluable tool for all those involved in maintenance, commissioning and service.

Special features:

- Portable 2-channel data recorder
- Simple and user-friendly key operation
- Large LCD display including battery status indication
- 2 sensor inputs, automatic sensor recognition
- Measuring range and unit of measurement of the sensors connected to it are recognised automatically
- Zeroing (taring) of the individual measurement channels
- Display of the actual measured values
- Display of the differential (channel A minus channel B)
- Minimum or maximum value indication, with reset function
- Setting device for mechanical pressure and temperature switches

Technical data:

Measurement inputs	2 analogue inputs for HYDAC measurement transmitters with HSI interface (except for SMART sensors**)
Accuracy*	≤ ± 0.1 % FS max.
Functions	<ul style="list-style-type: none">● Automatic recognition of measuring range and unit of measurement● Taring of the measuring channels● Display of the actual meas. value● Min./max. indication● Reset of the min./max. values● Measured values differential channel A - channel B● Display of units, selectable● Setting device for mechanical pressure and temperature switches
Display	4-digit 7 segment LCD display with battery status indication; 2 measurement values incl. unit displayed simultaneously
Measurement unit (depending on the sensors connected to HMG)	Selectable Pressure: bar, psi, MPa Temperature: °C, K, °F Flow rate: l/min, gallon/min (1 US gallon = 3.7853 l)

Accessories:

Appropriate accessories, such as electrical and mechanical connection adapters, power supply, etc. can be found in the Accessories brochure.

Examples of main accessories:

- **Pressure transmitter**
HDA 4000 with HSI interface
Pressure ranges: -1 .. 9 bar, 0 .. 16 bar, 0 .. 60 bar, 0 .. 100 bar, 0 .. 250 bar, 0 .. 400 bar, 0 .. 600 bar
- **Temperature transmitter**
ETS 4000 with HSI interface
Measuring range: -25 .. 100 °C
- **Flow rate transmitter**
EVS 3000 with HSI interface
Measuring ranges: 1.2 .. 20 l/min, 6 .. 60 l/min, 15 .. 300 l/min, 40 .. 600 l/min
- **Sensor simulator**
SSH 1000, ideal for training purposes
- **Electrical connection adapter**
UVM 3000, for mechanical pressure and temperature switches
- **Hydraulic adapters**

Portable Data Recorder HMG 510

Description:

The HMG 510 is a hand-held instrument for simple measurement tasks on hydraulic and pneumatic systems in mobile and industrial applications.

Compact and simple to use, the HMG 510 is an ideal tool for all those involved in maintenance, commissioning and service.

Up to two sensors with the **HYDAC Sensor Interface (HSI)** can be connected to the HMG 510.

Sensors are available to measure pressure, temperature and flow rate as well as sensors for condition monitoring (also known as SMART sensors). Some examples of SMART sensors are the HYDACLAB® Oil Condition Sensor, the AS 1000 AquaSensor and the CS 1000 Contamination Sensor.

The HMG 510 automatically recognises these sensors and takes all the necessary basic settings from each sensor.

The measurement values and the corresponding physical unit are displayed on an easy-to-read LCD display.

In addition to this, the HMG 510 enables measured values which have been saved in the SMART sensors to be uploaded to a PC.

With the aid of the HYDAC PC software "CMWIN", the measurement data stored in the SMART sensors can be displayed on a PC screen in the form of a graph, then analysed, edited and saved. The HMG has a standard integrated USB port to enable this data transfer.

To further extend the application range, the HMG 510 has a function for setting mechanical pressure and temperature switches precisely and reliably.

Special features:

- Portable 2-channel data recorder
- Simple and user-friendly key operation
- Large LCD display including battery status indication
- 2 sensor inputs, automatic sensor recognition
- Specially designed to display measured values from condition monitoring sensors (SMART sensors)
- Measuring range and unit of measurement of the sensors connected to it are recognised automatically
- Zeroing (taring) of the individual measurement channels
- Display of the actual measured values
- Display of the differential (channel A minus channel B)
- Min. or max. value indication, with reset function
- Setting device for mechanical pressure and temperature switches
- USB port

Technical data:

Portable Data Recorder HMG 3010

Description:

The HMG 3010 is an impressive, top performance portable measuring and data recording device.

Automated setting procedures, a simple, self-explanatory operator guide and many comprehensive functions ensure the operator is able to carry out a wide range of measuring tasks within a very short time and to work in a way which is both time-saving and cost-effective. The HMG 3010 thus quickly becomes a reliable and helpful tool in the working environment of service, maintenance, development, test rig technology, quality assurance or commissioning of systems and machines.

The HMG 3010 is designed primarily to record pressure, temperature and flow rate values which are the standard variables in hydraulics and pneumatics. For this purpose, special sensors are available, with which the variable, the measurement range and unit are automatically detected by the HMG 3010. The device also offers measurement inputs for standard sensors with current and voltage signals. In addition to the analogue inputs, the HMG 3010 also has two digital inputs (e.g. for frequency or rpm measurements).

The ability to connect the HMG 3010 to a CAN bus and thus to display messages from the CAN bus completes the range of applications.

Due to the wide range of functions and its simple handling, the HMG 3010 is just as appropriate for users who take measurements only occasionally as it is for professionals for whom measuring and documentation are routine.

The update capability of the HMG 3010 via the integral USB port ensures that the user can benefit from future upgrades of the device software.

Special features:

- Simple, user-friendly operation
- Practical, robust design
- Large, full-graphics colour display
- Quick and independent basic setting of the device through the use of automatic sensor recognition
- Up to 10 sensors can be connected simultaneously
- Up to 32 measurement channels can be displayed at a time
- Measuring rates up to 0.1 ms
- Extended voltage measurement -10 .. +10 V and 0 .. 50 V
- Can be connected to a CAN bus
- Very large data memory for archiving measurement curves
- Various measurement modes:
 - Normal measuring
 - Fast curve recording
 - Long term measuring
- 4 independent triggers, can be logically linked
- PC connection
 - USB
 - RS 232
- Convenient visualisation, archiving and data processing using the HMGWIN 3000 and CMWIN software supplied

Function:

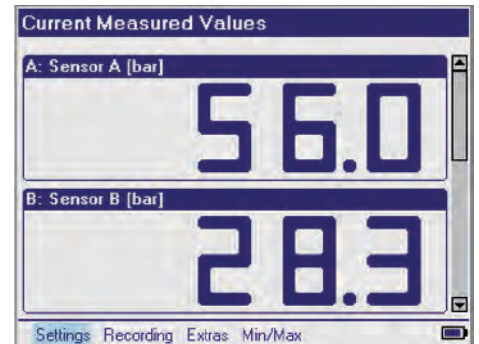

- Clear and graphical selection menus guide the operator very simply to all the device functions available. A navigation pad on the keypad ensures rapid operation.
- The HMG 3010 can monitor signals from up to **ten sensors simultaneously**. For this there are 5 robust standard input sockets. By using Y adapters, the number of inputs can be doubled individually to make a total of between 6 and 10.
- Up to 8 sensors can be connected to 4 of these input sockets:
 - 8 sensors (e.g. for pressure, temperature, and flow rate) with the special digital HSI interface (HYDAC Sensor Interface); this means the basic device settings (measured variable, range, and unit of measurement) are undertaken automatically
 - 8 standard analogue sensors with current and voltage signals
 - 4 Condition Monitoring sensors* (SMART sensors); again, the basic device settings are carried out automatically
- Frequency measurements, counter functions, or triggers for data logging can be implemented via the fifth input socket with 2 digital inputs.
- For extended voltage measurement, the HMG 3010 offers the possibility of recording signals of 0 .. 50 V on two inputs and a signal of -10 .. +10 V on one input (e.g. proportional valve control).
- The connection to a **CAN bus** in conjunction with the CAN adapter ZBE 3010 makes it possible to record CAN messages (e.g. motor speed, motor oil pressure) in combination with measured data from the hydraulic system.
- HYDAC CAN bus sensors connected directly to the CAN adapter can be parameterized using the HMG 3010 (node ID and baud rate)
- All input channels can operate simultaneously at a **measurement rate** of 0.5 ms (1.0 ms for SMART sensors). To record highly dynamic processes, 2 analogue inputs are capable of recording measured values of 0.1 ms.
- The most impressive function of the HMG 3010 is its ability to record dynamic processes "online", i.e. in real-time, as a **measurement curve** and to render them as graphs in the field.

- The **data memory** for recording curves or logs can hold up to 500,000 measured values. At least 100 such full-length data records can be stored in an additional archive memory.
- For specific, **event-driven curves or logs**, the HMG 3010 has four independent triggers, which can be linked together logically.
- It is also possible to **determine differential values** between different input signals from sensors. Particularly when measuring flow rate by means of differential pressure measurement across a measuring orifice, the accuracy can be significantly improved by using a stored calibration curve. To generate such calibration curves, the HMG 3010 has an easy-to-use handheld recording function.
- User-specific device settings can be stored and re-loaded at any time as required. This means that repeat measurements can be carried out on a machine again and again using the same device settings.

Name	Savedt
power unit 10	28.06.06 12:44:58
injection machine 17	28.06.06 12:44:41
hydraulic press	28.06.06 12:43:04
power unit	28.06.06 12:42:03
injection machine 12	28.06.06 12:41:14

- Measured values, curves or texts are visualized on a **full-graphics colour display** in different selectable formats and display forms.

- Numerous useful and easy-to-use **auxiliary functions** are available, e.g. zoom, ruler tool, differential value graph creation and individual scaling, which are particularly for use when analysing the recorded measurement curves.

- The HMG 3010 communicates with a PC via the built-in USB port or RS 232 port.

HMGWIN 3000:

The PC software HMGWIN 3000 is also supplied with the device. This software is a convenient and simple package for analysing and archiving curves and logs which have been recorded using the HMG 3010, or for exporting the data for integration into other PC programs if required. It is also possible to operate the HMG 3010 directly from the computer, to undertake basic settings, and to start measurements online and display them directly on the PC screen as measurement curve progressions.

CMWIN:

The HYDAC software CMWIN is also supplied with the device. This software enables you to communicate directly with SMART sensors *) connected to the HMG 3010 from your PC.

Both programs can be run on PCs with Windows Vista / XP / 2000 and Windows 7 operating systems.

Some examples of the numerous useful additional functions:

- **Transfer and archiving** of measurements recorded using the HMG 3010
- Display of the measurements in graph form or as a table

- **Zoom function:** Using the mouse, a frame is drawn around an interesting section of a measurement curve, which is then enlarged and displayed.

Fig.: Zoomed section of measurement curve

- **Accurate measurement** of the curves using the ruler tool (time values, amplitude values, and differentials)

- Individual **comments** and measurement information can be inserted into the graph

- **Overlay** of curves, for example to document the wear of a machine (new condition/current condition)

- Using mathematical operations (calculation functions, filter functions) new curves can be added.
- Snap-shot function: comparable to the function of a digital camera, a picture can be taken immediately of any graph and saved as a jpg file.
- A **professional measurement report** can be produced at the click of a mouse: HMGWIN 3000 has an automatic layout function. Starting with a table of contents, all recorded data, descriptions, and graphics and/or tables are combined into a professional report and saved as a pdf file.
- **Online function:** Starting, recording, and online display of measurements (similar to the function of an oscilloscope)

- Change of axis assignment of the recorded measurement parameters in graph mode (e.g. to produce a p-Q graph)

*) SMART sensors (Condition Monitoring Sensors) are a generation of sensors from HYDAC which can provide a variety of different measured values.

Technical data:

Meas. inputs	● 4 input sockets (channels A-H) for connecting up to 8 analogue sensors or up to 4 SMART sensors.
	● 1 input socket with 2 digital inputs (channels I-J) and one voltage input of -10 V to +10 V (shown on channel H) Sensors are connected using standard M12x1 male connectors (5 pole)

Order details:

HMG 3010 - 000 - X

Operating manual and documentation

D = German
E = English
F = French

Items supplied

- HMG 3010
- Power supply for 90 .. 230 V AC
- Operating manual
- CD-ROM containing USB drivers, HMGWIN 3000 and CMWIN software
- USB connection cable

Accessories:

- CAN adapter, required for CAN bus operation (to be ordered separately)
ZBE 3010 CAN adapter for HMG 3010
Material No. 921238

- Additional accessories, such as electrical and mechanical connection adapters, power adapters, etc. can be found in the "Accessories - Service devices" catalogue section

Dimensions:

Note:

The information in this brochure relates to the operating conditions and applications described.
For applications or operating conditions not described, please contact the relevant technical department.
Subject to technical modifications.

Electronic Pressure Transmitter with HSI Sensor Recognition HDA 4748-H

Description:

The pressure transmitter HDA 4748-H with HSI sensor recognition has been specially developed for use in conjunction with HYDAC measuring instruments HMG 500, HMG 510, HMG 3000, HMG 3010 and CMU 1000. For data transmission, the HDA 4748-H has an HSI interface (HYDAC Sensor Interface).

The HSI sensors are automatically recognised via the HSI interface by the above-mentioned HYDAC measuring instruments and all necessary basic device settings are taken from each sensor.

Like all pressure transmitters of the HDA 4700 series, the HDA 4748-H also has a very accurate and robust sensor cell with a thin-film strain gauge on a stainless steel membrane. It combines excellent technical specifications with a very compact design.

Special features:

- Fully automatic recognition by, and voltage supply from, HYDAC measuring instruments HMG 500, HMG 510, HMG 3000, HMG 3010 or CMU 1000
- Automatic transfer of measuring range, measured value and measurement unit
- Accuracy $\leq \pm 0.25\%$ FS typ.
- Highly robust sensor cell
- Very small temperature error
- Excellent EMC characteristics
- Excellent long term stability
- Very compact design

Electronic Temperature Transmitter with HSI Sensor Recognition ETS 4148-H

Description:

The electronic temperature transmitter ETS 4148-H with HSI sensor recognition has been specially developed for use in conjunction with HYDAC measuring instruments HMG 500, HMG 510, HMG 3000, HMG 3010 and CMU 1000.

For data transmission, the ETS 4148-H has an HSI interface (HYDAC Sensor Interface). The HSI sensors are automatically recognised by the above-mentioned HYDAC measuring instruments and all necessary basic settings are taken from each sensor.

Like all temperature transmitters of the ETS 4000 series, the ETS 4148-H features a robust design and excellent EMC properties. Based on corresponding evaluation electronics, the temperature sensor is designed to measure temperatures in the range -25 °C to $+100\text{ °C}$.

Special features:

- Fully automatic sensor recognition by, and voltage supply from, HYDAC measuring instruments HMG 500, HMG 510, HMG 3000, HMG 3010 and CMU 1000
- Automatic transfer of measuring range, measured value and measurement unit
- Accuracy $\leq \pm 0.8\%$ FS
- Robust design
- Excellent EMC characteristics
- Excellent long term stability
- Standard protection class IP 67

Technical data:

Electronic Flow Rate Transmitter with HSI-Sensor Recognition

EVS 3100-H

EVS 3110-H

Description:

The flow rate transmitters in the series EVS 3100-H and EVS 3110-H with HSI sensor recognition have been specially developed for use in conjunction with HYDAC measuring instruments HMG 500, HMG 510, HMG 3000, HMG 3010 and CMU 1000.

For data transmission, the EVS 31x0-H has an HSI interface (HYDAC Sensor Interface).

The HSI sensors are recognised automatically via the HSI interface by the above-mentioned HYDAC measuring instruments, and all the necessary basic settings are taken from each instrument.

As with all flow rate transmitters in the series EVS 3100 and EVS 3110, the EVS 31x0-H also operates according to the turbine principle. The speed of an impeller turning in the fluid flow is measured and converted into an electronic signal.

Special features:

- Fully automatic recognition by, and voltage supply from, HYDAC measuring instruments HMG 500, HMG 510, HMG 3000, HMG 3010 or CMU 1000
- Automatic transfer of measuring range, measured value and measurement unit
- Viscosities of 1 .. 100 cSt
- Additional connection of temperature and / or pressure transmitters possible

Technical data:

Input data	
Measuring ranges ¹⁾ and operating pressure	
EVS 3108-H-0020	1.2 .. 20.0 l/min 400 bar

Condition Monitoring Unit CMU 1000

Description:

The CMU1000 is an electronic evaluation unit designed for permanent online condition monitoring of machines and systems.

In order to achieve this, the device must be supplied with relevant data which is recorded by the sensors connected to it. This recorded data (processed or unprocessed) can be transferred by the CMU 1000 via different ports or as an analogue value to other devices and/or monitoring levels.

The CMU 1000 processes the application program stored in it continuously and cyclically like a PLC. The user creates this program simply and conveniently on a PC using the **CM Editor** developed for this purpose and then uploads it to the CMU 1000.

The **CM Editor** is part of the HYDAC PC software **CMWIN Version V03 or higher** (supplied) and it provides the various tools and functions in accordance with IEC 61131 for designing, integrating and testing the user program using "drag and drop" operations.

For status indication and for displaying messages and values on the device itself, there is a back-lit LCD display and three different coloured LEDs.

The CMU 1000 is operated and data is input on site using a built-in keypad within the menu structure of the device.

The CMU 1000 is designed for use in machines in both the stationary and mobile sectors.

It is possible to connect easily to higher-level control, monitoring and bus systems using the built-in interfaces or in combination with an additional coupling module.

Special features:

- 8 input channels for HSI or SMART sensors
- 8 input channels for analogue sensors
- 4 input channels for digital signals
- 2 output channels for analogue signals
- 4 relay switching outputs with change-over contacts
- USB slave port for PC connection
- USB master port for storing measured data on a standard USB memory stick
- Ethernet interface
- RS 232 interface
- 2-line LCD display (2 x 16 characters) to display measured data and status and/or error messages
- 3 user-programmable LEDs in different colours, for status indication (red, yellow, green)
- Simple operation using navigation pad
- Creation of customised application program using the PC software **CMWIN** supplied

CM Editor:

The CM Editor is part of the HYDAC PC software **CMWIN**, Version 03 or higher, and provides a wide variety of tools and functions for designing, integrating and testing the application program. An application program consists of many individual functions which can be linked together. During subsequent operation, this user program is processed as for a PLC, cyclically. The program is created according to the IEC 61131 (the standard for PLC programming).

The screenshot shows the CM Editor interface with the following components:

- Function properties:**
 - Input1:** Boolean input value
 - Function:** Boolean input value
 - Specific properties:** Starting value: On, Functionality: Switch
 - Comment:** (Empty)
- Function list:**

Function	Name	Caption

Boolean input value	Input1	Start
Display message	Aktion1	Text
Display message	Aktion10	Text
Display message	Aktion11	Text
Display message	Aktion12	Text
Display message	Aktion13	Text
Display message	Aktion14	Text
- Linked functions:** A ladder logic diagram showing a sequence of 'Setzen Text' (Set Text) functions (e.g., Setzen Text 1a to 1g, 2, 3, 4) connected to 'Text' outputs (e.g., Text 1a to 1g, 2, 3, 4). Each function is represented by a green box with 'RS' and a 'Disp' button.
- Functions sidebar:** Contains toolbars for Data sources, Calculations, Numerical operations, Conditions, Links, Boolean operations, and Result values/actions.

The File menu is open, showing the following options:

- Display
- Simulate
- Transfer into device
- Receive from device
- Deleting in the device
- Online debugging

The Device menu is open, showing the following options:

- Apply from file
- Apply from device
- Uninstall
- Saving to a file...
- Display

The Simulation window shows the following data:

Sources	Input value	Actions	Name	Value	Cycle	Time
Eingabe2	1	Aktion1	not triggered			
Input1	1	Aktion17	not triggered			
		Aktion18	not triggered			
		Aktion19	not triggered			

At the bottom, it shows: Cycle: 0. Buttons: Perform cycle, start autom. cycle, end autom. cycle, Close.

The CMWIN window title is "CMWIN" and the content shows the program name "CM Program - Programm CMU 1000-4_Eng.hecmp". The variables listed are:

- Eingabe2: Boolean input value(1;"Start 2";0)
- Input1: Boolean input value(1;"Start";0)
- Intervall1: Time sensor(1)
- Pulse generation1: Pulse generation(Input1)
- Flankenerkennung?: Pulse generation(Eingabe2?)

Buttons: Print, Close.

Technical data:

Supply

Input voltage	18.0 .. 35.0 V DC
Current consumption	max. 1.5 A (3.5 A when CSI-F-10 connected)
Reverse pol. protect.:	-30 V
Isolation voltage	+40 V

Connection of sensors

Up to 8 sensors with HSI functionality or up to 8 SMART sensors¹⁾ and in addition up to 8 analogue sensors and up to 4 digital sensors
4 x digital / 2 x digital + 2 x frequency / 3 x digital + 1 x frequency

Analogue inputs

Channel I and J (Accuracy)	4 .. 20 mA ($\leq \pm 0.1$ % FS max.) 0 .. 20 mA ($\leq \pm 0.1$ % FS max.) 0.5 .. 4.5 V ($\leq \pm 0.1$ % FS max.) 0 .. 10 V ($\leq \pm 0.1$ % FS max.)
Channel K and L (Accuracy)	4 .. 20 mA ($\leq \pm 0.1$ % FS max.) 0 .. 20 mA ($\leq \pm 0.1$ % FS max.) 0.5 .. 4.5 V ($\leq \pm 0.1$ % FS max.) 0 .. 50 V ($\leq \pm 0.1$ % FS max.) -10 .. +10 V ($\leq \pm 0.2$ % FS max.) L only!
Channel M and N (Accuracy)	4 .. 20 mA ($\leq \pm 0.1$ % FS max.) 0 .. 20 mA ($\leq \pm 0.1$ % FS max.) 0.5 .. 4.5 V ($\leq \pm 0.1$ % FS max.)
Channel O and P (Accuracy)	4 .. 20 mA ($\leq \pm 0.1$ % FS max.) 0 .. 20 mA ($\leq \pm 0.1$ % FS max.) 0.5 .. 4.5 V ($\leq \pm 0.1$ % FS max.) -10 .. +10 V ($\leq \pm 0.2$ % FS max.) P only!

Digital inputs

Quantity	4, of which 2 are for frequency measurement (Channel Q and R)
Trigger threshold	approx. 2 V
Dynamics	30 kHz

Measurement channels

Quantity	32 - A measurement channel can be a value of a connected sensor (also a subchannel of a SMART sensor) or a value derived (calculated) from sensor data.
----------	---

Analogue outputs

Quantity	2
Type	individually selectable, current (4 .. 20 mA) or voltage (0 .. 10 V)

Digital outputs

Quantity	4
Type:	Relay output, change-over contact
Switching capacity	30V DC / 1 A

Calculation unit

Analogue value recording	12 bit A/D converter
--------------------------	----------------------

Interfaces

Keypad	- 4 arrow keys (up, down, right, left) - OK key - ESC key
Display (back-lit)	- Two-line LCD display (2 x 16 characters) - Additional indication of status information via 3 different coloured LEDs is possible
USB Mass Storage Device ²⁾	- USB 1.1 / USB 2.0 full speed port for connecting a mass storage device (memory stick) - Female connection type "A".
Ethernet, supported protocols	- RJ 45 8/8 Ethernet interface - HTTP Server - TCP/IP
Serial Interface 0 (UART 0)	- Implementing an RS 232 or an HSI master interface - Change-over user-programmable - Connection via plug-in terminals - No handshake lines
HSI Master	Cascading the CMU
USB Device	- USB 1.1 / USB 2.0 full speed port for connecting a PC / Notebook to configure the CMU - Female connection type "B".
CAN Bus Interface	Can be integrated as an option

Cycle time

Independently determined at start of program
Display of actual cycle time is possible in the CM Editor

Operating and environmental conditions

Operating temperature	-20 .. +70 °C
Storage temperature	-30 .. +80 °C
Relative humidity	0 .. 70 %, non-condensing

Dimensions and weight

Dimensions	approx. 212 x 106 x 36 mm
Weight	approx. 600 g

Technical standards

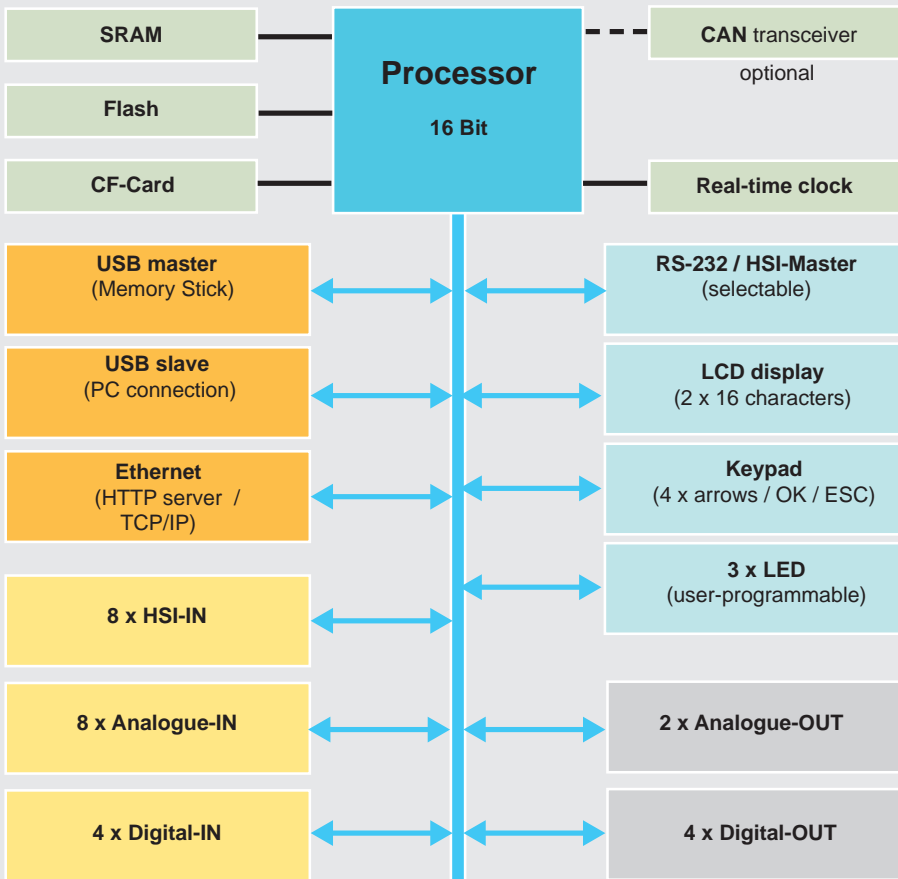

EMC	EN 61000-6-1 / 2 / 3 / 4
Safety	EN 61010
Protection class	IP 40

Note:

¹⁾ SMART sensors (Condition Monitoring Sensors) are a generation of sensors from HYDAC, which can provide a variety of different measured values.

²⁾ Recorded data from the CMU can be transferred to a memory stick via this interface. The USB Host supports mass storage devices exclusively.

Appropriate accessories, such as sensor lines for the electrical connection can be found in the Accessories brochure.

Dimensions:

Description:

The condition monitoring interface module CSI-B-2 is another element in the HYDAC condition monitoring concept which connects the sensor level with the interpretation level. It is an all-purpose electronic instrument for converting the HSI signal from HYDAC SMART sensors into a standardised PC signal. Using the HYDAC "CMWIN" PC software, it is therefore possible to read the data and measured values of the connected SMART sensor directly.

The long-term memory can also be read as well as adjustments made and parameters set on the connected sensor (the setting options depend on the particular sensor).

The HSI signal can be converted either into an RS 232 or an RS 485 signal. The CSI-B-2 can be connected to any PC via the RS 232 interface (and possibly an additional standard RS 232/USB adapter¹⁾). The RS 485 interface and appropriate additional coupling modules can also be used to connect to higher-level control and/or bus systems.

Special features:

- 1 input channel for HYDAC SMART sensors
- Direct connection of the sensor via screw-type terminals
- Indication of the active interface via LED (RS 232 / RS 485)
- Very compact design
- Suitable for mounting on standard DIN rails
- Protection class IP 40

¹⁾ RS 232/USB adapter is not supplied with the device.

Condition Monitoring Interface Module CSI-B-2

Technical data:

Input data	
HSI interface	HYDAC Sensor Interface for digital linking of SMART sensors ¹⁾ - Male X2
Output data	
Signal output	switchable: RS 485 half-duplex or RS 232 - Male X1 (RS 485) - SUB-D 9 pole female (RS 232)
Environmental Conditions	
Operating temperature range	-25 .. +85 °C
Storage temperature range	-30 .. +85 °C
Relative humidity	0 .. 70 %, non-condensing
CE mark	EN 61000-6-1 / 2 / 3 / 4
Protection class to IEC 60529	IP 40
Other data	
Supply voltage of the module	18 .. 35 V DC (male X1)
Current consumption (module + sensor)	30 mA to 300 mA max. (depending on the supply voltage and the connected sensor)
Sensor supply	15 V DC ± 5 % / 300 mA max. at 23 °C (male X2)
Electrical connection	
Cross-section of connection	Max. 1.5 mm ²
X1 : Module supply + RS 232 / RS 485	Male terminal block, 8 pole RM 3.5
X2 : Sensor supply + HSI	Male terminal block, 5 pole RM 3.5
SUB-D: RS 232	9 pole female with thumbscrews
Conversion mode options	Option HSI - RS 232 or HSI - RS 485 via jumper (bridge): X1.3 - X1.4 open: HSI - RS 232 X1.3 - X1.4 closed: HSI - RS 485
Indication of active conversion mode	Green LED: HSI - RS 232 Yellow LED: HSI - RS 485
Dimensions and weight	
Housing	approx. 55 x 106 x 34 mm Housing to be mounted on rails (35 mm) to DIN EN 60715 TH 35 (formerly DIN EN 50022)
Weight	~ 140 g

Note: Reverse polarity protection of the supply voltage, excess voltage, override and short circuit protection are provided.

¹⁾ SMART sensors (Condition Monitoring Sensors) are a generation of sensors from HYDAC, which can provide a variety of different measured values.

Oil Condition Sensor HYDACLAB® HLB 1300

Description:

The HYDACLab® HLB 1300 is a multifunctional sensor for online condition monitoring of standard and bio oils in stationary and mobile applications.

The user is thus informed in real time of changes in the fluids and can take immediate action in the case of deteriorating operating conditions.

Assertions can be made about the condition of an oil, e.g. ageing or mixing with other fluids, on the basis of the measured values for the relative change in dielectric constant, the saturation level and the temperature.

These measurements are available as sequential analogue signals and switching signals at the electrical output of the HYDACLab® (e.g. for activating warning devices or alarms).

The measured values can be displayed on various HYDAC display and measurement devices.

Special features:

- Online condition monitoring of oils
- Applications in industrial and mobile sectors
- Analogue output signal for:
 - Saturation level
 - Temperature
 - Rel. change in dielectric constant
- Switching output
- Compact design
- Simple cartridge mounting

Technical data:

Input data	
Rel. humidity	0 .. 100 % saturation
Temperature	-25 .. +100 °C
Dielectric constant (ϵ_R)	1 .. 10
Operating pressure	< 50 bar
Pressure resistance	< 600 bar
Flow velocity	< 5 m/s
Output data - Saturation level	
Output signal	4 .. 20 mA (0 .. 100 %)
Calibration accuracy	$\leq \pm 2$ % FS max.
Accuracy ¹⁾	$\leq \pm 3$ % FS typ.
Output data - Temperature measurement	
Output signal	4 .. 20 mA (-25 .. +100°C)
Accuracy	$\leq \pm 3$ % FS max.
Output data - Relative change in dielectric constant (ϵ_R)	
Output signal	12 mA \pm 8 mA (± 30 % of IV)
Accuracy ²⁾	see below
Switch output	
Signal 1 (N/C)	PNP switching output 0.5 A max. switching level $\geq U_B - 4$ V
Default warning level SP1 Humidity	≥ 85 %
Default warning level SP1 Temperature	≥ 80 °C
Default warning level SP1 Dielectric constant	± 15 % (temperature compensated)
Environmental conditions	
Nominal temperature range	+20 .. +80 °C
Storage temperature	-40 .. +90 °C
Fluid compatibility	Mineral oils HLP (HLP-D on request) Esters: HEES, HETG Seal material: FPM
CE mark	EN 61000 - 6 - 1 / 2 / 3 / 4
Protection class to IEC 60529	IP 67
Other data	
Supply voltage U_B	10 .. 36 V DC
Residual ripple of supply voltage	≤ 5 %
Mechanical connection	G $\frac{3}{4}$ DIN 3852 E
Torque value	30 Nm
Electrical connection	M12x1, 5 pole
Housing	Stainless steel
Weight	~ 205 g

Note: Reverse polarity protection, short circuit protection provided.

FS (Full Scale) = relative to complete measuring range **IV (Initial Value)**

¹⁾ The max. accuracy achievable when measuring relative humidity is heavily dependent on the type of fluid or fluid additive. More precise information on this is available on request.

²⁾ The accuracy achievable when measuring the relative change in dielectric constant is dependent on the application, the type of oil and the individual calibration of the sensor. Detailed information on this is available on request.

Order no.: 920930

Information on other read-out options can be found on our website at www.hydac.com or please contact your HYDAC representative.

AquaSensor AS 1000

Description:

The AquaSensor AS 1000 is the culmination of continued development of the successful AS 2000 series for online detection of water in oils, in particular as an OEM sensor for fluid conditioning monitoring. It measures the degree of saturation and the temperature of the fluid.

In the analogue output version, the AS 1000 transmits the values for the degree of saturation and the temperature as a 4 .. 20 mA signal.

In the version with 2 switch outputs, the AS 1000 can be configured individually using the HYDAC service instrument HMG 3010, the Condition Monitoring Unit CMU 1000 and the interface module CSI-B-2.

The following parameters can be adjusted:

- Saturation level / temperature
- Switch points
- Switch mode of the switch outputs
- Switching direction
- Switch delay times

The AS 1000 therefore enables hydraulic and lubrication oils to be monitored accurately, continuously and online.

Special features:

- Reliable due to its compact and robust design
- Cost-effective sensor, also for use in OEM applications
- Not necessary to calibrate to different types of oil
- Pressure-resistant also during pulsations
- Wide fluid temperature range
- Individual configuration
- Early detection of water problems thereby preventing breakdowns and unnecessary interruption to operations.

Technical data:

Input data

Saturation level	0 ... 100 %
Temperature	-25 .. 100 °C
Operating pressure	-0.5 .. 50 bar
Burst pressure	≤ 630 bar
Mechanical connection	G3/8 A DIN 3852
Torque value	25 Nm
Parts in contact with medium	Mech. connection: Stainless steel / Vacuum-metallized ceramic Seal: FPM or EPDM

Output data

Pin 2: Saturation level

Output signal	4 .. 20 mA (corresponds to 0 .. 100 %) $R_{Lmax} = (U_B - 10 V) / 20 \text{ mA} [k\Omega]$ or switch output (configurable)
Calibration accuracy	≤ ± 2 % FS max.
Accuracy in media measurements	≤ ± 3 % FS typ.
Pressure dependency	± 0.2 % FS / bar

Pin 4: Temperature

Output signal	4 .. 20 mA (corresponds to -25 .. 100 %) $R_{Lmax} = (U_B - 10 V) / 20 \text{ mA} [k\Omega]$ or switch output (configurable)
Accuracy	≤ ± 2 % FS max.

Pin 5:

HSI (HYDAC Sensor Interface)
Automatic sensor recognition

Switch outputs

Type	PNP transistor outputs (configurable as N/O or N/C)
Switching current	max. 1 A per switch output

Environmental conditions

Compensated temperature range	0 .. +90 °C
Operating temperature range ¹⁾	-40 .. +100 °C / -25 .. +100 °C
Storage temperature range	-40 .. +100 °C
Fluid temperature range ¹⁾	-40 .. +125 °C / -25 .. +125 °C
Viscosity range	1 .. 5000 cSt
Flow velocity	< 5 m/s
Fluid compatibility	mineral oil based fluids, synthetic and natural esters

CE mark

AquaSensor AS 3000

Description:

The AquaSensor AS 3000 with an integrated digital display is based on the proven AS 1000 series for the online detection of water in oils, particularly as a sensor for Condition Monitoring. The device has 2 switch outputs and one switchable analogue output signal (4 .. 20 mA or 0 .. 10 V). The AS 3000 detects the water saturation level and temperature of the fluid and transmits the values in the form of an analogue or switching signal. The display shows the actual measured values.

All settings offered by the AS 3000 are grouped in 2 clearly-arranged menus.

The following parameters can be adjusted:

- Saturation level / temperature
- Switch points
- Switch mode of the switch outputs
- Switching direction
- Switch delay times

The AS 3000 thus enables hydraulic and lubricating oils to be monitored accurately, continuously and online.

Special features:

- 4-digit digital display
- Optimum alignment - can be rotated in two axes
- Reliable due to its robust design
- Not necessary to calibrate to different types of oil
- Pressure-resistant, also during pulsations
- Wide fluid temperature range
- Individual configuration
- User-friendly due to key programming
- Early detection of water problems thus preventing faults and unnecessary interruptions to operations.

Technical data:

Input data

AquaSensor AS 3000 with IO-Link Interface

Description:

The AS 3000 with its IO Link communication interface and integrated digital display is used for the online detection of water in oils, particularly as a sensor for condition monitoring. In addition, the AS 3000 measures the temperature of the operating fluid.

The instrument has a switching output and additional output that can be configured as switching or analogue (4 .. 20 mA or 0 .. 10 V).

Compared with the standard version, the IO-Link interface enables bidirectional communication between the device and the control. Parameterisation and cyclical transmission of process and service data is therefore possible.

The AquaSensor AS 3000 with communication interface IO-Link according to specification V1.1 has been specially designed to connect sensors in automation systems.

Typical fields of application are machine tools, handling and assembly automation, intralogistics or packaging industry.

Special features:

- IO Link interface
- 1 PNP transistor output
- Additional signal output, can be configured as PNP transistor switching output or analogue output
- Not necessary to calibrate to different types of oil
- Wide fluid temperature range
- 4-digit display
- Display rotates in two planes for optimal alignment

Technical data:

Input data	
Saturation level	0 ... 100 %

Electronic Contamination Switch EY-1356

Description:

The contamination switch series EY-1356 works as a warning element in hydraulic systems and gearboxes and has been developed by HYDAC ELECTRONIC to meet the special requirements of our customers.

The sensor detects and attracts metal ferromagnetic particles in oil or in other hydraulic fluids. The accumulation of particles generates a switching signal (change in the ohmic resistance). The contamination sensor thus provides an early warning of possible wear. Substantial damage on bearings and gear wheels, for instance, can therefore be avoided.

The sensor is available with different mechanical and electrical connections and can be integrated into almost any application.

Special features:

- Simple design
- Robust design
- Standard connection types

Technical data:

Maximum switching voltage	30 VDC
Maximum switching current	200 mA
Maximum oil pressure abs.	6 bar (16 bar)
Holding power of the permanent solenoid	~ 1.5 W
Ambient temperature	-25 °C .. +90 °C
Protection class to IEC 60529	
DEUTSCH male connector DT04 2 pole	IP67
Integrated male connector according to EN175301-803/ ISO4400	IP65
Mating connector supplied	
DEUTSCH male connector DT04 2 pole	no
Integrated male connector according to EN175301-803/ ISO4400	yes
Max. torque value	
M14x1.5	15 Nm
M18x1.5	25 Nm
M22x1.5	60 Nm
M26x1.5	70 Nm
M33x2	140 Nm
Installation position	We recommend an "upside-down" mounting position, i.e. connector or cable outlet pointing downwards.
The contamination switch is supplied with seal ring DIN 3896 NBR.	

Functional principle / diagram:

The permanent solenoid at the measuring surface of the contamination switch attracts the ferromagnetic particles from the passing oil. The increased accumulation of particles forms an electrical bridge between the permanent solenoid and the adjacent metal contact. The resulting switching signal can, for instance, activate a warning function or switch off the system.

Electronic Pressure Transmitter HDA 8700

(Minimum order quantity 500 units)

Description:

The pressure transmitter series HDA 8700 has been specifically developed for the OEM market, e.g. in mobile applications. Like most of our pressure transmitter series, the HDA 8700 is based on a robust, long-life thin-film sensor.

All parts (sensor and pressure connection) which are in contact with the fluid are made of stainless steel and are welded together. This means that there are no sealing points in the interior of the sensor and the possibility of leakage is excluded.

The pressure transmitters are available in various pressure ranges from 0 .. 40 bar to 0 .. 600 bar. For integration into modern controls, standard analogue output signals are available, e.g. 4 .. 20 mA, 0 .. 5 V, 1 .. 6 V or 0 .. 10 V. Ratiometric output signals are also available.

For the electrical connection, various integrated connections are available.

A basic accuracy of max. $\leq \pm 0.5\%$ FS, combined with a small temperature drift, ensures a broad range of applications for the HDA 8700.

Special features:

- Accuracy $\leq \pm 0.25\%$ FS typ.
- Outstanding performance in terms of temperature effect and EMC
- Very compact design
- ECE type approval  (approved for road vehicles)

Technical data:

Input data	
Measuring ranges	40; 60; 100; 160; 250; 400; 600 bar
Overload pressures	80; 120; 200; 320; 500; 800; 1000 bar
Burst pressures	200; 300; 500; 800; 1250; 2000; 2000 bar
Mechanical connection (Torque value)	G1/4 A DIN 3852 (20 Nm) 7/16-20 UNF 2A (15 Nm) 9/16-18 UNF 2A (20 Nm) each with orifice 0.5 mm
Parts in contact with medium	Mech. conn.: Stainless steel Seal: FPM
Output data	
Output signal	e.g.: 4 .. 20 mA, 0 .. 5 V, 1 .. 6 V, 0 .. 10 V, ratiometric: 0.5 .. 4.5 V for $U_B = 5$ V DC (10 .. 90 % $U_B \pm 5\%$), etc.
Accuracy to DIN 16086	$\leq \pm 0.25\%$ FS typ.
Max. setting	$\leq \pm 0.5\%$ FS max.
Accuracy at min. setting (B.F.S.L.)	$\leq \pm 0.15\%$ FS typ. $\leq \pm 0.25\%$ FS max.
Temperature compensation	$\leq \pm 0.01\%$ FS / °C typ.
Zero point	$\leq \pm 0.02\%$ FS / °C max.
Temperature compensation Over range	$\leq \pm 0.01\%$ FS / °C typ. $\leq \pm 0.02\%$ FS / °C max.
Non-linearity at max. setting to DIN 16086	$\leq \pm 0.3\%$ FS max.
Hysteresis	$\leq \pm 0.1\%$ FS max.
Repeatability	$\leq \pm 0.1\%$ FS
Rise time	≤ 1.5 ms
Long-term drift	$\leq \pm 0.3\%$ FS typ. / year
Environmental conditions	
Compensated temperature range	-25 .. +85 °C
Operating temperature range ¹⁾	-40 .. +100 °C / -25 .. +100 °C
Storage temperature range	-40 .. +100 °C

Electronic Pressure Transmitter HDA 8700 for Applications with Increased Functional Safety

(Minimum order quantity 500 units)

Functional Safety
PL d
SIL 2

Description:

This version of the pressure transmitter series HDA 8700 has been developed specifically for use in safety circuits / safety functions as part of the functional safety of machinery and equipment up to SIL 2 (IEC 61508) or PL d (ISO 13849).

During normal operation, the pressure transmitter HDA 8700 generates a pressure-proportional output signal. In the background, the pressure transmitter performs cyclical diagnostic tests to detect internal errors.

If an instrument error is detected, the pressure transmitter HDA 8700 supplies an output signal < 3 mA which is recognised by the user as an unacceptable discrepancy.

This means that the pressure transducer HDA 8700 achieves Performance Level d in the Safety category (based on a Category 2 of the architecture) and SIL 2. As a result, the pressure transducer can be recommended for use in applications where safety is critical.

The main areas of application are in mobile and stationary safety-oriented systems such as load torque displays or load torque limitation in loading cranes or working platforms.

Special features:

- SIL 2 / PL d certification
- Accuracy $\leq \pm 0.25$ % FS typ.
- Outstanding performance in terms of temperature effect and EMC
- Very compact design

Electronic Pressure Transmitter HDA 7400

(Minimum order quantity 100 units)

Description:

The pressure transmitter series HDA 7400 combines excellent technical specifications with a highly compact design.

The HDA 7400 was specifically developed for OEM applications e.g. in mobile applications. A stainless steel sensor cell with thin-film strain gauge is the basis for a robust, long-life pressure transmitter.

Various pressure ranges between 0 .. 40 bar and 0 .. 600 bar provide versatility when adapting to particular applications.

For integration into modern controls (e.g. with PLC), standard analogue output signals are available.

Special features:

- Accuracy $\leq \pm 0.5$ % FS typ.
- Highly robust sensor cell
- Highly compact design
- Very small temperature error
- Excellent EMC characteristics
- Excellent durability

Technical data:

Electronic Pressure Transmitter HDA 9300

(Minimum order quantity 1000 units)

Description:

The pressure transmitter series HDA 9000 has been specially developed for low pressure applications in the industrial and mobile sectors.

The transmitters are available in various pressure ranges from 0 .. 1 bar to 0 .. 100 bar.

For integration into modern controls, standard analogue output signals are available, e.g. 4 .. 20 mA, 0 .. 5 V, 1 .. 6 V or 0 .. 10 V.

Ratiometric output signals are also available.

For the electrical connection, different types of integrated connections are available.

A basic accuracy of $\leq \pm 0.5\%$ FS typ., combined with a small temperature drift, ensures a broad range of applications for the HDA 9300, e.g. in pump and compressor controls, refrigerating plants and air conditioning, or for pilot controls in the mobile sector.

Special features:

- Accuracy $\leq \pm 0.5\%$ FS typ.
- Outstanding performance in terms of temperature effect and EMC
- Very compact design

The electronic temperature switch HDA 9300 has been specially developed for OEM customers and is available for minimum order quantities of 1000 units per type.
 For exact specification, please contact the Sales Department of HYDAC ELECTRONIC.

Electronic Pressure Switch EDS 810

(Minimum order quantity 500 units)

Description:

The electronic pressure switch EDS 810 has been specially developed for use in volume production machines.

The highly compact instrument is equipped with a very robust pressure sensor with thin-film strain gauge on a stainless steel membrane.

The transistor switching output is available with either N/C or N/O function.

The switching and switch-back point of the EDS 810 is factory-set according to customer specification (not field-adjustable).

Various pressure ranges between 0.. 40 bar and 0 .. 600 bar are available.

Special features:

- Accuracy $\leq \pm 1\%$ FS
- Outstanding performance in terms of temperature effect and EMC
- Very compact design
- ECE type approval  (approved for road vehicles)

Technical data:

Input data	
Measuring ranges	40; 60; 100; 160; 250; 400; 600 bar
Overload pressures	80; 120; 200; 320; 500; 800; 1000 bar
Burst pressures	200; 300; 500; 800; 1250; 2000; 2000 bar
Mechanical connection (Torque value)	G1/4 A DIN 3852 (20 Nm) 7/16-20 UNF 2A (15 Nm) 9/16-18 UNF 2A (20 Nm) each with orifice 0.5 mm
Parts in contact with medium	Mech. conn.: Stainless steel Seal: FPM
Output data	
Switch output	Either: - 1 PNP or 1 NPN transistor switching output - 2 PNP transistor switching outputs (only in conjunction with electrical connection M12x1, 4 pole)
Switching direction	N/C / N/O function (according to customer specification)
Output load	≤ 500 mA per switching output
Switching points	according to customer specification
Switch-back points	according to customer specification
Accuracy to DIN 16086, Max. setting	$\leq \pm 0.5\%$ FS typ. $\leq \pm 1\%$ FS max.
Repeatability (at 25 °C)	$\leq \pm 0.1\%$ FS max.
Temperature drift	$\leq \pm 0.03\%$ FS / °C max. zero point $\leq \pm 0.03\%$ FS / °C max. range
Rising switch point and falling switch point delay	8 ms to 2000 ms (standard 32 ms); factory-set according to customer spec.
Long-term drift	$\leq \pm 0.3\%$ FS typ. / year
Environmental conditions	
Compensated temperature range	-25 .. +85 °C
Operating temperature range ¹⁾	-40 .. +100 °C / -25 .. +100 °C

Electronic Pressure Switch EDS 710

(Minimum order quantity 100 units)

Description:

The electronic pressure switch EDS 710 has been specially developed for use in large volume production machines.

The highly compact unit has a very robust pressure sensor with thin-film strain gauge on a stainless steel membrane.

The EDS 710 is available with 1 transistor switching output (PNP) which can be defined either as N/C or N/O.

Switching and switch-back points of the EDS 710 are factory-set according to customer specification (not field-adjustable).

Various pressure ranges between 0 .. 16 bar and 0 .. 600 bar are available.

Special features:

- 1 transistor switch output (PNP), either as N/C or N/O
- Factory-set according to customer specification (not field-adjustable)
- Accuracy $\leq \pm 1\%$ FS
- Highly robust sensor cell
- Highly compact design
- Very small temperature error

Technical data:

Input data	
Measuring ranges	16; 60; 100; 250; 400; 600 bar

Electronic Pressure Switch EDS 410

(Minimum order quantity 50 pieces)

Description:

The electronic pressure switch EDS 410 has been specially developed for use in volume production machines, and is based on the EDS 4000 pressure switch series. The EDS 410 is available with 1 or 2 transistor switching outputs (PNP), which can be defined as either N/C or N/O.

The switching and reset points of the EDS 410 are factory-set according to customer specification (not field-adjustable).

As with the EDS 4000 standard model, the EDS 410 has a ceramic measurement cell with thick-film strain gauge for measuring relative pressure in the low pressure range, and a stainless steel measurement cell with thin-film strain gauge for measuring in the high pressure range.

Various pressure ranges between 0 .. 1 bar and 0 .. 600 bar as well as different electrical and mechanical connection types are available.

Special features:

- 1 or 2 transistor switching outputs (PNP), either as N/C or N/O
- Factory-set according to customer specification (not field-adjustable)
- Accuracy $\leq \pm 1\%$ FS
- Highly robust sensor cell
- Very small temperature error
- Excellent EMC characteristics
- Excellent durability

Electronic Pressure Switch EDS 4400 ATEX, CSA, IECEx Flameproof Enclosure

(Minimum order quantity 50 units)

Description:

The electronic pressure switch EDS 4400 with flameproof enclosure and triple approval according to ATEX, CSA and IECEx ensures the instrument is universally suitable for use in potentially explosive environments around the world.

Each device is certified by the three approval organizations and is labelled accordingly. Therefore it is no longer necessary to stock multiple devices with separate individual approvals.

The switching point and switch-back point, the function of the switching output as N/C or N/O and the switching delay are permanently set in accordance with the customer's requirements.

As with the industrial version of the EDS 4400, those with triple approval have a field-proven, all-welded stainless steel measurement cell with thin film strain gauge without internal seals. Its main applications are in mining and the oil and gas industry, e.g. in underground vehicles, hydraulic power units, blow-out preventers (BOPs), drill drives or valve actuation stations as well as in areas with high dust loads.

Protection types and applications:

Safety instructions:

- The switching output draws the switching energy from the power supply to the pressure switch. No additional energy is introduced into the electrical circuit from the switching output.
- Dual Zener barriers specified and approved in the technical data must be used to connect the pressure switch. These have a reverse polarity diode to decouple the signal. The signal path may only be passively loaded.
- Ensure that measured fluids in contact with the pressure switch are compatible with the materials used.

Pin connections:

Pin connections are configured according to customer specification.

EN175301-803 (DIN 43650)

M12x1

Safety instructions:

- The switching output draws the switching energy from the power supply to the pressure switch. No additional energy is introduced into the electrical circuit from the switching output.
- Dual Zener barriers specified and approved in the technical data must be used to connect the pressure switch. These have a reverse polarity diode to decouple the signal. The signal path may only be passively loaded.
- Ensure that measured fluids in contact with the pressure switch are compatible with the materials used.

Order details:

The electronic pressure switch EDS 4300 in ATEX version has been specially developed for OEM customers and is available for minimum order quantities of 50 pieces per type. For exact specification, please contact the Sales Department of HYDAC ELECTRONIC.

Accessories:

Appropriate accessories, such as electrical connectors can be found in the Accessories brochure.

Dimensions:

Electronic Pressure Switch EDS 4100 ATEX Intrinsicly Safe

(Minimum order quantity 50 units)

Description:

The pressure switch EDS 4100 in ATEX version, has been specially developed for use in potentially explosive atmospheres, and is based on the EDS 4000 series.

The switching point and switch-back point, the function of the switching outputs as N/C or N/O and the switching delay are factory-set according to customer requirement (not field-adjustable).

As with the industry model, the EDS 4100 in ATEX version has a ceramic measurement cell with thick-film strain gauge for measuring absolute pressure in the low pressure range.

With approval for the following

Protection types and applications:

I M1 Ex ia I
II 1G Ex ia IIC T4, T5, T6
II 1/2G Ex ia IIC T4, T5, T6
II 2G Ex ia IIC T4, T5, T6
II 1 D Ex iaD 20 T100 °C

almost all requirements are covered regarding ignition group, error class and temperature class.

Versions for other Protection types and applications are available on request.

Special features:

- Switching output factory-set (not field-adjustable)
- Accuracy $\leq \pm 1\%$ FS
- Certificates:
DEKRA EXAM BVS 07 ATEX E 041 X
- Various types of electrical connection
- Very small temperature error
- Excellent EMC characteristics
- Excellent durability

Electronic Temperature Transmitter HTT 8000

(Minimum order quantity 500 units)

Description:

The HTT 8000 series of temperature transmitters was specifically developed for OEM applications e.g. in mobile applications. It is based on a silicon semiconductor device with corresponding evaluation electronics. All parts in contact with the medium are in stainless steel, and are welded together.

For integration into modern controls, standard analogue output signals are available, e.g. 4 .. 20 mA, 0 .. 5 V, 1 .. 6 V or 0 .. 10 V.

Ratiometric output signals are also available.

For the electrical connection, various built-in connections are available.

The pressure resistance up to 600 bar and excellent EMC characteristics make the HTT 8000 ideal for use in harsh conditions.

Special features:

- Accuracy $\leq \pm 1.5\%$ FS typ.
- Small, compact design
- Excellent EMC characteristics
- Long-term stability

Technical data:

Input data	
Measuring principle	Silicon semiconductor device
Measuring range ¹⁾	-25 .. +125 °C
Probe length	16 mm

Electronic Position Switch HLS 100 for Applications with Increased Functional Safety

Functional Safety
PL d
SIL 2

(Minimum order quantity 100 units)

Description:

The position switch series HLS 100 has been specifically developed to detect the end position of safety-related devices on mobile machinery.

The position switches are designed for continuous use in safety circuits/safety functions as part of the functional safety of machines up to SIL 2 (IEC 61508) or PL d (ISO 13849).

The HLS 100 consists of two parts, the encoder magnet and the sensor unit.

Using two Hall sensors integrated into the sensor unit, the sensor detects the defined position (end position) of the magnet and transmits the switching condition "ON" if this position is detected, or otherwise the switching condition "OFF".

Switching conditions are output as permanent PWM signals.

During stable normal operation, the position switch cyclically performs internal diagnostic steps, which identify systematic and random errors.

Errors which occur are therefore detected immediately. The output signal is then deactivated completely and the sensor is restarted.

Special features:

- Compact design
- Robust housing suitable for mobile applications
- High operating temperature range
- PWM output
- IP 67 male connector
- SIL 2 / PL d certification

Technical data:

Input data	
Switching range ¹⁾	± 3 .. ± 9 mm
Switching distance magnet – sensor ¹⁾	0 .. 11 mm
Lateral offset magnet – sensor ¹⁾	± 6 mm
Steel plate thickness	Magnet: min. 5 mm Sensor: 6 .. 8 mm
Output data	
Type	PWM 50 Hz ± 3 % (Push-Pull)
Duty cycle of the output signal OFF (magnet outside the switching range)	26 ± 1 %
Duty cycle of the output signal ON (magnet within the switching range)	74 ± 1 %
Output current consumption	
High level	60 mA min. / 150 mA max.
Low level	30 mA min. / 110 mA max.

Special Products Position Sensors and Position Switches

The position sensors and switches have been developed for short distance monitoring and can be used on the one hand for monitoring valve settings and on the other as part of a control. Based on different measuring techniques, HYDAC provides different variants for a diverse range of applications.

Position switch IES 2010 / 2015 / 2020

The position switch for monitoring valve settings (end or centre position) is primarily used in stationary applications such as:

- Hydraulic presses
- Plastics machines
- Machine tools

Special features:

- Pressure resistant to 400 bar
- Inductive measurement (LVDT)
- Various stroke sizes
- Output: 2 switching outputs with change-over function
- Electrical connection: M12x1 (4 pole)

Position sensor IWE 40

The IWE 40 position sensors for short distance detection are primarily used in stationary applications such as:

- Hydraulic presses
- Plastics machines
- Machine tools

Special features:

- Pressure resistant to 400 bar
- Inductive measurement (LVDT)
- Different measuring ranges (up to max. ± 7 mm)
- Output: Analogue 4 .. 20 mA
- Electrical connection: M12x1 (4 pole)

Position switch HLS 200 with increased functional safety

Functional Safety
PL d

The position switch HLS 200 is used for reliable detection of valve centre positions. They are used both in mobile and in stationary applications.

Special features:

- PL d certification
- Measuring technique: IR light barriers
- Output: 2 switching outputs with change-over function
- Electrical connection: M12x1 (4 pole); Deutsch DT 04 (4 pole)

Order details:

The position sensors and position switches are OEM products which have been especially developed for volume production customers. For a precise specification, please contact the Sales Department of HYDAC ELECTRONIC.

Note:

The information in this brochure relates to the operating conditions and applications described. For applications and operating conditions not described, please contact the relevant technical department. Subject to technical modifications.

ACCESSORIES

Accessories to suit every sensor!

Whether it's electrical connectors, mechanical adapters or the instrument mounting clamps, the wide range of products from HYDAC offers solutions for all applications.

Electrical Accessories Female Connectors for Sensors

ZBE 02

Female connector
Binder Series 714 M18
4 pole, straight
Cable diameter: 6.5 .. 8 mm
Part No.: 609479

With electrical connection type "4":
(Male Binder series 714 M18)

ZBE 03

Female connector
Binder Series 714 M18
4 pole, right-angle
Cable diameter: 6.5 .. 8 mm
Part No.: 609480

ZBE 01

Female connector
EN175301-803 (DIN 43650) / ISO 4400
3 pole + PE, right-angle
Cable diameter: 4.5 .. 7 mm
Part No.: 905701

With electrical connection type "5":
(Male EN175301-803 (DIN 43650) / ISO 4400)

ZBE 06

Female connector M12x1
4 pole, right-angle
Cable diameter: 2.5 .. 6.5 mm
Part No.: 6006788

**With electrical connection type "6":
(Male M12x1, 4 pole)**

ZBE 06-02

Female connector M12x1
4 pole, right-angle
with 2 m cable
Part No.: 6006790

ZBE 06-05

Female connector M12x1
4 pole, right-angle
with 5 m cable
Part No.: 6006789

Colour code:

Pin 1: brown
Pin 2: white
Pin 3: blue
Pin 4: black

ZBE 06S-03

Female connector M12x1
4-pole, straight
with 3 m cable, shielded
Part No.: 6098243

ZBE 06S-05

Female connector M12x1
4-pole, straight
with 5 m cable, shielded
Part No.: 6143284

ZBE 06S-05

Female connector M12x1
4 pole, right-angle
with 5 m cable, shielded
Part No.: 6044891

Colour code:

Pin 1: brown
Pin 2: white
Pin 3: blue
Pin 4: black

ZBE 10

Female connector DIN 43651
6 pole + PE, right-angle
Cable diameter: 7 .. 9 mm
Part No.: 654527

With electrical connection type "7": (Male DIN 43651)

ZBE 08

Female connector M12x1
5 pole, right-angle
Cable diameter: 2.5 .. 6.5 mm
Part No.: 6006786

With electrical connection type "8": (Male M12x1, 5 pole)

ZBE 08-02

Female connector M12x1
5 pole, right-angle
with 2 m cable
Part No.: 6006792

ZBE 08-05

Female connector M12x1
5 pole, right-angle
with 5 m cable
Part No.: 6006791

Colour code:

- Pin 1: brown
- Pin 2: white
- Pin 3: blue
- Pin 4: black
- Pin 5: grey

ZBE 08S-02

Female connector M12x1
5 pole, right-angle
with 2 m cable, shielded
Part No.: 6019455

ZBE 08S-05

Female connector M12x1
5 pole, right-angle
with 5 m cable, shielded
Part No.: 6019456

ZBE 08S-10

Female connector M12x1
5 pole, right-angle
with 10 m cable, shielded
Part No.: 6023102

Colour code:

Pin 1: brown
Pin 2: white
Pin 3: blue
Pin 4: black
Pin 5: grey

ZBE 30-02

Connection cable M12x1
plug/socket
5 pole, 2 m
Part No.: 6040851

ZBE 30-05

Connection cable M12x1
plug/socket
5 pole, 5 m
Part No.: 6040852

ZBE 0P

Female connector M12x1
8 pole, right-angle
Cable diameter: 4 .. 8 mm
Part No.: 6055444

ZBE 0P-02

Female connector M12x1
8 pole, right-angle
with 2 m cable
Part No.: 6052697

ZBE 0P-05

Female connector M12x1
8 pole, right-angle
with 5 m cable
Part No.: 6052698

Colour code:

- Pin 1: white
- Pin 2: brown
- Pin 3: green
- Pin 4: yellow
- Pin 5: grey
- Pin 6: pink
- Pin 7: blue
- Pin 8: red

**With electrical connection type "P":
(Male M12x1, 8 pole)**

Mechanical Accessories

ZBM 01

Adapter female thread G1/4 – male thread G1/2 B, DIN EN 837-1

Part No.: 257276

Connection accessories for pressure sensors

ZBM 02

Adapter female thread G1/4 – male thread G1/2 A, DIN 3852

Part No.: 257277

ZBM 13

Adapter female thread G1/4 – male thread G1/4 A, with orifice 0.5 mm

Part No.: 906968

ZBM 14

Adapter female thread G1/4 – male thread G1/4 (rotating)

Part No.: 907818

Mounting accessories, device-specific EDS 8000, HDA 8000; EDS 810

ZBM 8000

Clamp for wall-mounting
- screw-type fitting -

(Material of lower section:
TPE Santoprene 10187;
Material of top section:
Steel strip DIN 95381-1.4571)

Part No.: 3546755

ZBM 8100

Clamp for wall-mounting
- weld-type fitting -

(Material of welding bridge:
QSTE340TM, zinc coating
EN 12329 FE/ZN8/B;
Material of lower section:
TPE Santoprene 10187;
Material of top section:
Steel strip DIN 95381-1.4571)

Part No.: 3546757

Mounting accessories, device-specific
EDS 3000, ETS 3000, AS 3000, ENS 3000 and HNS 3000

ZBM 3000

Clamp for wall-mounting
 - screw-type fitting -

(Material of lower section:
 TPE Santoprene 10187;
 Material of top section:
 Steel strip DIN 95381-1.4571)

Part No.: 3184630

ZBM 3100

Clamp for wall-mounting
 - weld-type fitting -

(Material of welding bridge:
 QSTE340TM, zinc coating
 EN 12329 FE/ZN8/B;
 Material of lower section:
 TPE Santoprene 10187;
 Material of top section:
 Steel strip DIN 95381-1.4571)

Part No.: 3184632

ZBM 3200

Splash guard

(Material:
 Elastollan S60 A15 SPF 000)

Part No.: 3201919

**Mounting accessories, device-specific
EDS 300, ETS 300**

ZBM 300

Clamp for wall-mounting
- screw-type fitting -
(Material polypropylene)
Part No.: 906385

ZBM 310

Clamp for wall-mounting
- weld-type fitting -
(Material polypropylene,
aluminium AlSi12, steel)
Part No.: 6011511

Vibration mounts

Part No.: 257492

Mounting accessories, device-specific EDS 1700, ETS 1700

Mounting kit EDS 601

- for front panel mounting-
(St4K32 DIN 1544)

Part No.: 905404

Mounting accessories, device-specific EDS 601

Protective sleeve for tank-mounting

(Material CuZn39Pb3 - DIN 1763, electro-nickel-plated)

Part No.: 909640

Tank mounting sleeve , device-specific ETS 3000 (100 mm)

ZBM 19

Straight bulkhead union ISO 8434

Part No.: 908738

Note: Not suitable for ENS with 250 mm probe length

Connection accessories, device-specific ENS 3000

ZBM 20

Straight male stud coupling to ISO 8434

Part No.: 908739

ZBM 21 (Flow)

Mounting block for HLB 1300
for flow rates > 2 l/min
Part No.: 3244260

ZBM 23 (Low Flow)

Mounting block for HLB 1300
for flow rates from 0.5 .. 10 l/min
Part No.: 3299331

ZBM 22

Mounting block for AquaSensor
AS 1000 and AS 3000
Part No.: 3248511

Mounting block, device-specific HLB 1300

Connection accessories, device-specific AS 1000, AS 3000

Accessories Sensors for Distance and Position

ZBL MR17

Position magnet for HLT 1000 and HLT 2100

Part No.: 6119372

Magnets for HLT 1000, HLT 2000, HNT 1000

ZBL MR22

Position magnet for HLT 1000 and HLT 2100

Part No.: 6084453

ZBL MR33

Position magnet for HLT 1000 and HLT 2100

Part No.: 6084207

ZBL MV63

Position magnet for
HLT 1000, HLT 2100 and
HLT 2500-L2

Part No.: 6084454

ZBL MS35-39

Measuring slide for
HLT 2500-L2

Part No.: 6105654

ZBL MU38-20

Position magnet for
HLT 1000, HLT 2100 and
HLT 2500-L2

Part No.: 6084455

ZBL MF38-18

Position magnet for
HLT 2500-F1

Part No.: 6084456

ZBL MF55-20

Position magnet for
HLT 2500-F1

Part No.: 6084457

ZBL Mounting set

Mounting set for HLT 2500
Part No.: 6105653

Electrical accessories HLT 2000

Electrical connection	Signal output	HYDAC description	Part number
M06	Analogue	Cable connector C091, 6 pole, straight	654653
M08	Analogue	Cable connector C091, 8 pole, straight	6123255
C61	CAN / DVN	ZBE 08 cable connector M12x1, 5 pole, right-angle	6006786
S01	SSI	Cable connector M23, 12 pole, straight	6120462
S01	SSI	Cable connector M23, 12 pole, right-angle	6120463

Accessories for Service Instruments

Aluminium case

for HMG 30X0 and accessories

Part No.: 6042959

Bag with carrying strap

for HMG 30X0

Part No.: 909795

Power supply unit

for HMG 30X0, Spare Part

Part No.: 6054296

ZBE 31

Car charger for HMG 30X0

Part No.: 909739

ZBE 34

Adapter for HMG 30X0 for connecting
HYDAC transmitters

(4 .. 20 mA, 2 conductor)

Male M12x1 to

Binder series 714 M18

(electrical connection type "4")

Part No.: 3236597

ZBE 35

Adapter for HMG 30X0 for connecting
HYDAC transmitters

(4 .. 20 mA, 2 conductor)

Male M12x1 to

Male EN175301-803

(DIN 43650)

(electrical connection type "5")

Part No.: 3236601

ZBE 36

Adapter for HMG 30X0 for connecting an AquaSensor AS 1000

Part No.: 909737

ZBE 38

Y adapter (black) for HMG 30X0 to double the number of input sockets

Part No.: 3224436

ZBE 41

Y adapter (yellow) for HMG 30X0 for connecting a ContaminationSensor CS 1000

Part No.: 910000

ZBE 3010

CAN adapter for HMG 3010 for connecting a CAN-Bus

Part No.: 921238

Connection cable

for HMG 30X0 - PC (USB), Spare Part

Part No.: 6040585

Hydraulic adapter kit

for HMG

2 pieces each

- Adapter hose DN 2 -1620 / 1620 (400 mm and 1000 mm)
- Pressure gauge conn. 1620 / G1/4
- Adapter 1650 / 1620
- Bulkhead union 1620 / 1620

Part No.: 903083

HDS 1000 RPM probe

for HMG 30X0

including reflective foil set

Part No.: 909436

HDS 1000 reflective foil set

Spare Part, Quantity: 25

Part No.: 904812

UVM 30X0

Module for HMG 30X0 for connecting different input signals

Part No.: 909752

Plastic case

for HMG 500/510 and accessories

Part No.: 6043006

Power supply (230 V AC)

for HMG 500/510

Part No.: 6043562

Connection cable

for HMG 510 - PC (USB), Spare Part

Part No.: 6049553
